Air Jam packs Knickerbocker

Daring to be Stupid...
Members of the Emersonian fraternity opened Air Jam with an innovative act called "Ralph Waldo and the Workaholics." From left, Chris Lowell, Harry Coffill, Todd Adams and Jim Loats.
New member Adam Johnson is congratulated by Mortar Board vice-

president Kim King during Sunday's induction ceremony. Brenda Laninga (in background) announces the names of the new members.

Mortar Board inducts 35 new members

by Carrie Maples

Mortar Board is a national honor society with two hundred chapters across the United States. Hope's chapter was established in 1961. Other chapters in the area include ones at University of Michigan, Michigan State, Eastern, Western, Central, and Michigan Tech universities, and Albion College. As of this spring, Adrian College joins the list.

Each chapter has a minimum of five members and a maximum of thirty-five. Hope's chapter usually has close to the maximum number of members. Members are elected during the spring of their junior year on the basis of scholarship, leadership and service.

Mortar Board stresses being actively involved with the group but in the past years Hope's chapter has been somewhat inactive. This year's members have tried to change that trend by being very involved in the community, college, and planned social activities.

Their social activities have included picnics, hayrides and parties. They correspond with Professors Jane Dickie, who is currently in South Africa, concerning her experiences. For Christmas, members decorated the Capec House, a Victorian house owned by Holland's first mayor.

In January they sponsored the first "Wearing of the Blue Breakfast" for freshman and sophomores named to the Dean's List for fall semester. Current, individual members are working with the Academic Affairs Board on re-evaluating core curricular. They have been very busy and as Mary Taylor, co-president, said, "We've done lot of good things, many of which we hope to see become traditions for future chapters."

Recently, headed by election chairpersons Brenda Laninga and Kim King, members began the exhaustive process of selecting new members. The candidates, juniors in the top 35 percent of their class with at least a 3.34 GPA, answered a questionnaire listing their scholastic achievements, community services and leadership abilities along with other pertinent information. Each candidate included a faculty member as a reference. There were 110 prospective candidates for Mortar Board.

After the extensive interviewing process, on March 28, in a process called Tapping, member candidates were informed of the outcome of the vote. April 4 a meeting was held to inform candidates about Mortar Board and they had to decide to accept or reject induction. Everyone accepted. Sunday afternoon induction was held in the Maas Auditorium for the following students:

The Women's Issues Organization of Hope College is hosting the GLCA Women's Studies Student Conference this weekend, April 14-15. The theme of the conference is "Gaining Strength: The Future of the Feminist Movement."

This is Hope's first time to host this conference. Carrie Beecher, co-president of the Women's Issues Organization, said, "I think it's a neat opportunity for Hope to bring in people from different schools to learn from each other. I'm looking forward to the networking that can occur from an event like this."

Beecher also said that this type of conference offered something to everyone, "As you learn about yourself and how to deal with issues on your own campus. You can get a lot of support from others sharing with other schools."

Nearly 40 students from GLCA schools, including DePauw, Albion, Goshen, Wabash, and Earlham, will be arriving Friday afternoon. Additionally, nearly 20 Hope students have already registered for the conference.

Friday night has been earmarked as an entertainment and get-acquainted night. Participants will be listening to opening remarks and a history of the women's movement as presented by Sandra Hansen, a women's studies major at Hope.

Participants will also see the play "Night Mother," and will be involved in a discussion with the director following the play. Many paper presentations, selected from those submitted by students from the GLCA schools will comprise the bulk of Saturday's schedule.

The paper presentations all deal with gender issues and have been scheduled as follows:

Saturday: 9 a.m. - "Mutual Submission: A Solution to Be Considered" by Doug Bixby, Hope College; Otte Room

10 a.m. - "The Effects of the Ovulatory Phase of the Menstrual Cycle on Aerobic Performance in Active College-Age Women" by Colleen McCloud, College of Wooster; Haworth Room

11:15 a.m. - "Homosexual Artists: Selected Sensitivities" by Shannon Salser and Lynne Stahl, Denison; Barber Room

During the morning on Saturday, the Hope-Geneva Bookstore will be open and will have a special display of books related to women's issues.

At the end of the day on Saturday, students will break up into small groups for a sharing of opinions and ideas.

Students can still register for the conference, but must do so immediately. The cost for the entire conference is $10 for a student not on meal plan, and $3.50 for a student on meal plan. The conference is free to those who just wish to attend the Saturday paper presentations or small group discussions or Friday's opening remarks.

Additional information on the conference is available from Anne Steider, Albion College; Otte Room.

The Future of the Feminist Movement conference this weekend

by Beth Pechta

Vietnamese scholars visit Hope

by Carrie Maples

assistant News Editor

Last Thursday three well-known Vietnamese scholars, sponsored by the Indochina Scholarly Exchange Program, had the opportunity to visit our campus and speak to students and faculty.

The three gentlemen are from Hanoi and in an open forum at Cook Auditorium discussed the effect of the Vietnam War and the country's development since. Professor Bui Dinh Thanh, sociologist and expert of Vietnam Social Science Review, said that during his life he has run from the bombs of Japan, France, Great Britain and the United States. He is self-taught and is currently researching the history of Vietnam during the twentieth century, including relations with the U.S.

Thanh said in studying the past he has learned how much the Vietnamese people value freedom. To illustrate this he told the story of a western reporter who, during the war, saw an American pilot bail out of a flaming plane and instead of being killed when he landed he was only tied up. The people were angry but they wanted to promote friendship. Thanh believes the key to normalizing diplomatic relations lies in forgiving and forgetting the past and an open exchange of ideas.

Professor Tran Quoc Vuong, archaeologist and historian at the University of Hanoi, is part of the first generation of Vietnamese archaeologists. He helped founded the department in 1965 and during the war, when students were evacuated into the mountains, continued to teach by taking advantage of the nearby caves for excavation.

Vuong sees Vietnam as moving toward democracy and developing more fully as a nation. The best thing for progress if free, open-minded thinking. This comes, he believes, from a steady exchange of students and faculty with European universities.

Professor Duong Phu Hiep, philosopher, vice-director of the Institute of Philosophy and editor of Philosophy Review, also grew up during wartime. He says he often studied by oil lamp because there was no electricity and he hid from late-night bombing raids. He received his formal education in the Soviet Union.

Hiep sees Vietnam as needing to increase the wealth of the people, develop economically - both domestically and abroad - and train its people in new technology and the sciences. This has begun with the dramatic growth of Vietnam's one hundred universities.

When asked about American P.O.W.s still in the country all three insisted that the only Americans there are visitors and that there are no Americans left from the war.

p.m. - "Heteropatriarchal Concepts and the Language of Lesbian (Intimate) Relationships" by Susan Vigor, Chong, Kenyon College; Barber Room

"A Step Towards Gender Equality by Bobby King, Albion College; Haworth Room

During the morning on Saturday, the Hope-Geneva Bookstore will be open and will have a special display of books related to women's issues.
Eight Hope College students participated in The National Model League of Arab States funded by The National Council on U.S.-Arab Relations and the Arab League Information Center, March 27-29 at Calvin College. The event was modeled after the actual League of Arab States. Fifteen schools from all over the Midwest competed, each representing one Arab nation. Hope's delegation, comprised of Jill Hough, Arwa Haider, Karen Johns, David Corey, Jim Huffman, Judy Christensen, Angela Oatis and Susan Maciak, received "Best Delegation" for their representation of the P.L.O. of Lebanon, a State University which represented Syria and placed second.

The purpose of this was to simulate an actual Arab League summit and educate the participants in the dynamics of Arab politics through role playing. When questioned about the research necessary in preparation for the competition, Jill Hough explained that they not only read magazines and newspapers constantly in order to be aware of current issues but also contacted many history and political science professors from Hope and other schools. These professors were asked for their views on the Middle East. Dr. Penrose and his wife, Hough said, were greatly appreciated for their assistance.

The proceedings began Monday, March 27. Five committees were established: socio-cultural, political, legal, economic and Palestinian. These groups discussed various issues such as Arab support for the Palestinian uprising, proposals for an economic federation within the Arab world, Lebanon's civil war and resulting international intervention, an international peace conference for the Palestinian people and many other issues.

The committees worked for two hours on Monday, all of Tuesday and Wednesday morning. For the last half of the Arab summit, the committees came together for a final debate which lasted six straight hours Wednesday afternoon.

Hough explained that this was not only an opportunity for those pursuing political science degrees. Hope's group consisted of history, psychology and engineering majors. She added that it was a great educational experience.

For information on how to get involved in the Model League of Arab States call Ms. Laurie Engle, the Hope's delegation advisor, at X7668 in the International Education office.

Kugel to lecture on biblical literature

HOLLAND - Dr. James Kugel, Starr Professor of Hebrew Literature at Harvard University, will be the Danforth Lecturer in Residence at Hope College April 12 and 13.

While on campus, Kugel will present a public lecture on Wednesday, April 12 at 3:30 p.m. in Winants Auditorium in Graves Humanities Hall. He will also make various presentations to students and teach selected classes.

The religion department at Hope is proud to have invited Kugel, an Ohio State University Ph.D., to give a lecture on the Bible and Its Interpreters. Kugel is a graduate of Yale University and before becoming a professor of classical and modern Hebrew literature at Harvard. He is a gifted and inspired teacher. His course on "The Bible and Its Interpreters" at Harvard University is routinely jammed - last term fewer than 350 students signed up for his course.

This year's Danforth Lecture is made possible through funding from the Daniel H. and Helen L. Padnos Education Fund. Kugel's visit is being coordinated by Professors John Doolan and Dr. Dennis Voskull.

Kugel is the head of the Department of Near Eastern Languages at Harvard, where he is studying and writing under a National Endowment for the Humanities Fellowship. Kugel, 43, is an expert in biblical literature and early Christian and Jewish interpretation.

The New York-born scholar co-authored "Early Biblical Interpretation" and was a founder of the journal "Prooftexts," which is devoted to modern biblical interpretation. His book "The Idea of Biblical Poetry" is an iconoclastic reevaluation of current notions of the literary character of poetry in the Bible. Currently, Kugel is working on a doctoral dissertation at Judaism and is editing a history of biblical interpretation that will be published in both English and Hebrew. He is also preparing a book to be entitled "Potiphar's House: The Story of Joseph and Its Interpreters."

Holland - Dr. Donald A. Luidens, associate professor of sociology at Hope College, is one of three sociologists involved in an on-going study of the religious beliefs and behaviors of post-World War II Presbyterians awarded a major grant from the Lilly Endowment Inc. of Indianapolis, Ind.

Luidens, Dr. Dean R. Hope of Catholic University of America in Washington, D.C. and Dr. Benton Johnson of the University of Oregon in Eugene, have already completed a pilot study of "Baby Boom" era Presbyterians that was also funded by the Lilly Endowment. The current $187,000 grant will enable them to dedicate a full year to an intensive study of the demographic group.

"In the last two decades, mainline Protestantism, including the Presbyterian Church, has suffered significant membership losses," Luidens said. "While initial analysis of the research suggests that they were the consequence of denominational 'liberalism' on social and political issues, it has recently become clear that the real reason for the decline is a different one. The principal cause for the membership drop has been the changes in lifestyle among the generation born after the Second World War."

"The 'Baby Boom' generation has delayed its marriages and its childbearing. Many have never been married; others wait until late in their 20s or even 30s to begin having children. Each of these patterns results in delayed - and often no - church involvement," Luidens said. "In addition, having passed through the struggles of the Vietnam War and the civil rights movement, this generation seems to hold an on-going suspicion of all institutions - including religious ones. As a result of these changes in lifestyle and values, large numbers of Baby Boomers have refrained from joining mainline churches."

In their pilot study, Luidens, Hope and Johnson traced the life histories of more than 50 former Presbyterians ages 33-42. They found that about half of these former Presbyterians were currently members of religious organizations. About 40 percent had stayed in the Presbyterian church or had joined other mainline churches. Another 10 percent had joined more fundamentalist congregations. Of the half not involved in any churches, roughly half considered themselves to be believers. The balance of the respondents were neither members of churches nor believers.

In their pilot study, Luidens, Hope and Johnson traced the life histories of more than 50 former Presbyterians ages 33-42. They found that about half of these former Presbyterians were currently members of religious organizations. About 40 percent had stayed in the Presbyterian church or had joined other mainline churches. Another 10 percent had joined more fundamentalist congregations.

Of the half not involved in any churches, roughly half considered themselves to be believers. The balance of the respondents were neither members of churches nor believers.

The pilot study showed that the respondents had traveled in a variety of religious directions from their common roots as Presbyterians. The response of the current Lilly study is to ascertain the reasons for those differing paths.

More than 500 persons, selected from Presbyterian church membership rolls from throughout the country, will be interviewed for the study. Among the variables that will be examined will be the impact of education and income levels, divorce and other family disruptions, and the influence of other liberal and religious behavior of those studied.

The purpose of this work is to determine the changes in lifestyle and values, large numbers of Baby Boomers have refrained from joining mainline churches.
Stapert receives Mellon Fellowship

HOPE - Hope College senior Craig Stapert of Grand Rapids, Ml., has been awarded a prestigious Mellon Fellowship in the Humanities.

Stapert is the college's first Mellon Fellowship recipient. The highly-competitive fellowships were awarded to 128 college seniors or recent graduates who desire to begin graduate work in preparation for a career of teaching and scholarship in a humanities field of study. Stapert, a classics major minoring in music, intends to pursue a doctorate in classical languages.

"I was very excited," Stapert said, recalling the receipt of his notification. "You know when you open the mailbox and you see a large envelope that it has to be good news."

Stapert, who has completed his bachelor of arts degree at Hope in only three years when he graduated in his organist and also plays for the Maple Avenue Christian Reformed Church. He is convinced of the computer's value as a tool for scholarship and has developed his programming skills and graphics abilities.

Stapert has used his summers to add depth to his scholarly background through research. Last summer, through a Younger Scholars Award given by the National Endowment for the Humanities (NEH), Stapert studied the life of Philo of Alexandria. This summer, he will work with Dr. Barry Bandstra, associate professor of religion at Hope, through a Hope faculty-student research grant.

Stapert conducted his NEH grant research with Dr. Albert Bell, associate professor of classics and history at Hope. "I think Craig is without a doubt the best student that I've had in 11 years of teaching here," Bell said. "I think he really is the ideal sort of candidate that the Mellon people are looking for."

Bandstra, who has worked closely with Stapert during his time at Hope and nominated him for the Fellowship, concurred. "He's extremely competent student," Bandstra said. "He has a fertile and perceptive mind. He is clearly adept in languages and the analysis of texts. I consider him to be the very best student of biblical and classical literature I've had to work with in my nine years of college teaching."

Stapert will work with Bandstra comparing Hebrew scriptures with the Septuagint (the Greek translation of the Old Testament) and developing computerized courses for Dr. Bandstra's Introduction to Biblical Literature course.

Stapert has worked with Bandstra as a student, at least. For his introductory course in biblical literature since completing it him. Bandstra's comments at Hope. Stapert noted that Bandstra provided a great deal of support during the application process, and said, "I'm very thankful, very appreciative."

The Fellowship will provide Stapert with up to $20,000 to cover tuition and fees and provide a living stipend of $11,000 for each of his first two years of graduate study. A third year of support may be made available as well. Stapert, who was also a Midwestern Region Marshall Scholar finalist, is in the process of choosing a graduate school.

The new Mellon Fellows include 59 women and 67 men from 60 North American colleges and universities. Of the recipients, 71 are college seniors, but many have elected - and some have been forced - to interrupt their schooling.

By seeking out, engaging and materially assisting outstanding undergraduates in their pursuit of graduate study, the Mellon Fellowships in the Humanities aim to uphold highest standards of teaching and scholarship in fields such as English literature, history, philosophy, classics, comparative literature and the humanistic social sciences. The Mellon Fellowships, instituted in 1969 by the Andrew W. Mellon Foundation and administered by the Woodrow Wilson National Fellowship Foundation.

"Therefore our hope is for you to gain a better understanding of what we are being educated to do in our future careers. The following comments were written by us as students and reflect what we wish you knew about our profession.

-Nursing is an intellectual profession. It requires problem-solving abilities and an understanding of the physiological and pathophysiological phenomena of the complex human being. It is no longer a matter of just following doctors' orders. If we only followed doctors' orders we would only need to know how to read and carry out procedures.

-Nursing addresses concerns of every aspect of the person. It not only involves technical skills but creative insight and actual concern for the patient.

-Medical treatment diseases Nursing treats people's responses to disease.

-Although nursing and medicine work together toward good health care, they see things from different angles and they collaborate toward the common goal.

-Nursing involves being an effective caregiver, coordinator, teacher, counselor and advocate for each patient.

-People are entering nursing because they want to help heal patients, not because they were not intelligent enough to be a doctor.

-Nursing is holistic in nature. The diverse role of the nurse encompasses all aspects of the patient's life. As nurses we assist patients in both preventative health measures, as well as recovery from a disease.

-It is our intent that these comments reveal our commitment to the care of the patient. We believe that what we do for our patients, makes a difference and we hope that you have a better understanding of who we are and what we do.

Hope receives strategic planning grant

HOLLAND - A grant that will assist Hope College in its "Hope in the Future" strategic planning project is one of 20 given to independent colleges and universities by the Consortium for the Advancement of Private Higher Education (CAPHE).

The $42,256 grant, which will fund approximately half of the planning project, is the first given to Hope by CAPHE.

"It's very nice to have the recognition that is implicit in receiving a grant from a prestigious grant-making agency for the very first time," said John H. Loebron, president of Hope College. "I think what this grant represents is very substantial help and very important recognition of both Hope and strategic planning."

The "Hope for the Future" project, which will continue into 1989, is a major planning effort designed to help the college set directions for the coming decade.

The planning is addressing 12 major topics, including the size and composition of the student body, the range of services in response to community and college needs, and the relationship between a liberal arts education and career goals.

For each topic there is a planning group of between 8 and 12 people, including members of the college's board of trustees, faculty, alumni and friends of the college. Members of the administrative staff and student body are also involved. The reports of the planning groups will ultimately be mathematized into a final report that will be forwarded to the board of trustees.

The groups first met during Thursday, April 13. "I believe that Hope in the Future is off to a very good start. I'm impressed by the quality of the people involved and their enthusiasm for the task. I'm delighted by this additional encouragement for their efforts," Loebron said.

The award notice from CAPHE rated the college and its planning project highly. "In the awarding of this grant, we recognize the significance of Hope College within the community of independent higher education, the value of the proposed activities for your institution and their potential value as an example for others," wrote A. Richardson Love Jr., acting president of CAPHE.

The philanthropic consortium, comprised of more than 30 major U.S. corporations and foundations, awarded grants totaling $583,225. The grants made by CAPHE will support a variety of projects in the areas of faculty and curriculum development, strategic planning, market analysis, program assessment in amounts ranging from $10,000 to $50,000, and will be matched by the colleges.

CAPHE invited 98 to prepare proposals. Following assessment by at least four outside reviewers and discussions with CAPHE staff, 20 were selected. Hope and Alma College are the only Michigan colleges selected by the consortium.

Watkins to lecture on nuclear fission issues

HOPE - Dr. Sallie A. Watkins, professor emerita of physics at the University of Southern Colorado, will deliver the final lecture in the four-lecture series: Science, Technology & Human Values, at Hope College on Thursday, April 13.

The lecture series is sponsored by Hope College with a grant from the G.T.E. Foundation.

Dr. Watkins will speak on the topic: "The Issues That Divide Us About Nuclear Fission." Her lecture will begin at 11 a.m. in Winans Auditorium in Graves Hall. The public is invited. Admission is free.

Dr. Watkins is a graduate with honors of Notre Dame College (Cleveland). She earned both a master's degree and the Ph.D. in physics from Catholic University of America. She has held teaching positions in Cleveland area high schools, Notre Dame College, Catholic University of America and the University of Southern Colorado. She also has served as department chairman and dean of women at Notre Dame College, and as department chairman, vice president for research and dean of the college of science and mathematics at the University of Southern Colorado.

The most recent research has been in the field of the history of science where she has focused on the life of Wiste Meitner. She was one of the early pioneers in nuclear fission.

Dr. Watkins travels widely and lectures often on issues relating to the history of science and the development of nuclear energy. Her contributions to science and higher education have been recognized by her receipt of outstanding educator awards in 1972, and 1973.
Credit card companies tempt undergrads with plastic money

(CPS) – American Express, known as a company for business executives and yuppies, unveiled a plan in mid-March to woo college undergrads.

With bait like cheap airline fares and magazine subscriptions, the historically high financial firm says it will start trying to tempt students at the 1,000 biggest campuses in the country to carry its credit card.

The move is emblematic of a larger trend, various consumer advocates say, of students being able to get credit more easily during the last three years.

And many of the consumer advocates don’t think the credit card companies’ new invasion of American campuses is a very good idea.

"Students are acquiring credit at a time when they are poorly suited to use it wisely," said Mike Heffer of Consumer Action, a San Francisco lobbying group, when told of the new American Express effort.

"Credit cards get me into financial trouble," agreed University of Houston senior Scott Fox. "I charged too much, and didn't have the money for pay for (it). I am in the process of paying them off now."

But the student market "is the right place to be now" to sell credit, said Gallo of American Express (Amex), adding undergrads probably will prove a good source of business for the company in the future.

"It’s important to start early with people who will be better earners," she said, noting students are just starting to form brand loyalties. The credit card companies make their money by charging three-to-seven percent of each purchase made with their cards, and by charging customers interest on the unpaid balances each month.

By contrast, "only" some 500,000 students carry American Express cards now. To catch up to Visa and Mastercard, "we’re proposing an integrated marketing program that includes the cards, along with benefits and services tailored to the needs of students," Gallo said.

Students "accepted" by Amex get a $600 credit limit.

Some students and campus administrators, however, wonder if it’s a good idea for students.

Thirty-five percent of the students who asked University of California at Los Angeles (UCLA) for extra financial aid from 1986 to 1988 said they needed to repay credit card debts, UCLA counselor John Hoyt said. Iowa State University financial counselor Ann Swift said she’s seen an increase in the number of students suffering from high credit card debts in recent years, and that some contemplate bankruptcy.

The new effort of credit card holders nationally pays their monthly bill. The other 60 percent have an average monthly balance of $8,000, said Swift.

Credit card abuse has become so common that the University of Southern California holds a session on credit cards each week for students, observed University of Florida finance Prof. Arnold Heggstad.

"The answer to why credit card companies abruptly decided they wanted to start signing up students had more to do with demographics. There are far fewer credit-worthy adults to be wooed these days — and the economy, he said."

"If the economy is strong," Heggstad noted, "it’s a safe bet seniors will get jobs when they graduate."

"And to be futuristic for a moment," he added, "ten years from now the paper society — checks — will be gone. The companies that can put their plastic in people’s pockets will be the big winners. The college market is receptive to change, so they may be the best group to grow into."

"Their purpose," Consumer Action’s Heffer believes, "is to create a population of adults tuned into the credit world."

So Citicorp in New York, which started asking students to carry credit cards in the mid-eighties, has issued about 1.5 million VISA’s to students, a company spokesperson said.

By contrast, "only" some 500,000 students carry American Express cards now. To catch up to Visa and Mastercard, "we’re proposing an integrated marketing program that includes the cards, along with benefits and services tailored to the needs of students," Gallo said.

Students "accepted" by Amex get a $600 credit limit.

"Their purpose," Consumer Action’s Heffer believes, "is to create a population of adults tuned into the credit world."

So Citicorp in New York, which started asking students to carry credit cards in the mid-eighties, has issued about 1.5 million VISA’s to students, a company spokesperson said.

By contrast, "only" some 500,000 students carry American Express cards now. To catch up to Visa and Mastercard, "we’re proposing an integrated marketing program that includes the cards, along with benefits and services tailored to the needs of students," Gallo said.

Students "accepted" by Amex get a $600 credit limit.

Some students and campus administrators, however, wonder if it’s a good idea for students.

Thirty-five percent of the students who asked University of California at Los Angeles (UCLA) for extra financial aid from 1986 to 1988 said they needed to repay credit card debts, UCLA counselor John Hoyt said. Iowa State University financial counselor Ann Swift said she’s seen an increase in the number of students suffering from high credit card debts in recent years, and that some contemplate bankruptcy.

The new effort of credit card holders nationally pays their monthly bill. The other 60 percent have an average monthly balance of $8,000, said Swift.

Credit card abuse has become so common that the University of Southern California holds a session on credit cards each week for students, observed University of Florida finance Prof. Arnold Heggstad.

"The answer to why credit card companies abruptly decided they wanted to start signing up students had more to do with demographics. There are far fewer credit-worthy adults to be wooed these days — and the economy, he said."

"If the economy is strong," Heggstad noted, "it’s a safe bet seniors will get jobs when they graduate."

"And to be futuristic for a moment," he added, "ten years from now the paper society — checks — will be gone. The companies that can put their plastic in people’s pockets will be the big winners. The college market is receptive to change, so they may be the best group to grow into."

"Their purpose," Consumer Action’s Heffer believes, "is to create a population of adults tuned into the credit world."

So Citicorp in New York, which started asking students to carry credit cards in the mid-eighties, has issued about 1.5 million VISA’s to students, a company spokesperson said.

By contrast, "only" some 500,000 students carry American Express cards now. To catch up to Visa and Mastercard, "we’re proposing an integrated marketing program that includes the cards, along with benefits and services tailored to the needs of students," Gallo said.

Students "accepted" by Amex get a $600 credit limit.

Some students and campus administrators, however, wonder if it’s a good idea for students.

Thirty-five percent of the students who asked University of California at Los Angeles (UCLA) for extra financial aid from 1986 to 1988 said they needed to repay credit card debts, UCLA counselor John Hoyt said. The new effort of credit card holders nationally pays their monthly bill. The other 60 percent have an average monthly balance of $8,000, said Swift.
Racists jokes end up in kindergarten

(CPS) - While some campuses debate driving joke boards off their computer systems, a list of racist jokes illicitly stored in Southern Illinois University's computer system ended up in a local kindergarten class.

"Although the university president did not have any direct involvement, the individuals represent the university and we cannot condone this matter," SIU President John Guyon said upon releasing a report of the incident.

The problem began in November, when an unnamed SIU student downloaded a 30-page long joke file into the campus's computer system.

Holyoke students ban Coca-Cola

(CPS) - Mount Holyoke College students have kicked Coca-Cola products off campus.

Students at nearby Smith and Amherst colleges reportedly are trying to organize similar boycotts in protest of the Atlanta corporation's ties to segregationist South Africa.

Ninety percent of the students at Mount Holyoke's Northampton, Mass., campus turned out at a March 6 referendum, approving the measure by a 2-1 margin. The results, however, are not binding on the campus food service department.

The American Friends Service Committee (AFSC), which has been trying to gather support for a Coke boycott on various campuses, argues the company -- which sold most of its South African holdings in 1987 -- still pays taxes to the South African government on its licensed products.

Mount Holyoke was the first campus in the country to endorse the boycott, AFSC organizer Arthur Serota said.

Officials at Coca-Cola headquarters in Atlanta declined to comment.

Profs may have to teach 12 hours to get paychecks

(CPS) - College professors in Wisconsin would have to teach an average of six hours a week to get their paychecks, if a bill introduced in the state legislature March 23 is passed.

"My constituents complains that so few professors teach anymore, their kids can't get into required courses," said state Rep. Bob Larson, a former college administrator himself, at a press conference explaining his bill.

"Some students have to stick around five years or more to complete what's supposed to be a four-year program," he said.

"Meanwhile, their professors enjoy gobs of free time for research and consulting," Larson claimed professors at the main University of Wisconsin campus at Madison teach an average of six hours a week.

"He just has no conception of the way in which a university professor's time has traditionally been divided between teaching and service," replied James Donnelly, a history professor at the Madison campus.

Donnelly contended that professors who are not working on a research project at any one time do in fact teach twelve hours a week.

He agreed "there is a concern in the country right now about the quality of education. Larson has decided there is a simple solution to this complex problem. I think his bill will sink to the bottom of the sea."

Freeze Frame

What new or expanded student activities would you like to see on campus next year?

Nicki Miller
Sophomore
Psychology

“I’d like to have more comedians on campus. The ones they have are really good. I just want more of them. Also, more campus-wide things like the Air Jam. That was fun.”

Erik Davies
Freshman
Undecided

“T’d like to see more of the types of movies which come to the Knickerbocker. I also wish there was a mission group which worked in the community and could have a positive impact in Holland.”

David Merchant
Freshman
English

“I think there should be more events that are directed toward students that aren’t Christian, and more activities that aren’t Christian oriented. More ‘pagan’ activities so to speak. Also I’d like to see social issues addressed from not just the Christian perspective but from other worldly perspectives.”

Amy Gump
Sophomore
International Studies-French

“I think it would be fun if the college could organize more ‘theme’ dances, like the Maaasquerade, because after the first few dances they fizzle out otherwise. But it’s hard to start a new tradition.”

Sara Cripps
Freshman
Undecided

“I think we need more activities that involve the whole campus. More campus events like formals and dances.”

Student Congress Petitions Due Friday

The offices of President, Vice-president, and Comptroller must be filled for next year.

Petitions are available in the Student Congress Office and in the Student Development Office.

Please pick up both the petitions and an information sheet.

Return the completed petition to the Student Congress Office by Friday, April 14th.

Applications available in the Student Development Office --due April 14.

Dorians take home money

by Jim Monnett
anchor entertainment editor

Topping Air Jam for the second year in a row, the Dorian sorority walked away with a $100 prize for their version of Morris Day and the Time's "The Bird." The Hope Hillbillies took second with a down-home lip sync of "On the Cover of the Rolling Stone."

Earl Reed, a college circuit comedian, emceed the show with a relaxed, spontaneous humor that kept the near capacity audience doubled over with laughter. Reed's opening monologue touched on subjects ranging from air travel to tulips to prejudice and repeatedly to the feared lake effect. His jokes were current and often right on the funny bone.

Between each act Reed came on and performed between five and ten minutes of material. It was a pleasure to have a comedian who didn't use the performers for his material. Unlike Rondell Sheridan's continuous abuse about the performers and the college at the All College Sing, Reed showed respect for the performers who he said "must already feel like idiots to be doing this stuff in front of all of their friends."

The Dorians won the Air Jam with good choreography and the sheer number of people. As four girls played the band, the Time, the other members moved slowly on stage in costumes as different stereotypes of girls including overweight girls, rich snobs and the black-clad smooth dancers. By the end of the number the whole sorority was moving as one through the dance steps.

The curtain opened on the second place finishers, the Hope Hillbillies, as they all bounced around some bales of hay. Slowly they all awoke and stood up to "play" guitars and bass to Yankovic's "Polkas at the Wheel." It would have loved to see some groups up on stage just having fun like these guys did it was obvious that they hadn't had all the practice that the Dorians had, but it's spontaneity was fun.

It would be great if more groups of people would put together an act even if they feel they can't compete with class choreography and a lot of people.

The last act of the evening was the Centurians calling themselves No Common Cents, they performed an ensemble piece to "Has Anybody Seen My Dog." The number was as good as far as it went, but it was a letdown for those of us who remember last year's excellent version of R.E.M.'s "It's the End of the World." The action was confusing, but I did like the flying dog as two people tossed it back and forth behind the back teasers.

Overall Student Activity Special Events committee is doing a fine job with shows like this, Air Jam. The comedians are funny, and the shows move along without much dead time. Now we could only get some more acts for next year, we'd have a real good show.
DJ's for local radio stations WKLO and SUNNY-FM and a respiratory therapist from Holland Community hospital judged the show.

Second place went to the "Hillbillies" who lip synched to "On the Cover of the Rolling Stone."

Earl Reed, a comedian, emceed the Air Jam. He proved to be a man of many talents, here taking pictures with a camera belonging to an audience member.

Milestone is 'worth the wait'

It took a lot of time to print, deadlines were missed, staff positions changed hands and all in all, the Milestone yearbook has gone through some tough times. But when it's all said and done, the current staff as well as those who worked on the yearbook in the interim have to be commended for a job well done.

From front cover to closing credits, the Milestone - appropriately subtitled The Student Voice - has handled all the problems that occurred over the past months, everything somehow came together. And even though there are always incorrect names or spellings in photo identifications, the Milestone hasn't lost its credibility.

The current staff, too, is working hard, as evidenced by their long hours in both the office and the darkroom. Though it was apparently a difficult task to choose an editorial staff, the Milestone seems as competent as ever. The 1989 Milestone looks great, and chances are the 1990 book will too.

Even so, we hope that this year's editors and staff will do their best to pass on their skills to next year's Milestone staff. The yearbook may look good now, but only through developing a strong staff for the future will it continue to progress. We earnestly hope that care will be taken in producing the Milestones of the future, even though deadlines and other obstacles may seem overwhelming.

The 1989 Milestone yearbook appears to be professionally done, and seems to live up to the staff's statement on posters around campus that this is "the best yearbook the college has ever had." Even though it lacks a comprehensive index or table of contents, it is definitely a keepsake. The entire Milestone staff, past and present, are to be congratulated - it was definitely "worth the wait."

MARY TAYLOR

It is about this time that the college senior feels alienated from her fellow classmates. In April, underclassmen are faced with problems like getting summer jobs and wondering if they registered for the right classes. For the senior, the whole future is up in the air.

The whole future. No wonder she has trouble doing homework and concentrating in class. Putting matters in perspective, the manifestation of two types of humor in the writing of Mark Twain seems pretty darn unimportant.

Instead of living to see the weekend, the college senior lives to meet the mail carrier. Daily she runs to the mailbox to see if possibly today her future has been determined. Phone bills at this time increase dramatically as do stress levels.

Resumes, cover letters, follow-up calls. The fifth thank you stating why your company really should hire me. Graduate school applications. Weeding through stacks of university propaganda and still sending for additional information. Considering pros and cons. More phone calls. Taking the GRE. Trying to keep all options open. Retaking the GRE.

Thinking about homework every once in a while. Having difficulty remembering which Shakespearean play we're on. Finding it amazing to think that it will all be over on May 7th and that I have no idea where I'll be sleeping that next night. What I'll be doing this summer, or what in the world will happen come August.

"Commencement is not an end, but a beginning." Of what? "Graduation from college is the first day of the rest of your life." But what in the heck is the rest of my life going to be like? Where will I be? What will I be doing?

It all is, at this point, up in the air. I am quite sure what I'll be doing, but it could be virtually anywhere - Boston, Minneapolis, Bloomington, De Kalb. Kind of exciting. Also darn scary.

Lately I've felt kind of like Hamlet. So wound up in deep contemplation of Shakespearean drama. Spent a lot of time mulling over the idea of the way things will be going after graduation. What? Where? Why?

Letter to the Editor

Student believes coverage was lacking

Dear Editor,

On March 9, 10 and 11 the students and faculty along with the city of Holland were once again invited to explore and enjoy dance and its many forms through the Dance Department here at Hope. Perhaps with this being an annual concert that is produced by the department each year, it is easy for you, The Michigan Chronicle, to pass over this event. After all, you are only reviewing this production in your paper.

While the students, faculty, and even the community seem to appreciate and support this excellent program by filling the auditorium each performance, I am surprised by your lack of interest in something that many Hope students and faculty are involved in. While you did have a few paragraphs on this event, there were no reviews on a concert of great artistic value and one of Hope students' major productions of the year.

Coming from another small community here in Michigan, I can certainly appreciate the aesthetic skill and enchantment of these dancers created and would look forward to reading the reviews in my night all about these events. Unfortunately, where I live, Big Rapids, we do not have this opportunity to study and enjoy dance as Hope College and Holland residents do.

The fact that Hope is 1 out of 2 colleges in Michigan that has an accredited Dance program is something to be proud of, and perhaps even boasting a bit wouldn't be out of line for you. For me, I think it is worth the 180 mile round trip, commuting three times a week to be part of this department, and I for one appreciate their artistic efforts this year with Dance 15.

Sincerely,

Babetta Davids
Non-traditional student
Dance Major

Editor's note: Prior to the concert, the anchor ran several articles on Dance XV, including two in-depth features on performers in the concert. Afterwards, we ran a photo spread, making Dance XV the most widely covered event during the school year.
Musicale in GR features all Hope music groups

by Mpke Okista
anchor staff writer

At least 400 students entertain-people who gathered at De Vos Hall in Grand Rapids on Wednesday, April 12, for the first Hope College Musical Showcase, according to Robert Floyd, a music professor and one of the organizers of the event.

The group featured the Musical Showcase were Chapel Choir, College Chorus, Collegium Singers, the College’s Orchestra, Jazz Ensemble and several quartets, quintets, soloists and several small ensembles.

"It was great to see all our ma-

jor choirs perform at the same
time under one roof," Floyd said.

Floyd said that the program was put together specifically for the Hope’s alumni and also for people who want to know about the music department.

"The Showcase was tailored for people interested and those who have graduated at Hope College," he commented.

"Because of the success of the Arts and Humanities for High School Students Mini-Musical Showcase held last year, we thought that it would be good if we brought together all the ma-

jor choirs and groups to per-

form," Floyd said, "and have an opportunity of being heard by a lot of people.

Kristin Large, a junior at Hope and one of the soloists, said that the choice of De Vos Hall was ideal because it gives everyone a chance to perform in a place that has enough space and "carries well."

"The solos were superb," she said. "Everything moved smoothly from one end to the other, and I was very impressed."

Like Large, Emily Baker, who slaved in the orchestra, said per-

forming in De Vos Hall was an experience in itself.

"The bad part is that we had to wait for seven hours because we had to be in Grand Rapids before the show. Other than that, everything went well," Baker said.

Terry Bush, who was in the College Chorus, said that it was good because the “music department had a chance of showing what they were doing.

"Everything was worth the time and all the effort put into it," she added.

Robert Thompson, director of the jazz studies program at Hope College, said that it was surprising to see the quality and diversity of music our students have.

“We have never had different performing groups on one stage. As a result, I didn’t know that we had such a diversity. I was amaz-

ed," he commented.

Thompson wrote “Divi Sam-

ba,” which is recorded by the Mak Recording Company in New York, and will be available in cassettes, records and discs.

Thompson said that the art department did the cover and Jack Ridi of the Hope College English department wrote a poem for it.

"Dead Bang" dies a slow death from bad editing

by Jim Monnet
anchor Entertainment Editor

"Dead Bang" wants desperately to be the action vehi-
cle that cashes in on the novelty of the "Miami Vice" name. Unfortunately, the movie not only comes a year or two after Vice’s peak but it also seems to have been edited during some-

one’s lunch hour.

Don Johnson plays Beck, a homicide detective who has just received a restraining order from visiting his children, which is intended to protect him from his wife, a jealous, jealous, jealous, jealous, Though similar to 'Aliens,' 'Leviathan' worth the money

by Jim Monnett
anchor Entertainment Editor

Not since "Die Hard" has a movie with so few redeeming intellec-tual virtues been so enjoyable. The undersea horror movie "Leviathan" does its job and entertains without pretending to be more than it is.

The story involves six miners experiencing stir craziness on the 90th day of their 90 day shift 10,000 feet below the Atlantic in an underwater habitat. While working in a Jimmy (underwater suit) Sixpack (Daniel Stern) discovers a sunken Russian ship called the Leviathan. Soon the mandatory creature is within the habitat and the crew must battle the limiting environment, the crew, but is known to the audience Pays continually jogs around the metal passage of the hallway. The inevitable attack is always just around the bend.

The cast is led by Peter Weller of "Robocop" and "Shakedown" fame as Beck, a geologist who for mysterious reasons that he doesn't even understand has been assigned to lead the mining crew. In the early parts of the movie, Beck is shown to be a poor leader and disciplinarian. He feels cut off and separated from an innovative leader. Though it's obvious that a theme is that heroes aren't born but made, Weller keeps Beck human with failures up to final scene. He never becomes the superwoman that Sigourney Weaver portrays in the sequel "Aliens." Beck remains human as he deals with his fear and the necessity of the situation.

Where Beck plays the Weaver role, Richard Crenna (the Rambo movies) plays the doctor role which after "Alien's" evil android doctor puts Doc in a bad light in the audiences mind. Doc is a static character whose mysterious past makes the audience's distrust of horror movie doctors all the more vibrant.

Crenna plays up the audiences fear even as he fights with Weller against the Leviathan. The director, George P. Cosmatos, skillfully manipulates the audiences distrust of horror movie doctors to help build the suspense of the movie itself. Cosmatos use of Doc in this manner shows his indebtedness to the conventions established by "Alien."

The crew members turn in believable performances even if they are just serving as monster chow. Ernie Hudson, Micheal Carmine and Hector Elizondo as DeJesus are annoyingly familiar, but without the name recognition that Weller and Crenna have. Since they are already familiar having been in minor roles in many roles the audience has an affinity for them so that their deaths matter enough for us to fear the death of the next one. One unfamiliar cast member Amanda Pays who plays Weller's love interest was a pleasant surprise. Before the Leviathan is discovered by the crew, but is known to the audience Pays continually jogs around the metal passage of the hallway. The inevitable attack is always just around the bend.

The other star of the movie of course in the Leviathan itself. Its connections and implications relative to genetic alternations is thought provoking and frightfuly plausible. As it develops and grows it mutates into a gross monster that is a lot scarier than the average puppet like creature in lesser horror movies.

In its final ode to "Alien", "Leviathan" contains a gross out of comparable nausea to the spaghetti dinner scene in "Alien. Cosmatos maintains the camera on the scene a second longer than you would like, but long enough to ruin the momentum of the movie. Its effective if not tasteful.

Which could of course be applied to the whole movie. There isn't much new ground beyond Weller's development into a hero, but the old ground is well worth the money under Cosmatos' crisp editing and direction. The movie moves fast and is a good time.

"Leviathan" is the characterization. The characters may not all be the ideal three dimensions, but the three main characters grow, think, and develop through the movie.

Thought the story obviously contains many elements of the new classic "Alien" including the limiting environment, the profit-hungering corporation, the expendable characters and the parasitic creature. "Leviathan" deserves to be judged on its own merits.

Its biggest merit is that it scares people. The beginning underwater sequences keep you low in your seats and anxious. As Sixpack and Lisa Eilbacher walk around underwater and in the sunken ship every fish is a possible monster. You know the "Leviathan" is around, but you have no idea of what shape the creature will take or how it'll appear.

The other big merit of "Leviathan" is its characterization. The characters may not all be the ideal three dimensions, but the three main characters grow, think, and develop through the movie.

The beginning underwater sequences keep you low in your seats and anxious. As Sixpack and Lisa Eilbacher walk around underwater and in the sunken ship every fish is a possible monster. You know the "Leviathan" is around, but you have no idea of what shape the creature will take or how it'll appear. The other big merit of "Leviathan" is its characterization. The characters may not all be the ideal three dimensions, but the three main characters grow, think, and develop through the movie.
Baseball struggles in pre-season

by Scott A. Kaukonen
anchor staff writer

The Hope College baseball team is off to a good start in MIAA competition following a rough Spring trip and a cold reception upon returning to Michigan. Hope opened the MIAA season last Wednesday against Alma. The Dutchmen won the opener, 5-1, before dropping the next two, 0-3 and 3-2. The Dutchmen came home Saturday to face Kalamazoo, winning the first game, 4-3, but losing the second, 0-4.

The Dutchmen have struggled in the pre-season. They had finished their spring trip with a 5-9 record, having met some tough competition down South. The return to Michigan brought a pair of double-headers with Division II schools, Grand Valley and Ferris State. After being whitewashed, 12-0, by Grand Valley, the Dutchmen began to pull their act together. However, they lost the second game to Grand Valley, 4-2, and both to Ferris, 4-3 and 4-1.

The Dutchmen kept their heads up and their eyes on the eventual third-rival, Kalamazoo, 7-2. The Dutchmen have struggled at the plate. Through the first 19 games, they are hitting only .246. Opponents are hitting .306, an average which has dropped from .328 only six games ago - an indicator of the recent strong pitching of the Dutchmen staff. The Dutchmen are also only producing an average of four runs per game.

The hitting attack is led by senior shortstop Tim Peterson. Peterson is hitting .404 with a slugging percentage of .596. No other Dutchman with more than twenty at bats is hitting better than .300. Peterson also leads the Dutchmen in runs scored with 12. Ted Toole and Steve Dieterle lead the Dutchmen in RBIs, each with eight.

The Hope pitching staff is led by sophomores Vic Breithaupt and Seth Parker. Each has two wins to his credit and with a little luck could have more. Parker pitched especially well in his last three outings, including a complete game three-hitter against Alma. Breithaupt has provided strong efforts, particularly in his last two appearances. He lost a 3-2 decision to Alma and then held the Dutchmen to a hitless run on five hits in Saturday's second game. Breithaupt leads the staff with 23 strikeouts. Junior Dan Klunder has credit for the team's other victory, and senior reliever John Visser has the team's lone save.

The Dutchmen hope to be competitive in the MIAA. If they are to do so, they must play steady ball. According to Parker, "we took our lumps (pre-season), but the MIAA is a new season and our goal is to win the league. We know we can beat these teams."

The team must awaken their bats Saturday at 1 p.m. The Dutchmen hope to contend for the title, they will have to continue in MIAA - where their goals are. Strong pitching performances from a young pitching staff and an improving defense have keyed the Dutchmen's opening MIAA week success. If the Dutchmen hope to contend for the title, they will have to continue in these departments and perhaps most importantly, hit well.

Tennis finishes second in GLCA

by Bill Meengs
anchor staff writer

Hope College lost to Keyon College 6-3 in the finals of the GLCA tournament held here over the weekend.

The title is Kenyon's third since the tournament began eight years ago. Kenyon came into the tournament as the number one seed, while Hope was the second seeded team.

The tournament was important, as several of the participants are vying for berths in the NCAA Division III nationals to be held May 8-13 in Claremont, Calif. Hope, which was the top ranked team in the nation in a pre-season poll, helped its chances earlier this week by defeating their main league rivals, Kalamazoo, 7-2.

Hope got to the finals by defeating Oberlin College in the first round 7-2. In the semi-finals, Hope defeated eventual third place finisher Denison College 7-1. Kenyon defeated DePauw 9-4 and Kalamazoo 7-2 on their way to the finals.

Hope's victories in the finals were earned by senior All-American Colleen Sandro at number one flight singles, sophomore Kathy Land at number four flight singles, and the number one doubles team of Sandro and junior Dani Zurchnaver.

Sandro's play was impressive. As her three sets 2-6, 6-3, 6-4 victory at number one doubles with Zurchnaver, she still had enough to come back and play a gutsy 6-4, 2-6, 6-0 victory at number one singles. Particularly impressive was the third set of Sandro's number one singles match which she won 6-0. Sandro's Kenyon opponent, Julie Kippa hit many outstanding shots, but Sandro continually had an answer with a shot that was just a little better than Kippa's.

Land was also impressive in her 6-0, 7-6 (7-2) win at number four singles. The team played a good match, as most of the flights were closely contested.

The loss to Kenyon is the team's first since a pre-season 6-3 loss to Ferris State University. Since then, the team had gone 9-0 (including the two early round wins at the GLCA tournament) which included a 4-0 mark on their spring trip, and a 2-0 mark in the MIAA.

HOLLAND - The appointment of Susan Wise as women's basketball coach at Hope College has been announced by Anne Irwin, director of athletics for Hope.

Wise, a member of the Hope physical education department faculty since last fall, will succeed Terri McFarland who has been the women's basketball coach for four seasons.

"We are very grateful to Terri for her many contributions to our athletic program," said Irwin. "In addition to developing a successful basketball program, Terri has been an outstanding role model to our student-athletes."

Irwin noted that the decision to make the coaching change has been extremely difficult because of McFarland's dedicated service to the college and her players.

"The physical education department philosophically has been committed to providing every student sport whenever possible a coach who is a fulltime Hope College faculty or staff member. We feel this philosophy provides the best long-term to our student-athletes," said Irwin.

"Last fall the college increased the number of female faculty in the physical education department to four with the addition of Wise.

McFarland teaches mathematics at Hope College School where she also served as girls' basketball coach prior to coming to Hope. She was an assistant coach at Hope prior to accepting the head position in 1986. Her Hope teams had four consecutive winning seasons, compiling a 64-32 record while finishing in second place in the Michigan Intercollegiate Athletic Association (MIAA) standings each year.

This year Wise served as varsity assistant women's basketball coach, junior varsity coach and is assistant women's tennis coach.

"We are fortunate to have a person of Sue's caliber on our faculty," said Irwin. "We are confident that she will be able to sustain the mark of excellence placed on our women's basketball program by Terri."

Wise was an outstanding high school and college basketball player. She was the first female to win the Dutchmen's staff.
Massey makes big splash in Scotland

by Beth Pechta
anchor associate editor

Hope swimmer Lynn Massey has made a big splash in Scotland. Massey, a junior, is spending the year studying in Aberdeen, Scotland and joined the swim club there. Massey has been swimming very well and was invited to participate in last month's national swim competition.

According to Massey, "We swim throughout the entire year and have had about six dual meets." The swimming is much different in Scotland than at Hope as the smaller sizes of the pools there force the swimmers to swim abbreviated lengths. "Our pool, in fact, is a four-lane 20-yard pool with a rope with cork as lane markers," said Massey.

Another difference, said Massey, is that the women on the team swim at most 100 yards or meters. Scottish swimming does not produce the intense competition seen in the United States, either. "It's really laid back with no coach, but an organized captain," said Massey about the swim club. "Our swim 'galas' take about 1/2 hour then the other team and us go to a pub and get to know each other."

In February, Massey swam in the "Scottish Universities" meet, which pitted eight of the country's schools of higher education against other. Massey likened the event to a conference meet at Hope. She anchored the 4x50 meter free relay to win the gold medal and then swam the 50 meter free and won fourth place. Because she swam so well, Massey was selected as one of 30 swimmers to represent the Scottish Universities in a national competition against England, Wales, and Ireland.

Massey and two other swimmers from her team went to London by train for the meet, held March 3. According to Massey, the meet was held in an eight-lane pool with a Colorado timing system. Her relay team ended up second behind England and she again won fourth in the 50 meter free. In all, the performance was good enough for their team to place second overall, behind England.

Softballers still perfect (6-0) in MIAA

by Bill Meengl
anchor sports editor

Having to find new starters at just about every position has posed a difficult challenge for Hope softball coach Karla Wolters. But after a tough spring trip which saw the Flying Dutch go 2-10, Wolters has them off to a flying start for the MIAA season.

The Dutch are 7-3 overall since their return from the spring trip and have a sparkling 6-0 record in conference play. Hope's most recent victories in the MIAA came last weekend when they swept a doubleheader from Albion by scores of 11-1 and 3-0. The Dutch started this year coming off the winningest season in Hope history, posting a 22-11 record while finishing third in the MIAA. After a fast start, the Dutch were soon ranked first in the Great Lakes Region and as high as fifth nationally among NCAA Division III teams. A mid-season seven game losing streak killed the team's chances for playoff consideration, but they finished strong, winning five of their last six games.

Hope lost two All-MIAA pitchers from last year's team, Rhonda Buchanan and Barb Gras. These two accounted for 26 of Hope's 22 victories last year. In fact, only one starter returns from last year's squad. This year's captain, centerfielder Dianne Brown, is a three-time All-MIAA performer. Brown has also been voted to the All-Midwest region team the last two years. Brown has a .326 career batting average and owns the Hope record for hits in a season (37) set last year. She is the only senior on a roster that includes five freshmen, seven sophomores and four juniors. Other returning letterwinners on the team are sophomores Anne Berens, Lisa Beyer, Jackie Krombeen, Britt Lindfors, Eileen Maikewitz, Shelly Venema and juniors Julie Fritz, Kelly McEvoy, Susie Renner and Sue Robbert.

Hope's next game is today against last year's league champion, Calvin. Their next home game is Saturday, April 22, against Olivet. Game time is 1 p.m. and all home games are held at the team's own field, located at the Buys Athletic Complex.

Congratulations to Bryan Young

WTHS-Point West DJ of the week!
Listen to WTHS 89.9 FM for a chance to win 2-for-1 entrees to Point West.

What are you doing between 9:30 a.m. and 11:30 a.m. on Friday, April 21?

We need students interested in representing Hope College to give campus tours to prospective students visiting on Junior Day. No previous experience necessary - we'll tell you everything you need to know!

Please call Suzanne in the Admissions Office for more information. (x7850).

What are you waiting for?

Other returning letter winners on the team are sophomores Anne Berens, Lisa Beyer, Jackie Krombeen, Britt Lindfors, Eileen Maikewitz, Shelly Venema and juniors Julie Fritz, Kelly McEvoy, Susie Rensperger and Sue Robbert.

Men's Tennis - Hope's men's tennis team went down to defeat Saturday at the hands of Kalamazoo. Hope lost the match 8-4, with the number 1 doubles team of Spencer Helmbrrecht and Dirk VandePoel earning the lone Hope victory.

Women's Tennis - The Flying Dutch finished runner-up to Kenyon College at the Great Lakes Colleges Association tournament held here over the weekend. The Dutch used victories over Oberlin and Denison in order to make the finals.
Correction
The information included in last week's anchor editorial stating that RA group sessions were not held until after spring break was incorrect. The anchor apologizes for the error.

Spots
cont. from p. 10
issues that I'm having trouble just relating. Even passing people on the hallway to class and getting food in Phelps is hard. Please don't talk small talk. An innocent conversation-making question at the wrong moment could still generate a flood of tears and I don't think you really want to hear about it.

Funny though, when one speaks to another an instant bond is formed. Something about being a senior provides one with a keen understanding of what others are going through. Despite the fact that one is choosing among graduate schools and the other interviewing for jobs and looking at apartments, senior meeting senior allows both the opportunity to empathize and encourage.

I just want you professors and underclassmen to realize that when the college senior doesn't seem very attentive in class and when she responds to a greeting with "I've been better," it is because there is a whole lot going on in her life that you don't know about. And if you don't really know where she's coming from, well, she doesn't really know where she's going.

On the Write Track
Proofreading makes perfect papers

Do you have a few papers to write in the next two weeks? If so, you should be aware of the errors that students frequently make in their writing. Below is a quiz highlighting the errors I see most often as a writing tutor at the Academic Support Center. Proofreading your own papers to eliminate these problems will help you improve the quality of your writing.

See if you can identify what is wrong in each of these sentences.

1. Wrong. A series of equivalent ideas should be presented in equivalent grammatical form.
Revised: Parallel construction can give an essay coherence, a paragraph direction, and a sentence rhythm.
2. Wrong. They're a contradiction for they are; their is a possessive pronoun.
Revised: They're both excellent students.
3. Wrong. This sentence fragment is the result of a subordinate clause.
Revised: He crashed his moped, which means he will be walking to class from now on.
4. Correct! Be careful though. You're and your are often confused (see rules for they're and their).

5. Wrong. Data is plural. Try substituting facts or results if you are unsure.
Revised: These data are inconclusive.
6. Very Wrong. Its is the possessive pronoun and it's is the possessive pronoun. And if you don't really seem very attentive in class and because there is a whole lot going on in her life that you don't know about.
Revised: I'll drive to the Dow Center. It's too far to walk.
7. Wrong. Affect is a verb meaning "to influence;" effect means "to bring about" or "result."
Revised: The grades I get at Hope College could affect my plans for graduate school.
8. Wrong. Then is an adverb indicating time and than is a conjunction which indicates a comparison.
Revised: I liked Washington, D.C. better than New York City.

Proofreading carefully with these mistakes in mind will improve the quality of the papers you turn in. If you would like more help with writing, contact the Academic Support Center and set up an appointment with a writing tutor. It's FREE!

Writefully yours,
Kristi J. Pearson
Academic Support Center

7. Wrong. Affect is a verb meaning "to influence;" effect means "to bring about" or "result."
