## HOLLAND WILL MAKE MONEY ON PAVING

LOWEST BID IS \$4.1 A SQUARE  
FOOT LESS THAN LAST  
YEAR

It Would Appear That This Is  
The Year To Pave Tenth  
Street

Holland was filled with paving contractors, sand and material men, at least 50 of them, anxiously awaiting the award of the contract for four of Holland's streets, namely all of 15th street, West 16th street from Central to Washington Blvd., East 17th street from Central to Columbia (which will complete that street) and all of Graves place which is only one block long between the park and the college campus.

There were four bidders and K. B. Olson, the man who has paved many of Holland's streets, was the successful bidder in asphalt pavement which the Council selected. The streets will be paved on the same basis as other streets have been paved during the past few years.

Mr. Olson has a little the inside track, since the greater part of his plant for paving is right in the city, he knows the needs of Holland streets, and considerable expense is already saved, since he does not have to organize his forces. But even at that Mr. Olson had a narrow squeak on the contract, being only a trifle lower than at least two of the other bidders. The bidders were K. B. Olson—\$79,108.55; Andrews Asphalt Paving Co.—\$81,031.34; Globe Construction Co.—\$82,699.10; and Municipal Contg. and Supply Co.—\$99,951.80.

There was also a bid in for concrete from Marsman & Taber, but the price was considerably higher than for asphalt, and the council could not see its way clear to consider the bid.

There is considerable discussion from year to year relative to concrete pavement, some aldermen contending that it is more durable. While this might be true on business streets, it is well known that the asphalt is less noisy and holds the dust better and therefore is more desirable on residence streets where traffic is not so heavy.

It is estimated that the cost this year is 65 cents a running foot less than last year, which is a tremendous saving and judging from the number of contractors present they seem to be hungry for business.

It would appear that this being the case it would be profitable to the city and the residents on 10th street to also have that street paved this year as far as this is practical, at least from Maple street east. Sixty-five cents a running foot on a paving contract is a mighty good interest on an investment, and with much labor unemployed, this condition in a measure would be alleviated in Holland.

### COUNCIL NOTES

JUDGE CROSS SENTENCES SIX CONVICTED PRISONERS

Wednesday was sentencing day at Grand Haven and justice was meted out to six convicted men tried on different charges. Philo Way, Jr., of Zeeland, a lad of 18 years, pleaded guilty to stealing chickens last summer. Judge Cross put him on probation for 3 years on condition that he go to jail for 60 days, pay the costs and after his release, he go to the farm and work. Staying out late nights in bad company was his downfall. Attorney Fred T. Miles was appointed probation officer.

Floyd Ernst of Grand Haven, a married man with a family, was sent to jail for 60 days being charged with indecent exposure.

Mr. Wagner of Grand Haven convicted on a liquor charge, was given a fine of \$100.00 and costs and also 6 months to 1 year in Ionia prison. Wagner claimed to be transporting the liquor for another party but failed to name the party.

Frank Ott, Grand Haven, was sent to the county jail for 90 days paying costs and fine of \$100.00, being convicted of driving while intoxicated. It was shown that the man was so drunk he did not know who picked him up.

Reindert Vos of Bradley, formerly of Holland, conducting a garage on 16th street and River avenue, was tried at Grand Haven for transporting liquor. Vos at the trial claimed he purchased liquor of John Hulst of Zeeland township, at least a gallon of it, and he says after drinking the moonshine he almost went blind and could not see the cars coming in his direction. He was arrested by Deputies Beekman and Huizinga for possessing and transporting liquor and could have been taken on a second charge of driving while drunk. Vos was fined \$100.00 and costs and sent to the Ionia prison for 6 months to 1 year.

Upon the advice of Vos the place of John Hulst was raided and 75 gallons of mash, and six gallons of moonshine were found. The officers say it was an innocent looking place and no one would suspect that the Hulsts owned a still.

After the officers had departed, it came out in the trial, Hulst quickly fed some other mash that had been secreted, to the hogs and the hogs first got gloriously drunk, and then laid down and died. Not a hog that roared into the mash lived to grunt the tale.

Hulst was fined \$100.00 and costs and will keep his pal, Rien Vos, company at Ionia for 6 months to 1 year.

**COUNTRY VS. BIG CITY IDEALS**

Without discussing party politics in the least, there is a deeply underlying issue involved in election of a president for Our Country for the next four years.

Considering the so-called political machines which strive for national control and domination, is there not bound up in the issue the distinction arising between the city-bred and the country-bred political ideals?

In other words, has not Our Country found its highest expression in men of the Washington, Jefferson, Jackson, Lincoln, Coolidge country community type of leaders?

Has not our nation turned toward the country-bred type for its highest manifestation of political leadership—the men produced by the smaller communities, rather than those trained in the political life and demands of big cities?

From the congested centers of great cities has been produced a different type of statesmanship, not understood by the masses of citizens, who might be called country-bred. Is not this a real and vital issue on which the American people will divide in 1928?

In the early days of yore On that far off, distant shore, Once a sturdy little band Left their home and native land For a country far away There to worship God and pray Where they would in safety be—America—home of the free!

Proud descendants all are we Of that noble company; For our mother with us here Was a sturdy pioneer. And perhaps she can recall Hearing oft the coyote's call, And at night the wolves' fierce howl And the hooting of the owl.

And perhaps she once has stood Lost alone—deep in the wood, Where no sound came to her ear Save some hunter seeking deer. She can, too, perhaps recall Rude log houses, rather small; How the Indian wigwags looked, How the first rag rugs were hooked, How the human honey bees Sucked the sap from maple trees.

Thus thru hardship, work and fears Our parents struggled many years, And our own prosperity Is a debt we can't repay. But the flaming torch of truth Which they carried in their youth Some day will be ours to bear If we at last a crown would wear.

Brother and grandchildren small Happy greetings from us all, "Tis our wish, we all agree You'll celebrate at eighty-three.

Before stopping his car he would call out \$2.35 worth and Hirdes would know Van denbergh's car would have to be refueled with 10 gallons of gasoline and two quarts of oil. This occurred every time the senator visited Vandenberghs at the lake. Thus the friendship was created.

## THE GAUCHO REALLY GLORIFIED COWBOY

Douglas Fairbanks as The Gaucho which opens on Monday at the Colonial Theatre, is a story designed for the motion picture audiences of the world, according to the statement of the star himself.

In appearing in his fourth role of a robber thief, Doug performs with his usual bravado and daring. He has chosen one of the most picturesque parts of the world for the gaucho rider of the Andean border.

There is the rich flavor of romance in Douglas Fairbanks as The Gaucho and one gets vivid impressions of adventurous pampas life. The story is one of rivalry between a bandit chief (Fairbanks) and a dictator (von Seyffertitz) with his commandante (Vavitch) to seize the riches of a city grown about a shrine where miracles of healing occur. The bandit falls under the spell of a wild village girl (Lupe Velez) and later a fair pilgrim of the shrine (Eve Southern). His treacherous lieutenant (Charlie Stevens) has his force dismissed, and a series of adventures leading to the capture and escape of Doug, and the wild ride of his dusky hordes led by the madcap, and the saving of the shrine girl and her padre protector from the scaffold, contribute toward a real evening's entertainment.

The picture has been directed by F. Richard Jones. The story comes from Fairbanks himself, who got the idea of the shrine while visiting Our Lady of Lourdes in France.

## Shell Motor Oil stands the gaff

Fill up with SHELL MOTOR OIL. Hit the open road... Step on it... Force the car for all it's worth with never a fear or worry about lubrication. Shell Motor Oil will "stand up" and protect your motor every inch of the way.

What happens when you speed? Plunging pistons, a heavy crankshaft whirling in snug-fitting bearings, spinning gears and busy pumps... all driven by a ceaseless roar of explosions... hundreds of revolutions every minute in an inferno of heat.

It takes a real motor oil to stand the gaff... to supply constantly a smooth, unbroken film which completely envelops these flying metal surfaces and keeps them safely apart, but SHELL MOTOR OIL is more than equal to the task, because it is deliberately made for just such service.

The specially selected crudes which are its base... the low-temperature refining process used... the specifications to which it is refined, combine to produce an oil of exactly the right body. It is thin enough to flow freely to every moving surface... heavy enough to come through heat and friction unharmed... a constant protection to your motor and pocketbook.

Obtain your SHELL MOTOR OIL when and where you buy SHELL GASOLINE... SHELL Yellow and Red Service Stations and authorized SHELL Dealers everywhere are glad to render free crankcase service.

### OTTAWA TO BE VISITED BY M. S. C. MEN

WILL DEMONSTRATE SEPTIC TANKS USES FOR FARM SEWAGE

An ever increasing interest in the use of septic tanks for the disposal of farm sewage has caused the agricultural engineering department at Michigan State College to schedule meetings in 34 Michigan counties to show how easily these tanks can be installed.

The department has records where tanks have been in successful use for the past fifteen years. The cost of building is low and little or no attention is required after the installation.

At each of the demonstration meetings, a set of forms for the concrete work of the tank will be built during the forenoon and the concrete will be poured in the afternoon. The forms are made so that they can be removed and used to build additional tanks in the community.

Specialists at the meeting will explain the best methods for constructing the septic tanks, and also will answer questions on the use of concrete for other purposes on the farm.

Ottawa County's turn for demonstrations will come in the late summer or early fall, the schedule states.

HOLLAND AND GRAND RAPIDS CHANGE TIME TOGETHER NEXT WEEK

Grand Rapids does not turn its clocks ahead this year and observe eastern standard time for the summer until midnight on the night of April 14. At the last meeting of the Holland common council it was decided to go hand in hand with Grand Rapids, therefore the hands of the clock go ahead next week Saturday at midnight.

### Dies Inch By Inch With A Jest As His Last Word

TRAMP LINGERS FOR 35 DAYS AFTER BEING FOUND IN GUTTIR

With a jest upon his lips, a man named William Connors, a tramp, finished dying inch by inch, and joint by joint, in the Newark city hospital at Newark, N. J. It took him 35 days. A policeman picked him out of a gutter, dead drunk, Christmas eve. His whole body was frost bitten. At the hospital next day, they asked him his name. He told them. Age? "Forty-two." Address? "Haven't got any—here, I guess." Occupation? "The patient laughed. "Bum," he answered.

They called him "Bill the Bum." He liked it. Doctors and nurses agreed he was the most cheerful patient they ever attended.

Gangrene soon made it necessary to amputate his left arm. His right leg went next. Then, regretfully and apologetically, the surgeons amputated his remaining arm.

Somehow, he continued to live. More than that, he continued to make wise cracks.

"Don't worry, Doc," he said. "When I get out of this joint, I'll make a clean-up. Just give me a tin cup, and I'm a rich man."

But he grew weaker and it became necessary to amputate his last remaining limb—his left leg. Bill, swaddled like a mummy, okayed the procedure.

He was too weak, however, and knew that he was going to die. A nurse asked him if she could light a cigarette for him and hold it while he smoked.

"Don't bother, sister," he said. "There's going to be plenty of smoke where I'm going soon, and I don't need those arms to get it either."

He laughed uproariously: "That's a hot one. Slip it to the doc, will you, sister?"

Half an hour later he was dead. The shades of D'Artagnan and Cyrano de Bergerac, should they wish to visit the grave, can find it in the potter's field.

### DETROIT TO CHICAGO ROAD BECOMES PART OF MICH. ELECTRIC

The Detroit, Jackson & Chicago railway, operating between Detroit and Jackson as a part of the Detroit United Lines under A. L. Drum as receiver, Saturday became part of the Michigan Electric railway lines when John F. Collins of Jackson was appointed receiver. A court order approving the change in receivership was followed by the announcement that the Detroit, Jackson & Chicago railway would no longer be operated as a part of the Detroit United Lines.

Mr. Collins, the new receiver, is vice president and general manager of the Michigan Electric railway lines, serving Grand Rapids, Kalamazoo, Battle Creek, Jackson, Lansing, Owosso, Flint, Saginaw, Bay City and intermediate points.

The new arrangement will give the Michigan Electric railway lines direct entrance to Detroit.

This is particularly true since it comes without a single conference between us. I am thus put under heaviest possible bond to justify this faith and Michigan's demands. As one who believes in independent Americanism, in sturdy constitutionalism, in clean, vigorous Republicanism, I shall try, under Providence, to the limit of my resources. I hope, very humbly, to be of some service to the whole people—any one of whom is welcome at my open door.

This interim appointment puts me under obligation to carry this seniority advantage in subsequent senate sessions if Michigan Republicans desire. I shall be a candidate in the September senatorial primaries and I take this opportunity to express my further gratitude to Michigan friends who have been organizing the past few months with this end in view."

This brings to a head the statewide movement which has been urging Mr. Vandenberg to stand as a candidate in the fall primaries. Complete Vandenberg organizations have been perfected in more than 20 counties and 50,000 names already are on the nominating petitions for the full term. Mr. Vandenberg serves by appointment only until November elections. He will be a candidate for the short term from December to March, and for the long term thereafter.

### ALFALFA SEED CROP IS REPORTED SHORT

The alfalfa seed situation indicated the wisdom of buying seed early, while there is still opportunity to choose from several sources according to the farm crops department at the Michigan State College.

The supply of Ontario Variegated seed is reported to be very short, and this usually is one of the largest and one of the recommended sources for Michigan growers. The supply of Grimm alfalfa seed, one of the most hardy winter and best producing strains for Michigan conditions, also is restricted.

### CONSTANT ROAD TROUBLE TO PARK NOW OVER

LETTING OF CONTRACT IS REMINDER OF CONSTANT FRICTION

The Ottawa County Road Commission did a fine piece of work when they let the contract for a small piece of road between Jenison Park and Macatawa, the contract being let to Kline & Boukens of Spring Lake, with work beginning April 15 on a reinforced concrete highway.

The new stretch will not go around the bend and along the hills like the old dirt road which now meets up with the concrete at Jenison, but will go directly west across the lowland and marsh into Macatawa.

This small stretch of road has been the cause of endless trouble. Practically all of it is just over in the Allegan County boundary line, and the Allegan authorities had little use for the road, since it served mostly Ottawa County people.

It has been maintained in a haphazard way, it always was a wretched road full of holes and water pools, a small narrow bridge and deep sand at the foot of the hills. There also was friction about entering Macatawa.

Anyway this road brought endless trouble and was entirely unfit to take care of the heavy traffic.

There was always a congestion on Sundays and holidays, motorists generally being bottled in for hours endeavoring to get out on busy days.

Now the Ottawa County Road Commission will build its road directly into Macatawa practically along the roadbed of the old Holland Interurban which is nearly all in Ottawa County, and with a loop at Macatawa as is contemplated by the new management, it will work wonders in traffic regulation.

The small stretch of highway will also be two feet wider than usual, which means considerable in an auto jam. Tourists as well as Holland folks naturally will be elated that this much needed road has at last become a fact. The road will be completed before the resort season opens in June. This completes the entire stretch between Holland and Macatawa, which for twelve years has been left unfinished for one cause or another.

GRAND HAVEN REPUBLICANS AID VANDENBERG FOR SENATE

The Grand Haven city Republican caucus adopted a resolution unanimously commending the appointment of Arthur H. Vandenberg of Grand Rapids as United States Senator to succeed the late Sen. Woodbridge N. Ferris and pledged him its support for nomination and election this fall. The caucus also endorsed the administration of Gov. Fred W. Green and pledged him its support for re-nomination and reelection.

Now It Is Time For Arbutus

When water drips from the moisture laden branches of Michigan's jack-pines, April sunshine warms the sandy knolls of the scrub oak country and the earth yawns itself awake from a cold dormancy, trailing arbutus, the state's earliest and best loved wild flower opens its pink buds while the frost is hardly yet out of the ground.

Arbutus blossoms fully several weeks before the other early spring flowers and before the oaks and other trees of western and northern Michigan begin to get their first green leaves. This wild flower can blossom in advance of other wild plants because its buds are formed in the early fall and require only a little warm sunshine in the very early spring to open them.

# GRAND HAVEN URBAN ENTERS DISCARDS APR. 7

LAST CONNECTION OF THAT  
KIND WITH CITY OF  
GRAND RAPIDS

Service on the Grand Rapids, Grand Haven & Muskegon railway will be discontinued Saturday night, April 7, according to L. A. Goodrich, secretary and traffic manager. An order signed Saturday by Judge Fred M. Raymond in United States district court directed the receiver, the Grand Rapids Trust company, to discontinue operations on or before April 8. Additional bus service will be arranged to fill the gap left by the interurban car removal, Mr. Goodrich said.

The order directed the receiver to continue the bus line service and makes possible the later sale of the bus line and franchise subject to court order if conditions warrant. Suspension of service on the interurban will sever the last electric rail line connecting Grand Rapids and Lake Michigan, a line that at the height of its prosperity carried considerably more than 1-000,000 passengers a year.

Opened in 1902  
The interurban was constructed by Westinghouse, Church, Kerr & Co., of New York, and was opened for operations Feb. 20, 1902. It was the first extensive use of the third rail system for the operation of electric interurban cars in Michigan. Thomas F. Carroll and a group of local and outside business men backed the project, Mr. Carroll being one of the first vice-presidents. The first car operated on the road was the Catherine C., named for Mr. Carroll's daughter. In the early days of operation, all passenger cars were named.

Early presidents included: J. E. Hawks and George C. Smith. The latter, a New York man, headed the company in 1906. W. K. Morley was vice president and general manager for some time, finally becoming president, a position which he held for several years. The company was one of the very last in Michigan to succumb to the onslaughts of bus and truck competition and go into the hands of a receiver. The Grand Rapids Trust company was named receiver in July, 1926.

Sidney L. Vaughan, who as vice president and general manager is in charge of operations, came here in 1906 as chief accountant. He later became traffic manager and in 1922 was placed in active management of the line. L. A. Goodrich, secretary and traffic manager, became identified with the company in 1905 as freight agent, later being advanced to traffic manager.

For years after the line was established it carried hundreds of thousands of people back and forth to lake resorts each summer in addition to regular business. It had a considerable freight business connecting with boat lines to Chicago and Milwaukee. A large number of Grand Rapids folk with summer homes at Highland Park used the interurban daily. Hourly service was given during the day. Several

crack trains, the Highland Park limited and the Bankers' limited, were operated.

The peak business of the line came in 1920, according to Mr. Vaughan, when 1,867,467 passengers were carried. The peak month of that year was August when the number of passengers carried was 187,967. The volume of freight business at that time also was large. The line was taken over by the United Light & Railways later the United Light & Power company in 1912, and was sold to a group of local men four years ago.

The line has 43 miles of trackage exclusive of rights over city lines in Grand Rapids and Muskegon which extends it to 51. It has considerable rolling stock, there now being 19 passenger and 20 freight cars owned by the company.

100 BUSHELS OF CORN PER ACRE ... Mr. Orton Zent, of Tippecanoe, Marshall Co., Ind., says: "By the proper use of 'AA QUALITY' Fertilizer in sufficient amounts, I have grown what our county agent estimates will be a 124-bushel-to-the-acre crop, in spite of the fact that this has been a poor corn year. This corn ripened two weeks ahead of unfertilized corn and of fine quality."—October 11, 1927.

EARLY MATURITY AND GOOD QUALITY ... Mr. E. T. Harper, of Sharpsville, Tipton Co., Ind., says: "This season I had the best field of corn I ever raised, and attribute the early ripening and good quality to the use of Horseshoe Fertilizer ('AA QUALITY'). It is a good free drifter, and the strength of same better than other makes I have used."—October 25, 1927.

Five consecutive sweepstakes cups on wheat, two on potatoes and first on beans, barley, oats and soy beans at the Michigan State Fair; two world's championships on soy beans, and two on beans at Chicago in the past three years. I used 'AA QUALITY' Fertilizer on all my crops, and find that they especially fit into my scheme of livestock, sweet clover and a cultivated crop, thereby making a balanced ration for the plants."—October 4, 1927.

\$1,000 PER ACRE FROM ONIONS ... Mr. Roy Baldridge, of Davison, Genesee Co., Mich., says: "This year I used 700 lbs. of Homestead Fertilizer ('AA QUALITY') per acre on my 7 acres of onions. ### Lesson for April 8

#### THE RESURRECTION OF JESUS CHRIST (EASTER LESSON)

LESSON TEXT—Mark 16:1-20.  
GOLDEN TEXT—Because I live  
I shall live also.  
PRIMARY TOPIC—Jesus Comes  
to Life Again.  
JUNIOR TOPIC—Christ Rises  
From the Grave.  
INTERMEDIATE AND SENIOR  
TOPIC—Jesus, Our Living Leader.  
YOUNG PEOPLE AND ADULT  
TOPIC—The Power of the Resurrec-  
tion.

1. The Ministry of Love (vv. 1-4).  
1. By whom (v. 1). Mary Mag-  
dalene, the mother of James and  
Salome. They brought sweet spices  
with which to anoint Him.  
2. When? (v. 2). Early in the  
morning of the first day of the  
week.  
3. Their perplexity (vv. 3, 4).  
They questioned as to who should  
roll away the large stone from the  
mouth of the tomb. To their sur-  
prise they found the stone removed.  
11. The Angel in the Tomb (vv.  
5-8).

Jesus knew that these women  
would come to the sepulcher with  
perplexed and unbelieving hearts,  
so He had an angel waiting there  
to announce to them the fact of  
His resurrection. Note the angel's  
message:

1. "Be not afraid" (v. 6).  
2. "Ye seek Jesus of Nazareth  
who was crucified" (v. 6). This  
threefold designation with marvel-  
ous clearness shows (1) His human-  
ity—Jesus. (2) Lowly residence—  
Nazareth. (3) Ignominious death—  
crucified.

3. "He is risen; He is not here.  
Behold the place where they laid  
Him" (v. 6). These words threw  
light upon His birth, humility and  
shameful death. He who was born  
in lowly circumstances and suffered  
the shameful death on the cross, is  
now the conqueror of death. His  
resurrection gives meaning to His  
death. "If Christ be not risen your  
faith is vain, ye are yet in your  
sins" (1 Cor. 15:17).

4. Go your way, tell His disci-  
ples and Peter" (v. 7). As soon as  
it was known that Christ was risen  
from the dead they were to tell it  
to the disciples. The disciples all  
needed that blessed news, but Peter  
especially, since He had so utterly  
denied Him. What wonderful  
grace!

5. "He goeth before you into Gal-  
ilee, there shall ye see Him" (v. 7).  
Christ had told the disciples that  
He would rise from the dead and  
meet them in Galilee, but their un-  
belief kept them from this blessed  
truth.

#### III. The Appearance of the Risen Christ (vv. 9-14).

These appearances had as their  
object the restoration of the disci-  
ples from their awful failure and  
discouragement and convincing  
them without a peradventure of a  
doubt of Christ's resurrection. Since  
His resurrection was to be the  
central theme of apostolic preach-  
ing, it was necessary that they  
have a certainty of knowledge as  
to this matter (Acts 1:3). The  
fact of the resurrection of Christ  
would be meaningless. Out of the  
ten or more appearances, Mark  
selects three.

1. To Mary Magdalene (vv. 9-11).  
Mary's heart responded to the Sa-  
vior who had graciously deliv-  
ered her from demons. Her devo-  
tion was amply rewarded by be-  
ing first to meet the risen Lord.  
Though her faith was weak she  
went at once and told the story to  
the disciples, but they refused to  
believe.

2. To two disciples on the way to  
Emmaus (vv. 12, 13). Luke gives  
full particulars concerning this ap-  
pearance (Luke 24:13-25). Jesus  
had walked, talked and eaten with  
them, convincing them that the  
Lord had indeed risen.

3. The eleven disciples (v. 14).  
Christ appeared to them while sit-  
ting at meat and reproved them  
for their unbelief. The fact that  
they steadfastly resisted the tes-  
timony that Christ had risen; and  
yet afterward were willing to risk  
their lives in the proclamation of  
this truth proves the genuineness  
of their faith and therefore  
strengthens our faith.

#### IV. The Commission of the Risen Lord (vv. 15-18).

After the disciples were con-  
vinced of the truth of His resur-  
rection, Christ sent them forth to  
"preach the gospel to every crea-  
ture." What a glorious and su-  
preme task this! What a blessed  
issue to those who believe and how  
awful to those who believe not.  
"He that believeth and is baptized  
shall be saved, but he that be-  
lieveth not shall be damned" (v. 16).

#### V. The Activity of the En- throned Christ (vv. 19, 20).

After giving the disciples their  
commission He ascended on high  
and from the unseen sphere di-  
rected their activities. Wherever  
they went He confirmed their word.  
He does the same for His faithful  
disciples today.

## Makers of Beet Sugar Open Meet- ing At Chicago

Manufacturers from nineteen  
beet sugar producing states, rep-  
resenting a combined yearly pro-  
duction of 900,000 long tons of  
sugar, are meeting in annual con-  
vention at the Palmer House, Chi-  
cago, according to Harry A. Aus-  
tin, secretary of the United States  
Beet Sugar Association.  
Under adequate tariff protection  
to domestic grower and producer,  
the United States might eventually  
produce all the sugar it requires in  
the beet and cane fields of this  
country and our insular posses-  
sions, it is claimed.  
At present only 20 per cent of  
the sugar consumed in America is  
produced in the United States.  
The nation's annual expenditure  
for sugar amounts to \$826,000,000.

## RED INK PLAYS PARTS IN SCOUT WORK

Holland Sentinel—The last indoor session of the scout leaders' training course was held in the Congregational church at Hudsonville Friday evening. The men were taught how to use the first safety matches, a piece of flint and steel. Almost all of them succeeded in making a fire by that ancient method, and F. J. Geiger made a fire with the old Indian bow method. This is the use of the slack bow and elm spindle, and cedar bark tinder, the fire being produced by friction. The rest of the group took his word for it. A large table bore an exhibit of scout insignia, such as pins, chevrons and various merit badges. Tools were also on exhibit with which the boys carve their totem poles, various handicraft, implements for doing leather carving, weaving, bead work, etc., and samples of first aid kits to be carried in the field. The meeting was opened by the invocation, led by Prof. E. P. McLean of Hope college, following which the men joined in scout songs and a few yells. Patrol contests were held in making model tents out of paper and silent pantomimes. In the pantomimes the men worked out various kinds of accidents and what a scout would do as first aid. Realism was added to that led by Dr. De Pree's group by the man supposed to have a cut arm having a rubber bulb of red ink up his sleeve. This bleeding was stopped with a tourniquet and his "broken" leg put in splints. Other demonstrations were the rescue of a drowning man and one suffocating in a burning building. The men will meet outdoors in a big session at Camp McCarthy this week Friday in a meeting which will last all afternoon and evening. Richard Van Hoven of Grand Haven will act as senior patrol leader in the absence of Frank Lievens.

## CHICKS FOOD COMPANY COPYRIGHT NOVEL GAME

A concern in Chicago, Ryde & Company, who manufacture Chick foods, have applied for copyright on a very novel and interesting game, called Ryde's Chick-Food Game. This game is simple enough for the children, but likewise interesting enough for grown-ups, for it is not only amusing, but educational as well. The game constitutes a board about 16 inches long by 11 inches wide, likewise a spinning wheel and four metal chickens. The color designate each player. The game takes the baby chick from the time it is born and brings it on through to its maturity, that is, until it is considered a laying hen. One of the interesting features of the game is the penalties which one incurs for doing certain things, such as keeping the brooder too cold, and omitting fresh air, allowing the water to become foul. On the other hand, the reward for such things as protecting the chicks from draught and commencing with good healthy stock. It is these little points which educate a person in the bringing up and raising of their chicks. The game can be secured from Ryde & Company, 5434 W. Roosevelt Road, Chicago, by anyone. All that is necessary is to include ten cents for the cost of packing.

## More Chicks Will Be Chickens when fed

## Ryde's "Startrite" Chick Food

With Buttermilk

The test of life or death occurs for every chick during the first few weeks of its life. If you can raise every normal chick you will be well repaid for your trouble, and make a handsome profit, as losses by death are really double losses, loss of the egg-hatching expense and chick, and loss of the future profit from it if it grows to maturity.

Baby chicks eat very little. A pound of "Startrite" Chick Food will raise a baby chick past the dangerous period. Why take chances? Use Ryde's "Startrite" Chick Food with Buttermilk and raise every normal chick, ordinary proper care being given. It is the one complete food on which you take no chances.

## WHAT IS PERMANENT?

Nothing is permanent but change. The progress of today is the history of tomorrow. Our security of today is but a memory tomorrow. The abundant health which we now enjoy is too often dissipated and lost with startling rapidity. Who is there among us who can say with certainty that he will have health and happiness in a year, a month—yea even when the sun brightens the East on the morrow?

Yet why these sudden changes? What has happened to rob us of the joy of living and put in its place a husk that remains as a burden? Has something invaded the body as we walked along the street or sat all unsuspecting at our tasks? If so, why have we been free these many years or months and suddenly been gripped by this mysterious foe?

To the chiropractor who deals entirely with the cause of disease this is no mystery. He knows that the vital energy which comes from the brain through nerves and upon which every function in the human body is dependent has been interfered with. He knows that some change has taken place in the spine which has produced nerve pressure, all unsuspected by the patient. He has not been attacked by disease as an outside foreign foe. A change has occurred within his body and the only way health can be restored is to correct the condition responsible for the disease. This the chiropractor is trained to do and his splendid record of results is the only commendation he needs and the only justification he has for the public favor which is his.

The chiropractor knows that health is dependent upon the condition of the spine. He knows that air, food, water, and exercise are necessary to health. He realizes the value of a well-balanced mental state, but he also knows that all of these things may be available and illness still exist.

He knows that each and every organ must receive its quota of vital energy through the nervous system and he knows this cannot be supplied if spinal abnormality causes pressure on nerve trunks. His business is to correct such spinal defect and thus permit the natural health within to be expressed.

He knows one thing more than many Chiropractor patients do not know. He realizes the value of a regular examination of the spine. He knows that the health which has been regained through Chiropractic adjustments can be retained by keeping the spine in perfect condition. Every former patient of every chiropractor should visit his doctor once each month as a matter of health insurance. It is far better to keep the spine in good condition and thus be assured of abundant health than to neglect this matter until extensive damage has been wrought.

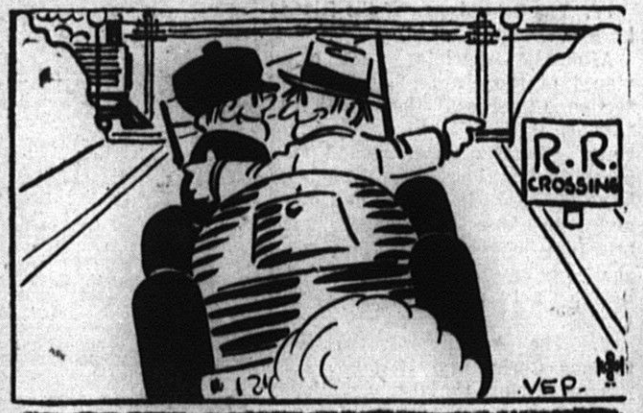

The man whose automobile develops the least trouble is the man who corrects little things before they become big things. The individual who keeps his spine in perfect condition, avoids the serious maladies which, when well developed, are difficult to eliminate. The slogan of every wise person should be to retain their health which has been regained from chiropractic adjustments.
