June term offers
Polish experience

by Pam Lundberg
feature editor

The new June term in Poland "truly is unique in terms of what's going on in human history now," said Dr. Heisler, coordinator of the program.

This "class" can be used for almost any requirement: economics, multicultural, cultural history or social science. The Poland June term is open to anyone. It is a three credit-hour program for three weeks. The cost is approximately $2500 including airfare, tuition, housing and other expenses. The students will be studying economics at the Krakow Academy of Economics. They will be taught by the staff in areas of sociology, history, religion, etc. Professors Heisler and Zajcek will be giving seminars also. "At this time in history, Eastern Europe is changing from a communist society to a market democracy, so people get a chance to see what that means in terms of real people," said Professor Heisler of the Economics Department.

This program is taught from a wide perspective. Therefore, "people don't have to be students of economics to appreciate this," said Heisler. The students will be taken to the Polish Alps, Warsaw and Polish factories, and will be meeting Polish students. They are going to be living in the dorms of the Academy. The program is highly beneficial because "This time won't happen again," said Professor Heisler.

Students must apply at the Business-Economics Department by January 15.
Conservative philosopher Kirk to share knowledge on politics and education

by Scott Kaukonen

Engler upsets Blanchard; Levin breezes by Schuette

by Scott Kaukonen

Engler supporters to the polls.

Wayne county in part due to relatively low voter turnout.

Blanchard may also have been hurt by his own negative campaign tactics, a rare strategy for an incumbent governor. Many voters tired of the mud-slinging and while Blanchard failed to define what he would do, Engler found an issue the voters liked and the door to the upset was open for Engler.

Levin simply never was in trouble. Running a smooth campaign from the start of the summer, Levin ran away from Schuette who struggled to find issues on which to attack Levin. Levin easily outspent Schuette who was unable to raise enough cash and funds he thought he could.

Levin carried all Michigan's most populous counties except for Kent and Ottawa. You can't doubt that Levin is a man campaigned strongly.

In Michigan, there were mixed results.

Democrats won Florida, which has eight congressional seats. Linton Chiles defeated incumbent Republican Bob Martinez in Texas, which will pick up three seats. Democrat Ann Richards, in a muddy campaign, edged Republican Clayton Williams. Republicans did hold on to California which will gain seven House seats, as Senator Pete Wilson defeated former San Francisco mayor Dianne Feinstein.

Long was "surprised at the number of close races -- very surprised that Ann Richards won Texas. But with the redistricting the balance will still remain pretty even."

The most talked about ballot issue before voters was "Big Green" in California, a sweeping proposal that "to reduce cars and other pollutants. Instead it went down to defeat by nearly a 2 to 1 ratio."
Administration postpones new dorm

by Kris Olenik feature editor

You may have heard that Hope was going to build a new dorm and you may be wondering what happened since it was supposed to be started by now. It seems that Hope has adjusted its priorities. The administration put the new dorm on the back burner for a while because of the cost and because it wanted to concentrate on other important issues.

Richard Frost said, "We are interested in building a new dormitory, but when is still the question. I don't know what the timetable is at this point.

William Anderson, vice president for business and finance, said that they "backed away from the project somewhat because of the cost." In order to break even on the project they would have to double the charge for that building or increase room costs across campus, Anderson said. This is not something they want to do.

Anderson said they need to raise some money for the dorm, probably half, in order to put it up. To build a new dorm it costs $22,000 per student living in it, he said. And borrowing money isn't a feasible option because interest rates are so high.

At this point, Anderson said, students would see an increase in fees if Hope were to build a new dorm. They don't want to lay the cost on the students, they'd rather see the dorm pay for itself.

And Anderson also made it clear that they didn't want to subsidize the project with tuition money because that should go toward maintaining and improving the quality of education at Hope. When they raise some money (hopefully through a contribution), they are considering building the dorm in phases which would also help it pay for itself.

In lieu of new dorm at this point, the college bought 10-12 new cottages this last year to create more on-campus living space for approximately 80 students. Most of the cottages are already inhabited by students and a few are still being remodeled.

Anderson said, "The property around the college is valuable to us and buying houses kind of kills the buildings. We want to get more property and please the students. Many students prefer cottage living to dorms and apartments.

For now building a new dorm would be too costly and the administration has put other priorities ahead of it. One of these is financial aid.

Anderson said, "Financial aid is one of our highest priorities we have right now. Our feeling is that students would appreciate that more than a new dorm." The college actually increased the students' financial aid budget this year.

Other priorities include keeping existing facilities up to standard and improving some of them. Anderson said the college spent $100,000 for new furniture and improvements in cottages-something they have to do every year. Also they have spent money for things like computers and other equipment as well as the new athletic fields.

But they haven't forgotten about the new dorm. The architectural firm from Boston that is taking care of the dorm plans visited the campus last year. They met with the administration and students to talk about possible designs. It is in the works because Hope hasn't finalized its statement for the firm because there are details that need to be worked out.

Frost said that they are paying special attention to what types of things they want in the dorm as far as lounge space, recreation space, study rooms, living space (suites, apartment-like, etc.) and bathrooms.

In addition to these details there are other dimensions of the project that need to be considered as well, according to Frost. Things to be considered are the size of the dorm, location, need for the building and expected admissions at Hope in the future.

But Frost said he hopes to be able to make a more definite decision about the project as he becomes more familiar with his position and Hope's needs.

The administration is being somewhat cautious because they want the project to be a success and fulfill the needs of the students. Anderson said, "If we do it, we want to do it right."

'Sojourner Truth' speaks out on slavery, women

(HPHO) - Educator Daisy Belle Thomas will portray abolitionist and Civil War heroine Sojourner Truth at Hope College on Thursday, Nov. 15 at 11 a.m. in Dimnent Memorial Chapel.

The public is invited, and admission is free.

Born in slavery and sold from her parents at the age of 6, the Sojourner Truth was the first notable woman to speak out against slavery. Setting out on foot in June, 1842, she traveled through Connecticut, Massachusetts, Ohio, Indiana, Illinois and Kansas on behalf of her cause. She attended the National Women's Suffrage Convention in Akron, Ohio, in 1863, cared for wounded soldiers and crip-slated slaves during the Civil War, and received a White House audience with President Abraham Lincoln.

Thomas' portrayal of Sojourner Truth is presented as a monologue told in the Black dialect. In character she helps audiences understand the brutality of slavery and the discrimination faced by women of the time.

She holds a bachelor's degree from Stillman College, and a master's degree in psychoanalysis and education from the National College of Education in Evanston, Ill.

Thomas also worked as an educational researcher with the Institute for Research on Teaching at Michigan State University, and is currently an adjunct instructor with the university's College of Education.

Thomas' presentation is being sponsored by the Hope College Chaplains' Office and the Women's Issues Organization.

Local News

Vesper tickets available Saturday

(HPHO) - Tickets for the annual Hope College Christmas Vespers will be sold to the public on Saturday, Nov. 17 beginning at 9 a.m. at the DeWitt Center, corner of 12th Street and Columbia Avenue.

The Vespers will be presented Saturday, Dec. 1 at 8 p.m. and Sunday, Dec. 2 at 2 p.m., 4:30 p.m. and 8 p.m. in Dimnent Memorial Chapel. The 4:30 p.m. performance on Sunday will be signed for the hearing impaired.

Tickets will be $3 each and a limit of four tickets will be sold to a person. No telephone orders will be accepted and tickets will not be sold at the concerts.

The sale will continue until noon. However, the concerts are traditionally sold out so persons wishing to purchase tickets should consider acquiring them as close to 9 a.m. as possible. Vespers, presented by the Hope music department since 1941, has marked the beginning of the Christmas season in the Holland area community for several years.

Participating groups will include the Hope College Chorus, Chapel Choir, Symphonette and Brass Ensemble.

Chem students present research

(HPHO) - Hope College students presented results from their summer research in chemistry at the Pew Undergraduate Research Symposium, held at Washington University in St. Louis, Mo., on Oct. 5-7.

The research symposium was sponsored by the Pew Charitable Trusts to encourage scientific interaction among undergraduate students. The symposium included oral and poster presentations of students' original scientific research. Representing Hope College were junior Chris Briggs of Shelby, Ohio; junior Xin Chen of Shanghai, People's Republic of China; senior Kevin Cramer of Spring Lake; sophomore Ericka Lyszak of Alpena; and senior Darren Young of Fruitport.

Summer camps look for counselors

Each summer, many Hope college students spend a few months working as camp counselors. Interested students will have the opportunity to check out various camps Monday, Nov. 19 from 10:30 a.m. to 3 p.m. at the DeWitt Center.

Representatives and recruiters from more than a dozen camps will be in the Maas Auditorium. Students are encouraged to visit the Chaplain's Office to come and see what opportunities are available and what the application process is for each camp. Many camps will have applications available that day.

If students have further questions, they can call the Career Planning and Placement Office, x7960, or the Chaplain's Office, x729.
More News

Hope strives to produce well-rounded teachers

(ROPE) - Hope College professor Lamont Dirksk could not agree more with the emphasis placed on the importance of liberal education for teachers. He believes the report goes too far in suggesting that professional education courses are of little use.

In the report, "Tyrannical Machines: A Report on Educational Practices Gone Wrong and Our Best Hopes For Setting Them Right," NED chairman Lorraine V. Cherney claimed that a liberal education is essential if teachers are to have a strong, general knowledge that will make them effective. She also noted that teachers should have a strong background in the particular discipline they are to teach and that many professional education programs do not require such a background.

Dirksk, chairperson of the education department at Hope College and a member of the faculty since 1984, agrees with Cherney regarding the importance of a liberal arts education and knowledge the discipline being taught. Dirksk also noted that the commitment of Hope, a liberal arts college, to providing a well-rounded, in-depth education for the teachers it prepares is reflected in its requirements for them.

Students in the education program at Hope are required to take major requirements - at least 30 hours - in non-education discipline they select and must also earn a minor of at least 20 credit hours. In addition, like all Hope College students they must earn the 57 "core" credit hours the college requires in areas such as history, English, the sciences, theology, mathematics and modern language.

"We want them to be knowledgeable-to be able to carry on conversations in disciplines other than their major and their minor area," Dirksk said.

While praising the value of a liberal education for teachers, however, he also stated that the nation's traditional methods of teacher preparation - that have been recognized as "useless" by many people inside and outside the teaching profession. "(Teachers repeatedly speak of) time wasted when they describe their professional preparation. They view many of the requirements imposed upon them as arbitrary and not justified, and analysts of American education have long agreed," Cherney writes.

According to Dirksk, though, many of the Hope education program's graduates do not agree. "For more than 12 years now we have studies in which we ask students who have graduated who are out in the field teaching to indicate the value of the core requirements, to indicate the value of their major and also professional education," Dirksk said. "In the area of professional education we often find that they wish they had been able to prepare for the requirements that we have presently."

Dirksk noted that graduates often state that more courses in classroom management and discipline would be useful. There is also interest in instruction in new teaching techniques and methods. A criticism leveled against such courses by Cherney is that they tend to be abstract, and do not emphasize the practical experience. Dirksk noted that the methodology courses at Hope, however, consistently integrate a field component so that the prospective teachers have an opportunity to apply what they are learning.

The opportunity to gain such field experience in even the introductory education courses, moreover, is one reason Dirksk feels that the education program should be part of the regular liberal arts sequence at institutions such as Hope-rather than provided as the one-year post, liberal arts option suggested by the report. Dirksk said that providing an opportunity to work with children and teaching early on, the program allows them to determine whether or not they enjoy such work.

"My concern is if they leave all the education for the fifth year, I think that's a very costly program for someone who finds out, that he or she does not want to go into education," Dirksk said. "I think that a fair richer experience to do what we're doing, to integrate the teacher education program along with the liberal arts."

Kottke Carrigan emphasized that both the FBI and the CIA are looking for a range of students. "(Students) think if you are FBI, you have to be in law. But that's not true. You can work for the federal government in almost any area."

"(Students) think if you are FBI you have to be in law. But that's not true. You can work for the federal government in almost any area."

-Kelly Kottke Carrigan

Among the majors most appealing to the FBI and the CIA are accounting, computer sciences, engineering, political science, law, foreign languages and the physical sciences.

Students who wish to apply for employment with the FBI or CIA can expect to write a thorough application, provide background checks and interview process. Both also have "very strict" physical requirements, said Austin.

The FBI is looking for juniors (3.0 GPA or better) for summer internships. "We have a better job of working with our local students than we used to," said Frost. The contract is up for renewal in the spring so...
Amnesty International chapter ‘not political,’ more active this year

by Amy Giles
staff writer

"A lot of people think of us as a political organization," said Amnesty International Chairperson Elizabeth Bos (‘93).

She said the focus of the group is not to promote political views but to work for the release of prisoners of conscience, people throughout the world who are imprisoned mainly because of their outspokenness against their government. While in prison, these people do not have access to lawyers and can’t even see their families. Amnesty members write letters and send petitions and telegrams to government officials in those countries asking for the release of such prisoners.

Bos, the Hope chapter, which she joined second semester last year, has about 25 to 30 steady members. The group, according to Bos, would like to continue working on the goals they established when they began a year and a half ago. "We would like to focus on countries like Peru, like we did last year and become more educated about them, write letters and do more fund raising," she said.

As part of their goal to learn more about the countries and the struggle for human rights, Bos and fellow Amnesty International members took a trip to Chicago this past weekend for Student Activism Day. "It brings together thousands of high school and college students from the midwest," she said. Workshops and speakers were presented throughout the day by host Loyola University. A rally was also held in downtown Chicago as part of the day. Workshop topics ranged from fundraising to the death penalty said Bos.

"Just because they may not agree with Amnesty International on an issue like the death penalty, doesn’t mean they shouldn’t get involved."

--Elizabeth Bos

Hope’s Amnesty chapter is receiving more and more recognition said Bos, last spring’s Critical Issues Symposium focused on human rights and brought a lot of attention to the group. "We had a display in the library and also hosted a speaker from Amnesty’s midwest office who was originally from Germany," she said.

"We’d like to bring in a speaker on the death penalty this year," Bos said. That topic is where she sees some apprehension by students. "Just because they may not agree with Amnesty International on an issue like the death penalty doesn’t mean they shouldn’t get involved." In fact, many Amnesty members do not all share the same opinion when it comes to issues such as the death penalty.

She said many students also don’t realize how important writing letters is. "A lot of people think it’s only one letter, what good will it do, so they don’t even bother with it." She added that when the letters add up it does really make a difference. "Maybe an individual can’t change things but a group can."

Amnesty International meets every other Wednesday at 9 p.m. For the location or more information contact Bos or advisor Chuck Green.
Editorial

No water too deep, no hills too high to stop men's cross country team

Congratulations to the Hope College men's cross country team who last Saturday ploughed through rivers and mud, over eight kilometers of hills and valleys, to earn the right to become the first Hope men's team since 1963 to run in the National meet.

Led by tri-captains Bruce Flitter ('91), Bill Roberts ('91) and Mark Walters ('91), the Dutchmen finished second to Calvin in the regional meet at Heidelberg College in Tiffin, Ohio. The team has steadily progressed throughout the season and is peaking at the right time. After losing to Alma in the dual meet portion of the season, the Dutchmen defeated the Scots at the conference race at the Hope Country Club.

Though nationally fourth-ranked Calvin presents a formidable obstacle to any national title hopes, the Dutchmen have brought third-year coach Mark Northois his most successful season to date.

The Michigan Intercolliegiate Athletic Association (MIAA) has three reasons to be proud of performances this past Saturday. While the Dutchmen finished second to Calvin in the men's race, the women of Calvin also brought home the regional championship. Should Calvin display the same strength in the regional meet at Heidelberg College in Tiffin, Ohio, the Dutchmen will be represented by Doug Burchett ('93), Pat McCarthy ('91), Steve Kaukonen ('92), and Cody Inglis ('93), in addition to the tri-captains.

Anchors away Dutchmen! Bring home a title and a bushel of corn.

Letters to the Editor

Christianity emphasizes higher thinking

Dear Editor:

Mr. Pierce's letter to the editor of Oct. 31, is a classic example of moral, ethical, and intellectual nonsense.

First, he describes our school as one which does not "thrive on the classically conditioned Christianity which inhibits intellectual striving and self-discovery." It is obvious that he has not fully grasped the true concept of a personal relationship with Jesus Christ. If there was ever a religion that emphasized self-discovery and higher thinking, Christianity is that such religion. I would advise him to read excerpts from C.S. Lewis, John Calvin, Martin Luther, St. Augustine, Malcolm Muggeridge, or St. Thomas Aquinas. He then might realize that such Biblical Schools may certainly be on the right track.

Second, he professes to have knowledge and acceptance of societal rules, but not in regards to holding back progress. Here, he fails to observe that just as all rules may not be just, not all societal "progress" is positive either. Such thinking makes "progress-advocates" seem very sheep-like in their blind acceptance, just as those who do not reasonably question authority.

Third, his call for those who are strongly-opposed and self-assured to engage in openness-mindedness once in awhile, so that they can maybe move more "gentle observations," is sheer absurdity. Having an open mind does not constitute acceptance of another idea or point of view. Our society is based on pluralism; the proliferation of ideas and thoughts. Yet, it does not insure that all ideas will be considered valid, merely for the sake of not hurting a person's feelings. If so, this society would surely, in terms of true progress, become impotent.

Finally, college is not the "real world" and Hope is not a secular college. Its mission is to prepare its students for entry into society as educated and, hopefully, virtuous young adults. Secular society uses laws to temper the aggressive self-centeredness of human nature for the sake of maintaining a civilized and ordered society. Hope goes a step further, applying further laws to try and teach valuable lessons. Such as the very possible dangers of alcohol or simply being respectful of one's roommate or neighbor. In society we can "see the ill-effects in individuals who have not embraced these simple principles; the increasingly higher rates of crime and of substance abuse. We should take to heart what Lord Acton said in the 19th century, "Freedom is not the power to do what we like, but rather the right to do what we ought."

Cordially,
Christopher J. Piersma

Trivial sexism complaints of students obscure the world's real problems

Dear Editors:

(I've got a question) about Phelps Hall: Why do the girls have to live on top, and guys below? That's definitely sexist. If anything, they should switch the floors around on alternating years. Why should the girls of Hope consistently have to walk an extra ten feet?

And another building I have a disappointing problem with in Graves Hall. The stairs on the North side of the building are sexist. Why should girls have to worry about wearing skirts when walking down the stairs? The holes in the stairs are conducive to perverted glances from men. I demand that the college install an elevator for fashionable women to avoid the embarrassment of the above problem.

And another thing that concerns me...

This letter has been a written rebuttal to all the sexism and pornography issues flying around here lately. The world's problems aren't going to be addressed by counting the number of suggestive cartoon characters on pinball machines.

The real world consists of the first generation of crack babies entering schools. The real world consists of Saddam Hussein controlling Kuwait. The real world's problems deal with unemployment, rape, taxes, racism, education, sexism, and too many other things to list.

Yes, sexism is a problem today, but if people don't stop looking around for things to make sexist, they might become permanently myopic.

Sincerely,
Chris Turkstra
SLIP OF THE MIND

November Mondays

JIM MONNETT

There is something special about sunshine on a Monday morning. Monday’s are usually a time of mundane office grind and a steady effort to avoid thinking of all the collegiate garbage one must go through before the sacred weekend return.

But November Mondays may be the worst (though February emphasized more than November. It’s games.

outside ~ especially the college games. The outdoors are still being vivid memory of warm weather November people still have a on their words. But I also find it refreshing to see students acting I also wish to applaud the anti-

But the Pull and Nykerk share the same pur-

pose (class unity, even-odd year

sions in the Kletz are permanent-

specials and Sesame Street

recesses in the Kletz are permanent-

on Saturdays. Do male restrooms have vending machines for feminine products? If looked at in this light, restrooms are sexist, but it is not a "bad" form of sexism. Similarly, the Pull and Nykerk are not bad forms of sexism.

stemming from the sheer number of weeks people have been eating there. So now when the pack forms the scrumblies go through the group. Smiles are non-existent. And there is always someone the pressure to valve to relieve some irritation upon.

Unfortunately, one woman’s ir-

rability is another man’s rudeness (and vice versa).

Two or three times I’ve gone into Phelps just hoping for some peepohead to give me excuse to stare them down and grace them with some anatomical negative designator. And when I’m looking for an excuse, there is usually someone willing to get in my way.

Unfortunately, rudeness makes them rude in turn to someone else. Which is fine with me, since why should anyone else be happy when I’ve got this view... and that presentation and... and....

And so due they.

But then the sun comes out on a Monday and moods are given a brief lift. Has that lift been sus-

sessed of art, as long as all
can tell you that there is a lot of views expressed.

We all come from basically the same walk of life. It’s true we all have our own personal en-
counters and beliefs which make us individuals, not like anyone else. But many of our ex-
periences (or lack of) are not unlike those of fellow students.

It is this that can lead to ign-

orance, it is easy to take or grant that everyone is just about the same. Being around so many people with the same ideals and goals, it becomes almost natural to assume that just because someone is taken to be doing something, it’s right. Therefore we must be careful when making judgements about other people. This is why I feel so strongly about censorship.

Censorship not only stops paint-
ings, books, and photos, it also con-

demns artists and authors. I do not agree with putting a stop to any form of art, as long as all parties participating, viewing, or reading and who are of legal age consent.

Censoring books, paintings, and photos also leads to censor-

ing the mind. Once this has begun, we hear phrases such as “I can’t believe any one would think...” and “I am appalled at the mindset of...” Thinking like this is the first sign of minds clos-

ing. At a college as small as Hope, where most of the student body shares basically the same backgrounds, beliefs, and ideals, it is of the utmost importance to keep an open mind. Survival in the world beyond Hope relies on the awareness and sometimes acceptance of other beliefs.

The upshot of all this is that people are irritable (when I am the most polite way to describe their condition). Heads are getting bit off for the second and house during the Lions game, some- more got decapitated for flick-

ing greens at the remote in the middle of plays.

Another sure sign of the grow-

ing irritability occurs between roommates. In many rooms the air is being fought over the temperature of the room. For some reason not peo-

ple are matched with cold peo-

ple. Throughout November one roomie will slam a window closed and go into the bathroom. The other roomie will return and pull the window up, turn on two fans and open the door to establish proper air flow. She will then stop at hearer to pick up paperwork. The first roomie returns from the bathroom and slams everything either off or closed.

Neither will of course mention their problems to the other. Afterall, it is November and he doesn’t know what I like by now.

And so it goes.

Senior Space

Ignorance leads to censorship

KATY STRYKER

I’m sitting here basking in the glow of neon-blue light. No, I’m not shopping the blue light special kines. No, I’m studying in the Kletz. It’s eight o’clock on a Thursday night and it’s pretty crowded in here. There are a handful of students studying in the booths along the “Hope College Corridor.”

But on the main floor something quite different is taking place. There are twenty to thirty students faces up, eyes shining, mouths grinning, intent-

ly watching “The Simpsons.” Everyone is mesmerized, caught

up in laughter at the antics of our favorite little kid—Bart Simpson.

As the show begins Homer

Benz (Krusty) is studying in the Kletz. I’m thinking about the

GREEK LIFE:

by Kris Olenik, Pam Lundberg and Jon O'Brien

In order to get a better perspective on Greek life on Hope's campus, questions were put to members of each of the six sororities and five fraternities. Answers reflect a representative sample of the responses received in the interviews.

QUESTION: What is the purpose of your organization (fraternity-sorority)?

KAPPA DELTA CHI: Pledging teaches honor, giving friendship.

SIGMA SIGMA: Friendship, striving for individuality, doing charity work, getting more involved in Hope.

CENTURIANS: Brotherhood, service, character.

Photos by Rich Blair

Jim Loats (91), Dave Kreydich (91), Carl Van Faassen (91), Todd Adams (91), and Scott Bossard (91) members of QTN.

QUESTION: What sets your organization apart from others?

SIGMA SIGMA: Our individuality and traditional Christmas (with the Fraters) and Halloween parties for underprivileged children

EMERSONIANS: The challenge of pledging teaches you a lot about yourself and what you can do to under pressure. You can learn how to budget your time and organize your life. Another aspect is that pledging teaches you how to work with other people to reach a common goal.

DORIANS: We try and work hard to keep strains to a minimum. It prepares you for the realities of the sorority (future time commitments if you're on a committee or have a position). It teaches them to manage time and stress; to prioritize, grow as leaders and work with the group. All these things are essential in the organization and the world.

EMERSONIANS: Pledging is necessary to learn all there is to know about brotherhood, service, and trust. You learn to care about the people around you. You can't put yourself first in every situation.

COSMOPOLITANS: Pledging is important to learn all there is to know about brotherhood, service, and trust. You learn to care about the people around you. You can't put yourself first in every situation.

DORIANS: We try and work hard to keep strains to a minimum. It prepares you for the realities of the sorority (future time commitments if you're on a committee or have a position). It teaches them to manage time and stress; to prioritize, grow as leaders and work with the group. All these things are essential in the organization and the world.

EMERSONIANS: The challenge of pledging teaches you a lot about yourself and what you can do to under pressure. You can learn how to budget your time and organize your life. Another aspect is that pledging teaches you how to work with other people to reach a common goal.

ACADIAS: We're a pretty close-knit group and our service projects set us apart because we do more of them.

DORIANS: We're so new (two years old) and a lot of our archives were lost so we're forming our own traditions instead of being formed by old traditions.

Memberships vary, but time and dues similar.

Members of the EIB sorority Gretchen Spiece ('92), Kara Tellier ('92), Sue Dusseljee ('91), Juli Stoutenborough ('91), and Nicki Miller ('91) build sisterhood in their house.
Continued from P. 8

**QUESTION:** What happens if a member becomes inactive? What are some reasons for becoming inactive? Can one become active again?

**DELTA PHI:** If a member becomes inactive, they do not have to pay dues but are always welcome. They must pay to come to special events. They cannot become active again.

**COSMOPOLITANS:** You may become inactive if you can't pay your dues or if you can't make the time commitment. To become active again you must pay your dues again. If you can't come up with $100 at once you can be on a payment plan.

**SIGMA IOTA BETA:** If a member becomes inactive, they are still welcome to come to events. They're always considered a sister. By choice they don't wear letters anymore and they can come to meetings but they can't vote.

**FRATERNAL:** If a member should decide to become inactive they are permitted to attend all meetings, but do not have a vote, and are permitted to attend all social functions after payment of the proper fee to the chairman. They can become active again by paying dues for the current semester.

**CONTINUED FROM P. 8**

Andrea Gromme ('92), Charlene Fisher ('92), Diane Peddle ('92), Molly Buls ('91), and Peoecca Welgie ('91) members of AO.

**QUESTION:** What happens if a member becomes inactive? What are some reasons for becoming inactive? Can one become active again?

**DELTA PHI:** If a member becomes inactive, they do not have to pay dues but are always welcome. They must pay to come to special events. They cannot become active again.

**COSMOPOLITANS:** You may become inactive if you can't pay your dues or if you can't make the time commitment. To become active again you must pay your dues again. If you can't come up with $100 at once you can be on a payment plan.

**SIGMA IOTA BETA:** If a member becomes inactive, they are still welcome to come to events. They're always considered a sister. By choice they don't wear letters anymore and they can come to meetings but they can't vote.

**FRATERNAL:** If a member should decide to become inactive they are permitted to attend all meetings, but do not have a vote, and are permitted to attend all social functions after payment of the proper fee to the chairman. They can become active again by paying dues for the current semester.

**SIGMA IOTA BETA:** If a member becomes inactive, they are still welcome to come to events. They're always considered a sister. By choice they don't wear letters anymore and they can come to meetings but they can't vote.

Budget strikes student taxes and reforms student loans

by Jaret Sieberg

WASHINGTON, D.C. (CPS) - Congress approved a budget Oct. 27 that will exempt both undergraduate and graduate tution benefits from federal income taxes, reduce the federal student loan program and increase the cost of a six-pack of beer.

The new budget, which seeks to trim the federal deficit by $500 billion during the next five years, is a mixture of tax increases and spending cuts.

Most significantly for students and colleges, the budget said both undergraduate and graduate students would no longer have to pay taxes on tuition benefits paid for by employers, or to them in return for campus work they do.

It also will try to reform college loan programs by not giving students loan money until 30 days after classes begin, and by dropping schools with default rates over 35 percent from the guaranteed loan program.

Some observers also worry the budget will make it harder for students to solicit money from alumni by limiting the amounts wealthy taxpayers can claim as tax deductions.

In all, the budget cuts $40.1 billion from this year's budget and $382 billion over the next five years. The House passed it 228-200. The Senate then followed suit, voting 54-45 for the bipartisan compromise.

President Bush has said that while he objects to parts of it, he will sign the budget.

"I don't think anyone believes it is a perfect budget," said Jim Nelson, secretary of the American University Staff Council and a founding member of the Washington-based Integrated Response Against Taxing Education (IRATE). "This bill is the best we could expect out of this Congress and out of this White House."

Students with employers who pay for their classes will have some extra pocket change under the new budget. The bill continues the tax exemption for undergraduate students and restores the exemption for graduate students.

The bill makes the exemptions retroactive to Sept. 30 for undergraduate, and for graduate students, the changes take effect January 1.

For the last three years, Congress has allowed graduate remission benefits as taxable income. For some graduate students, the cost of additional taxes has prevented them from taking advantage of the program.

"This is very satisfying after three years of efforts," Nelson said. "We need people to call this Congress and the next Congress with thanks for our inclusion and to push to make this extended law permanent."

Terri Ferinde, president of the American Association of University Students, agreed. "That was the right move for Congress to take. It was stealing money from students who were working their way through college. It made it nearly impossible to make it on your own through college."

The budget also hopes to cut $1.7 billion from federal student loan programs during the next five years, mostly by trying to prevent more students from defaulting on loans.

Among other measures, the new law will stop students at schools with default rates more than 35 percent from getting loans, require students without high school diplomas or Graduate Equivalency Diplomas to pass a test to receive federal assistance, and delay funding for first-time loans until 30 days into the semester. The delay would keep students from using loan money to pay non-college bills.

Such efforts may not be the ultimate means that Congress uses to cut the federal loan program, Ferinde said.

"I think the real decisions will be made with the reauthorization of the Higher Education Act," Ferinde said. "I'm not convinced that this is a major overhaul."

The Higher Education Act, up for renewal next year, authorizes most federal financial programs, including Pell Grants and Stafford Student Loans.

Eric Wentworth, a senior vice president with the Council for the Advancement and Support of Education, said the section of the federal budget that reduces personal tax exemptions for people with incomes more than $100,000 could reduce overall donations and lower the number of lump-sum gifts.

"Historically, donations have been 100 percent deductible," Wentworth said.

"What we are dealing with in this is putting a limit across the board."

But Donald Triezenberg, vice president for development and planning at American University, said he didn't believe the changes would hurt the university's funding efforts.

Do You Want VISA & MasterCard Credit Cards?

You can have two of the most recognized and accepted credit cards in the world: VISA and MasterCard. Credit cards give you the freedom to "CREDIT WHEN YOU WANT," without worrying aboutpei. You can buy anything from a"h the simplest item to the most expensive item without having to pay cash. Credit cards offer the convenience of credit wherever you are. You can use VISA or MasterCard at any retail store that accepts them. This makes it easy to buy without having to worry about cash or checks. Credit cards also allow you to have a "CREDIT LIMIT," which is determined by your credit history. This means that you can spend up to your limit without having to worry about the amount you can spend. Credit cards also offer a "CREDIT REPORT," which is a record of your credit history. This report can be useful when you apply for credit or employment.

Mail this coupon today for your free offer! Use the code "CREDIT" on your order form.

Tharin took classes at Hope
Holland native tours with dance company

(hope) — It's important to know your audience.

And when dancer Catherine Tharin performs at Hope College with the New York-based Mimi Garrard Dance Company later this month, there is no doubt she will know her audience— or at least some of its members. Her father, Dr. J. Cotter Tharin, is a professor of geology and chairperson of the department of geology at Hope, and she was raised in Holland.

The Mimi Garrard Dance Company will perform on Friday and Saturday, Nov. 16-17, at 8 p.m. in the Dewitt Center main theatre through the Hope College Great Performance Series.

The company, formed in 1965, combines the talents of a group of young artists, preparation in their fields, and presents performances of works ranging from intricate, multi-media theatre pieces to satiric, comic and pure movement dances. The group travels with a unique computer-controlled lighting system which permits a hitherto impossible degree of control over complex lighting effects.

Mimi Garrard, dancer and artistic director of the company, has choreographed more than 30 works. With her husband, James Seawright, she does special effects for Cinema Braided into a force that permits a hitherto impossible movement dances. The group performs in a number of experimental television productions for CBS and WGBH.

Concerning the company's work, the "New York Times" noted, "movement, scenery and production were combined to beautiful and meaningful effect." The "Charlotte Observer" in turn wrote, "Garrard has discarded a mountain of choreographic conventions...Her work is dance, theatre and cinema braided into a force that has no name."

In returning to Holland to dance with the company, Tharin is in a sense returning to not only her family roots but her professional roots as well. She first studied dance with Maxine Delbruy, professor of dance and chairperson of the department of dance at Hope College, while a high school student enrolled in dance classes at Hope.

"She was very creative and disciplined student who saw shapes in space very easily and could apply and incorporate them with her own body movement with great musicality," Delbruy said. "She's an exciting dancer. She attacks space with vigor and excitement."

Tharin graduated from Connecticut College and earned a master's degree from Columbia University Teachers College. She has danced professionally since 1983, when she joined Ze'eva Cohen and Dancers. She has also danced with many other choreographers in New York City, including Dudek-Mann and Dancers, Monica Levy Performance Group, Jessica Fogel and Jeanette Stoner.

She currently dances with both the Mimi Garrard Dance Company and Erick Hawkins, and has taught at the Hawkins studio and Princeton University.

Tharin has in the past taught a May Term at Hope in the Hawkins technique, and Delbruy hopes to have her teach a similar course in the future.

Tickets for the company's performance may be purchased in advance beginning Monday, Nov. 12 at the Dewitt Center ticket office, located at the corner of 12th Street and Columbia Avenue, or reserved by calling (616) 394-7880. The ticket office is open weekdays, from 10 a.m. to 5 p.m.

Single admission tickets are $9 for senior citizens, $10 for other adults and $5 for students. Group discounts are available.

Tickets will be held at the door on the night of the event until 15 minutes before the start of the performance.

Grace takes second in NATS

(Hope) — Katherine Grace, a Hope College junior from Midland, was awarded second place in the regional National Association of Teachers of Singing (NATS) adjudications held on Friday and Saturday, Nov. 2-3, at Indiana University in Bloomington, Ind.

She was chosen from more than 30 candidates in the Junior Women's division representing college and university students from Michigan, Indiana, Ohio and southern Canadian provinces. The competitions involve approximately 300 students from all college age groups and high school divisions in the areas. Singers are judged on technical accomplishment, choice of repertoire, quality of voice and audience appeal.

A vocal performance major, Grace has been a consistent NATS winner since her high school days, earning first and second places during four years of singing in the department of music at Hope as a recitalist and member of the Chapel Choir, and has sung the roles of Monica in Opera Workshop's 1989 production of Menotti's "The Medium" and of Mimi in Act I of Puccini's "La Boheme" last spring.

She was among six winners selected to appear with the Hope College Orchestra in April of 1990 in the Concerto-Aria contest, and has been heard in the college's Musical Showcase concerts at DeVos Hall in Grand Rapids.

Currently she is preparing her junior recital for February of 1991. A 1988 graduate of Midland High School, Grace is a student of Joyce Morrison, associate professor of music at Hope.

Native Michiganders read works to DePree audience

by Scott A. Kaukoren

Native Michiganders read works to DePree audience

Opus, the Hope College literary magazine, and the English Department, sponsored "Third Opus reading of the semester last Thursday night in the DePree Art Gallery. Before a crowd of over 120, Sharon Dilworth and Jim Daniels, both native Michiganders now teaching at Carneige-Mellon University in Pittsburgh, read selections of their work.

Dilworth, whose "The Long Winter" was the recipient of the prestigious Iowa Short Fiction Award, has centered many of her stories on Michigan's Upper Peninsula Finns and Native Americans and the uneartheness of their life in the long harsh winters. "Suburban Detroit, 1974," the selection that Dilworth chose for her reading from her forthcoming collection of short stories, reflected the similar theme of trappedness.

The thoughtless conformity of the suburbs replaced the long snowy, white winters of the Upper Peninsula. Amidst the everyday humor and carefree activities of a 15-year-old suburban girl, Dilworth captures the pain and unhappiness of a place that smothers and defines its people.

The work of poet Jim Daniels takes the listener into the world of the city, the world of the auto worker. Daniels, who worked on an auto factory to pay for college, won the Brittingham Prize for his volume "Places-Everyone" and has been praised for his most recent volume, "Punching Out."

Daniels attempts to present pieces to which his audience can make a connection. From a nine-year-old's perspective of former Tiger third baseman Don Wert to the sounds of a broken down assembly line to echoes of American pop culture, Daniels' poetry is rooted in the everyday of the common man.
Trumpeter swings NEA grant

( HOPE) — Robert Thompson, assistant professor of music at Hope College, has received one of 50 jazz performance fellowships from the National Endowment for the Arts.

For the 1991 year there were more than 600 applicants for the program, which is designed to identify and support outstanding jazz artists in the United States who are in the early stages of their careers. The $2,500 grant will provide support for recording the performance fees for Thompson, who will be studying the 1960s music of Miles Davis.

"This grant will enable me to pay for studio time and performing space while on a leave of absence in New York City next year (1992)," Thompson said. 

Additionally, the grant supports the performance of two extended compositions that I recently completed for jazz chamber ensemble."

The grant was Thompson's second from the National Endowment for the Arts (NEA). He had also received a jazz study grant from the NEA in 1986, which, in 1989 had released an album, "Divi Samba," which included two pieces he wrote.

A member of the Hope faculty since 1986, he earned a bachelor's degree and M.M. from the University of South Florida, and an M.M. from the Eastman School of Music, University of Rochester. Thompson will be completing his doctoral work at the Eastman School of Music in December of 1991, during his leave of absence.

Groups look for Saturday song win

Hope College's traditional All-College Sing will be held this Saturday, Nov. 17, at the Knickerbocker Theater in downtown Holland.

The emcee for the event will be Hugh Fink, a musical comedian.

The groups of college students who compete are not allowed to lip sync. They are judged on the quality of their song and an appearance.

Last year's winner was the Sigma Iota Beta (SIB) sorority. The current slate of songs are as follows:

Alpha Gamma Phi— "Women are Smarter"

SIB— "Just the Way you Are"

Delta Phi— "American Pie"

Centurian— "Naturally" or "Cecilia"

Cosmopolitan— "Alko, Alko"

Emmerston— "The Big Butt Rap"

Fraters— "Dust in the Wind"

Kappa Delta Chi— unannounced

Some Really Groovy Guys— "Dear Abby"

Dinner with Us— "State of the World"

Bill— unannounced

Panel to speak on war potential

by Scott Kaukonen

news editor

With the continued build-up of U.S. troops and increasing pressure on President George Bush to take some action, Inter-Varsity Fellowship is sponsoring a panel discussion entitled "The Possibilities of War in the Middle East." It will be held Wednesday, November 14, from 8:30 to 10:00 p.m. in the Maas Conference room. The event will bring together a spectrum of opinions including Harvey Stall, a former missionary to the Middle East and three Hope faculty members. Stall hopes to shed some light on the Arab perspective on the situation.

Hope faculty members include Dr. Donald Cronkite of the political science department, one of the campus's most ardent Republicans; and Dr. Robert Selig of the history department, who Inter-Varsity president Scott Ranyony ('88) cast in the role of moderate.

Buy an IBM PS/2 before December 31

and you can really take off.

Anywhere in the continental U.S. or Puerto Rico for only $149.

The ski's the limit when you purchase an IBM Personal System/2 before the end of the year.

You receive:

• TWA Certificate good for a round-trip ticket for $199 off-peak and $299 peak season**
• IBM TWA Gateway Student Discount Card

Special offering on IBM/DEC

Use your TWA Certificate to travel to any IBM destination in the continental U.S. or Puerto Rico. Head for the beaches. Take off for the slopes. Or visit the folks back home.

Save on future trips, too. Apply for a TWA Gateway Discount Card to receive a 10% discount on future TWA travel. TWA has waived the annual application fee.

In between trips, tap into a wide world of information whenever you want with the IBM/DEC Start-up kit, a 2100 tape drive. Personal Modern, a software connection package and three months of service.

So buy an IBM PS/2 before December 31, 1990. It's the right time to go on board with a PS/2.

*IBM is a registered service mark of IBM Corp. TWA is a registered trademark of Trans World Airlines, Inc. IBM/DEC is a trademark of IBM Corp. IBM is a registered service mark of IBM Corp. in the U.S. and other countries.

**TRIP must be taken by December 31, 1991. Fare is subject to change and IBM and DEC reserves the right to withdraw this offer at any time without notice. ** FARE is available between New York City and San Francisco only. 14000 round trip fare typically ranges from $500 to $700. All reservations are subject to availability.
Hope Harriers advance to Nationals

by Stephen Kaukonen
ad manager

The last time Mark Northuis went to Nationals with a men's team from Hope, Ronald Reagan was beginning his first term as President of the United States. The American hostages had just returned from Iran and most of his current team were still running around the playground. Northuis and his teammates were making their fourth consecutive trip to Nationals, finishing 11th on the heels of a sixth place finish the year previous.

Nine years later, Northuis, who is now in his third year coaching Hope's cross country teams, is taking his first team as coach to Nationals.

The Hope men's cross country team continued to show improvement at the regional meet at Heidelberg College in Ohio, and with their effort, qualified for the National meet which will be held next Saturday at Grinnell College in Iowa.

Hope faced nationally ranked teams from Calvin, Mt. Union, Otterbein, Alma and Wabash. With only the top two teams qualify for nationals, Hope needed and received a team effort to qualify.

John Lumkes of Calvin won the race in a time of 26:58, slowed by a course wet and muddy from rain. Calvin dominated the top five. Lumkes' teammates, Dave Sydow and Thad Karmehl, finished second and third. Calvin won a comfortable victory with a total score of 31.

Paced by Bruce Fletter ('91, 5th), Bill Roberts ('91, 10th) and Doug Burchett ('92, 20th), the Dutch team placed second with 82 points, 10 points ahead of Otterbein.

Although the Hope team ran well, Northuis believes the team can do even better. "Some guys had their best race of the year, but a few were taken out of their race style," Northuis said. "With the conditions the way they were, Roberts, (Mark) Walters ('91) and (Steve) Kaukonen ('92) were forced to run different types of races than normal."

The conditions to which Northuis referred were a quick start, forcing the runners to go out on the first mile faster than normal. a muddy course, and the frigid cold Sandusky River, which the runners had to cross four times in foot-deep water.

"If we can place five guys in the top 50, we realistically could be in the top 10 or 11," Northuis said.

The members of the cross country team going to nationals are Burchett, Fletter, Cody Inglis ('93), Kaukonen, Pat McCarth (‘91), Roberts and Walters. In the women's race, Calvin defeated Mt. Union by just one point, 79 to 80. Kim Talbot of Calvin outkicked Rebecca Nichols of Mt. Union in the last 15 yards to give Calvin the regional title. The race was won by Kara Berghold of Kenyon in 18:52. Berghold was followed by teammate Kelly Wilder and Sarah Braunreiter of Alma.

Hope finished in 6th place, just ahead of Otterbein and Ohio Wesleyan.

"Considering the conditions of the course and the quick start, the Hope women were caught at the start and were not able to move," Northuis said.

Jilanne Bannick ('91) led the Flying Dutch with a 5th place finish and was followed by Theresa Foster ('94, 36th), Cara Luchies ('94, 43rd) and Sheila Brink (‘91, 46th).

The men's basketball team continued to prepare for their upcoming season by holding the fourth annual "Meet the Dutchmen" last Saturday at the Dow Center. They participated in scrimmages against some against Hope alumni basketball players.

This day means the start of the year. When Meet the Dutchmen Day comes, we're rolling—said head coach Glenn Van Weiren.

The day gave the public its first glimpse at the new varsity team. The team lost four players to graduation and picked up six new ones for the 1990-1991 season. The four graduates include Kurt Hoeve, Justin George, Dan Klunder, and Bruce VanderKolk.

Along with the favorites of last year, Hope is looking at some changes. The strong leadership of Eric Elliott will be there, but new faces will be seen on the court as well. Look for a fast offensive team this year. "Our strength will be in being able to score points," said Van Weiren.

Two of the upcoming players for Hope were brought up from the junior varsity team. Steve Hendrickson ('93) and Doug Mesecar ('90) will be wearing the varsity uniform this year.

Two of the new faces played for Hope their incoming year, but did not play their second year. Eric Haast ('92) and Rick Zuiderveen ('92) are back in the Hope line-up.

The last two new faces are transfers. Jon offe ('92) transferred from Niagara University and Tom Huberti ('92) transferred from Kalamazoo Valley Community College. "All six of those guys we think are really good basketball players," said Van Weiren. "Today is a day to get our guys to go against some other people, to get some enthusiasm going, to give us a chance to introduce our players to the fans," said Van Weiren, "it's more of a fun day than a coaching day." Weiren is looking for some things also. I think that's our second priority.

The difficulty of the season lies within the other team. "The difference for us will be how the teams see us against us," said Van Weiren.

"It was a nice start for us," said Van Weiren, "I thought our guys got off to a good start offensively. There was little commotion on defense." The commotion could be caused by the different lineup for this year's team. "The difference for this year team will be two things. We've got six new faces that we have to integrate and how we can operate ourselves defensively," commented Van Weiren.

The turn out for the scrimmage was impressive. "What a great group of people. That's what we're thankful for, for all the great support," commented Van Weiren. "With 300-500 people here that's more than some schools at their varsity home game..."

The outlook for the season is impressive. Picked to win the Michigan Intercollegiate Athletic Association title and ranked seventh nationally in preseason polls, the team has high expectations to live up to. Despite injury the team will be led by consensus Division III All-American guard Eric Elliott ('91) who averaged 21 points per game last season. Elliott has tendonitis of the knee and is working at about 80 percent," commented Van Weiren.

Also leading the team will be center Wade Gugino ('92) who averages 16.5 points and 7.2 rebounds a game shooting 60 percent from the floor. Adding to the front line will be Bart VerHulst ('92), who is finishing recovery from an injury to the ankle, and Colby Carlson ('92) who averages 8.8 points per game.

Coach Van Weiren is ranked 11th on the winningest Active Division III Coaches list and holds a 224-68 record in his 13 seasons as head coach at Hope.

The goal for this year is high. "My goal," said Van Weiren, "is to get these guys to play as tough on defense as they do on offense."
Basketball budget amounts equal

Rochelle Anderson
sports editor

While at some colleges the disparity between budgets for men’s and women’s basketball programs is vast, the same is not true at Hope.

The question of whether the women are treated fairly is a good one. Men’s Athletic Director Ray Smith said, “In my investigation, Hope is fantastic with its treatment of women as far as expenses.”

The men’s team does not take the money from the ticket sales and the women do not charge admission.

“All the money that is brought in through ticket sales,” said Anne Irwin, the women’s athletic director, “goes to the general fund unless other arrangements are made in advance.”

Special cases include hosting the women’s 1989 NCAA Division III tournament. “For instance, in the tournament last year for the women’s team,” said Irwin, “the money from the ticket sales ticket sales was used to defray expenses of using the Civic Center. This was due to the fact that money was not budgeted to the women for the use of the Civic Center.”

The two budgets may be different in size, but so are the needs of the two teams. For instance, the 1989-1990 budget for the men was $31,568 and the women’s budget was $15,446. The men had to pay for the cost of renting the Civic Center. It costs $40 per hour to rent the civic center and that totals $300 a game. So 11 games costs $3,300 a year just for the Civic Center. The men also give guarantees to teams to play in tournaments and that cost is around $1,500.

Subtracting these two costs that the men have but the women do not, the two budgets are more comparable. The men have a slim one-game advantage.

Ray Smith, the men’s athletic director, takes a different approach in directing the teams money. “We want to give each student a positive experience playing for Hope. We’re not in it for the money.”

What needs to be looked at is the needs of the student athlete. “Do we meet the needs of the students in the areas of transportation, uniforms, facilities, and road expenses? That is the question we must ask,” said Smith.

Smith believes that Hope does. “Both the men and the women teams compare favorably with any school we play,” said Smith. Looking at turnout, Hope is second in the country for per game attendance in Division III schools. “There is an extensive waiting list for season ticket buyers,” said Smith, “the town has a love for Hope College.”

Field Hockey goalie joins all-stars

(HPM) — Hope College senior field hockey goalie Eileen Malkewitz of Grand Ledge has been invited to compete in the North-South Senior Allstar game to be held at Rutgers University in New Brunswick, N.J. on Saturday, Nov. 17.

The allstar game, sponsored by the College Field Hockey Coaches Association and held in conjunction with the NCAA Division I national championship tournament, will involve the nation’s outstanding Division II and III senior players.

This is the first time that a Hope College field hockey player has been invited to participate in this national allstar game.

Hope edges Calvin in All-Sports race

(HPM) — Hope College leads the Michigan Intercollegiate Athletic Association’s (MIAA) All-Sports race after the fall sports season.

The MIAA All-Sports award is based on the cumulative performance of each member school in the league’s 18 sports for men and women.

After the eight-sport Fall season, Hope holds a slim one-point lead over defending MIAA All-Sports champion Calvin College, 62-61. Next is Kalamazoo with 53 points followed by Albion 43, Alma 42, Adrian 26, and Olivet 20.

Calvin has won the All-Sports award the last two years after Hope had dominated the honor during the 1980’s with an 11-sport basketball record nine consecutive All-Sports championships.

Last year after the fall season, Calvin held a two-point lead over Hope in the All-Sports standings. 67-65. Calvin went on to edge Hope by just three All-Sports points by the end of the year.

Ironically, Hope did not win a fall MIAA championship this season. It is the first year since 1972 that a Hope team has failed to capture a league crown during the fall season.

No Hope fall team finished in the lower half of their respective league races. Hope teams were runnersup in four fall sports—men’s cross country, golf, football, and field hockey. Ending in third place were the men’s and women’s soccer teams and women’s cross country team while the volleyball team tied for fourth place.

The MIAA All-Sports award has been presented since 1984-85. Hope has won the honor more than any other school with 16 All-Sports championships.

Dutchmen dominate challenging season

HOLLAND—Hope College football coach Ray Smith doesn’t hesitate one moment to label his 1990 squad a group of overachievers.

Smith and his Flying Dutchmen entered the 1990 campaign faced with one of the most challenging schedules in the college’s history. Hope was picked to finish third in the MIAA race and a 500 record against nonleague opponents was viewed as being realistic.

Surprisingly, the Flying Dutchmen responded with an outstanding 6-1-2 overall record and finished second in the MIAA standings at 3-1-1. They battled conference champion Albion to a 10-10 tie.

The Flying Dutchmen earned the label “cardiac kids” as six of their nine games were decided in the final minute of action and every game hung in balance well into the fourth quarter.

“I will always remember this team as a group that wouldn’t quit,” said Smith, who has guided Hope’s football fortunes for 21 years. “They worked together as well as any team I have coached; this season was truly a measure.”

Smith, who is the winningest football coach in MIAA history, has a 127-55-8 record for a .689 winning percentage. He is 79-20-6 against MIAA opponents.

Senior wide receiver Jeff Schorhaar of Coldwater set a new Hope single season record for pass reception yardage. He caught 40 passes—second best in school history—for 742 yards. The previous mark was 627 yards on 33 catches in 1982.

Sophomore defensive back Kelly Clark of Traverse City tied for pass interceptions with six. He joins Dave Johnson (1970) and Rich Burell (1982) on the all-time list.

Senior placekicker Duy Dang of Tecumseh added to his career field goal kicking records established already in his junior year. This season Dang made six of 11 field goal attempts, raising his career record total to 28 in 46 tries, a .609 success rate. He also kicked 48 of 57 extra point attempts.

The Hope defense yielded only three touchdown passes the entire season, tying the modern day school record first established by the 1982 Flying Dutchmen.

Hope will face the same slate of non-league opponents during the 1991 season. The Flying Dutchmen will open the season at Hope for Community Day on Sept. 7 against Findlay, Ohio. Other non-league games will be DePauw away Sept. 14; Drake, Iowa away Sept. 21; and Aurora, Ill., home Sept. 26. The MIAA schedule will be: Oct. 12 Alma, home; Oct. 19, at Albion; Oct. 26, at Adrian; Nov. 2, Kalamazoo home; and Nov. 9, at Olivet.
