Dredge Lake For Pipeline From Niles

**\$3,000,000 Project
Will Carry Petroleum
Products to Michigan**

Work already has begun on dredging Lake Macatawa in Holland for part of a \$3,000,000 pipeline project of the Wolverine Pipe Line Co. of Niles, city officials and press representatives were told at a luncheon in Hotel Warm Friend Tuesday which was in the nature of a "fact" meeting for a pipeline extension from Niles to Grand Haven.

Through this pipeline, Holland and other western Michigan cities will be connected with the main Wolverine line laid nine years ago to service Chicago, Detroit and Toledo.

The Holland route will be in the neighborhood of Graafschap Rd. and will cross Lake Macatawa in the vicinity of the Holland-Park Township line and follow 144th Ave., also known as Division Ave., running north to Grand Haven.

Work on land operations will begin in about two weeks and will be completed about mid-October.

The pipeline extension from Niles to Grand Haven involves an eight-inch line of welded steel pipe. The present system of 25 miles of 16-inch welded steel pipe runs from Chicago to Detroit and Toledo. It is owned by Shell Oil Co., City Service Co. and Texas Co.

When the pipeline is completed, regular runs to Holland by the tanker Michigan are expected to be reduced but not cut out entirely, pipeline officials said.

The construction contract is held by the Somerville Construction Co. of Ara, Mich.

R. R. Meyer, chief engineer of the Wolverine Pipe Line Co., told local officials that the pipeline will be a common carrier available to all shippers, and certain to make a strong contribution by serving industry and agriculture in and around Holland.

In addition to an uninterrupted, year-round supply of petroleum products, construction of the pipeline will bring other benefits to Holland including tax returns and employment.

Fred Bruch, project engineer for Wolverine Pipe Line Co., will supervise local construction.

Board Favors County Park on Crockery Lake

GRAND HAVEN — The Ottawa County Board of Supervisors Tuesday indicated it favors purchase of 25 acres of private land on Crockery Lake in Chester township for a new county park.

The Board took no official action but after Engineer-Manager H. E. Stafseth of the road commission announced that the roads and parks committee of the board favors the purchase the board members showed their approval by a raising of hands.

Stafseth reported that the committee had already acquired a 90-day option on the land, which can be purchased for \$12,500. Official action will be taken as the first order of business at the October session, but as other parties wish to purchase the land Stafseth sought the "feeling" of the board members. The price is reasonable as the property is very scenic and the area has 300 feet of shore line.

Stafseth explained that the road commission started on a program of establishing a new park system four years ago and has added sev-

eral parks, including the big Riverside Park in Robinson and the Hager-Hardwoods Park in Georgetown.

But, he said, the northeast part of the county has no county park. The North Beach Park near Grand Haven and Tunnel Park near Holland, both on Lake Michigan, serve the northwest and southwest parts of the county.

Part of Crockery Lake is 60 feet deep, he said, the lake is 1 1/2 miles long and a mile wide, and is spring-fed. "We feel this is an exceptional buy," he said, "and is the last opportunity for the county to acquire a sizeable piece of land on Crockery Lake."

The lake is suitable for swimming, two public roads lead to the area, there is a small home on the land, which is landscaped. At very little expense, Stafseth said, the county can clean up the place and place picnic tables. "Then we will be ready for business," he said. The property is owned by Mrs. Grace Ridder, who is moving into the city and wishes to sell.

Board Okays New Pipeline

GRAND HAVEN — The Ottawa County Board of Supervisors, meeting in special session Tuesday, adopted a recommendation of the conservation committee granting the permission to Wolverine Pipe Line Co. of Niles to install an eight-inch pipeline over county land in Grand Haven township. The \$3,000,000 pipeline extension will carry petroleum products from Niles to Grand Haven.

The resolution provides that the line be installed within the 15-foot area west of the property of the Chesapeake and Ohio railway. The property involves a 90-foot stretch and is located south of Agnew near Pierce St.

The property is under lease to Grand Haven school district. The Grand Haven Board of Education must now approve the installation.

Chairman Lawrence Wade of Holland also appointed a new committee in the operation of the county youth home in Grand Haven township.

Named to the committee were Herman Windemuller of Park Township, Herman Vande Bunte of Hudsonville and City Attorney Howard W. Fant of Grand Haven. Wade also reminded members of the 31st district county officers association meeting in the Pantlind Hotel in Grand Rapids Sept. 6.

IPTAY Sales Raise Funds For Program

Holland High School was assured of a full athletic program this fall with the announcement today of the sale of 350 IPTAY (I Pay \$12 a Year) tickets by members of the Big Dutch Boosters Club.

The sale of the tickets means that Holland will have a complete varsity and reserve football program this fall and the seventh, eighth and ninth grade football teams and the cross-country team will be reinstated.

Larry Geuder, ticket sales manager of IPTAY, reported to Supt. Walter W. Scott Tuesday noon at a Big Dutch Boosters Club meeting in the Hotel Warm Friend. Scott in turn told Athletic Director Joe Moran to confirm the Holland fall program with opponents.

Geuder said the sale of 50 percent of the tickets covers 260 participants. At \$12 a ticket, this means \$4,200 has been raised for the athletic program.

The remainder of the tickets must be sold to cover the basketball, wrestling, baseball, track, golf and tennis programs. These activities also supply participation for 260 youngsters.

Plans call for the various IPTAY committees to continue contacts with industry and other assigned groups including automobile dealers, retail merchants, professional division and others.

IPTAY tickets are on sale in 60 to 70 business establishments in Holland.

It was pointed out that Moran can't go ahead and confirm any of the games with outside foes until the money is provided with the exception of the basketball schedule.

The Boosters Club is attempting to have the entire sports program continued. The group moved into high gear after the athletic program was curtailed following the extra-mile election last spring.

The anticipated deficit for the sports program this school year would be an estimated \$8,400. IPTAY ticket holders will sit in a reserved seat section at the five Holland home football games and the eight home basketball games.

Holland will play its football games in Riverview Park and its basketball games in the Holland High fieldhouse.

The injured girls were brought to a waiting ambulance on the south shore of the lake by an unidentified boat. The damaged Prince boat was towed to Jesiek's Shipyard by a Coast Guard boat. The mishap occurred about 5:45 p.m. just east of Gold's Point, officers said.

The "Wolverine" was headed west in Lake Macatawa with 20 persons aboard. The Prince boat was headed south, towing a water skier, and struck the starboard side of the 55-foot excursion boat. None of the passengers aboard the ferry was injured.

Rains Wash Out Grass at School

Heavy rains early Saturday morning washed the straw off the lawn at Holland High School and washed away much of the grass seed, especially on the northside of the school.

The straw, put on the ground to hold the moisture, washed off and clogged the drains. This resulted in about a half-inch of water on the floor of the music room in the Holland High auditorium.

A five-custodial staff used electric vacuum cleaners to clean up the water. Water did not get on the stage floor.

Water did leak through the fieldhouse roof onto the track but caused no damage to the track or to the fieldhouse basketball floor, school officials said.

United Fund Starts Drive October 1

1962 Quota Represents Increase of 1 Per Cent Over Goal Set Last Year

A campaign goal of \$93,299 has been set for the October 1962 Greater Holland United Fund-Red Cross joint campaign by the United Fund board of directors, James E. Townsend, United Fund president announced today.

This figure surpasses last year's goal of \$97,227 by 1.03 per cent and is the highest amount ever sought by the United Fund-Red Cross joint campaign in the Greater Holland area.

The campaign this year will be conducted Oct. 1 through Oct. 19. Determination of the goal was reached, following reports presented by Harold E. Denig, chairman of the United Fund's Admission and Budget committee, Arthur Read, chairman, American Red Cross, Ottawa County Chapter, and Mrs. J. G. Van Valkenburgh, executive director of the Holland Red Cross branch office, at the Thursday afternoon meeting of the United Fund board of directors.

Denig said that the recommendations of the budget committee regarding the 1963 United Fund allocations to the member agencies were made following a review of the financial needs with representatives of each of the agencies and reflect the minimum amounts necessary to maintain the many vital agency services to families and individuals in 1963.

The 1962 campaign chairman, John W. Fonger, said, "Without a doubt this is a closely studied and realistic campaign objective, one that presents a real challenge to Greater Holland givers and the more than 800 volunteers who will be working in the drive."

"Our community has had a reputation over the years of adequately providing for the health and welfare needs of our neighbors and I am confident that this year's crusade for community betterment will again meet with adequate and generous giving."

Read, in discussing the Red Cross budget for its next 12 months, advised that \$27,091 would be required to finance the services provided by the Holland branch of the Red Cross and that on the basis of population of the United Fund solicitation area, \$22,400 is the amount to be included in the United Fund-Red Cross drive.

Read said that the balance of \$4,691 is applicable to the outlying townships in the southern half of Ottawa County and would be raised in the regular Red Cross campaign to be conducted in March.

The United Fund supported agencies provide services to individuals and families living in the Greater Holland area, both within and beyond the city limits of Holland. Consequently the solicitation area for the joint campaign extends beyond the boundaries of Holland City.

Local United Fund agencies participating in the drive and their 1963 allocations, including administration and campaign costs of the United Fund are: Boy Scouts, \$12,500; Camp Fire Girls, \$12,000; Child Guidance Clinic, \$5,000; Prestatue Huis, \$5,000; Salvation Army, \$10,500; Social Service Exchange, \$2,500; Visiting Nurse Association, \$2,000; administration, \$3,375, and campaign, \$5,825.

In addition an allocation of \$16,979 is included for the Michigan United Fund in support of 35 member agencies of the state organization. Of these, 17 are state-wide agencies and 19 are national agencies which work on social welfare problems at the national level.

Attending the meeting Thursday were James Townsend, Arthur Read, Mrs. J. G. Van Valkenburgh, Frank Kleinhessel, Mrs. A. Van Putten, Mrs. Robert Horner, Bruce Mikula, Leonard Zick, Lawrence A. Wade, Clarence Klaasen, David Hanson, Harold E. Denig, John W. Fonger, Rev. W. Hillegonds, Warren S. Merriam, Rev. E. M. Ruhlig, W. A. Butler, Sandy Meek, Wilbur Cobb, Ivan H. WATER

Many people are of the opinion that here in our community there should be a good solution to the water problem.

Many years ago we said that one of these days we would need to go to Lake Michigan for water. Few people believed that this would come to pass in their lifetime as we were continuing to drill wells and there was plenty of water underground.

Now a few years later we have a water supply for the city and some nearby areas. We have a supply large enough for some of the adjoining areas who are badly in need of water. We think that it is about time that we the people in the community come to a meeting of the minds and try and work out the solution.

Yes we know that there are many problems. They will not be solved, however, unless we can find a way to come to a meeting of minds of all the people concerned and then start to work on the solution.

The Holland area is not the only part of the state or the nation that has water problems. We, the people, all use more and more water every day of our lives. We will no doubt continue to do so. We are well aware that more people in the community are bound to need more water, so water has become one of the natural resources that is very valuable. More people should give more and more of their time in helping find the best answer.

We in this area are very fortunate, we think, in being close enough to the big lake so that we can tap this supply. All of these facilities cost money and with the proper cooperation of all the people we may be able to come to the proper solution with the least expense to all of the people concerned. Let's try it.

Rebuilding The Homeland
(Temperance)
Ezra 1:1-3; 3:1-2; 7:6-10

By C. P. Dame

God's workers come and go but He himself continues. He uses one group of workers at one time and another group at another time. In this lesson several names appear which we have not met in the previous lessons. Keep in mind the truth that God is building His kingdom.

I. God controls rulers and leaders. Assyria was a strong nation for a time but it was conquered by Babylon in 606 B. C. when Nineveh fell. For a time Babylon was the great power but in 538 B. C. Cyrus the Persian conquered that nation and then he became the greatest ruler of his time. Rulers and nations differ. Cyrus was gentle and kind and revealed it in his new attitude to the conquered nations. To the Jews he gave the opportunity to return to their homeland. Jeremiah had prophesied that the captivity of the Jews would last seventy years.

When the time arrived God moved the heart of Cyrus to fulfill this prophesy. Many of the captives refused to return for they had become well established in Babylon and preferred to remain there. In all about 42,360 people with their 7,337 slaves responded to the invitation to go back to Palestine. Undoubtedly it was the religious appeal that induced them to return. Many of them had never seen Palestine, having lived in Babylon all their lives.

II. The worship of God is most important. The returned exiles got settled in their new homes in and around Jerusalem. Note the words, "And when the seventh month was come, and the children of Israel were in the cities, the people gathered themselves together as one man to Jerusalem. Why was this vast gathering? It was for the purpose of worship.

This group of people was blessed with two able leaders - Joshua, also called Joshua, the priest, was the religious leader and Zerubbabel was the political leader. The people build "the altar of the God of Israel, to offer burnt offerings thereon." These people showed that worship was just not respectable but essential to a nation. Millions of Americans think differently - worship is something for critical times but not necessary when everything goes well. Pleasure, trips, sightseeing, union meetings, loafing, fixing things around the house, cleaning the car and mowing lawns - these things are far more important. If in a war a city would be bombed out what would be rebuilt first of all?

III. The church also needs scholars. Ezra, the scribe came to Jerusalem in 458 B. C. with about 1,500 people. He is called "a ready scribe in the law of Moses." The Persian king Artaxerxes gave him permission to return and besides provisions for the journey which took about 108 days. Today a plane makes the trip in an hour.

Ezra had a favorite expression - "according to the good hand of his God" - this showed his faith in God's providence. The Bible says that "Ezra had prepared his heart to seek the law of the Lord." Our nation much needs men of this type. So many people today have no aim, they drift along in life, many others have worldly aims in life - they want money, pleasure at any price and standing. Three fine things are said about Ezra - he prepared his heart to "seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments." Knowing God's law should be followed by doing it.

Swainson Leads Group At Allendale

Ceremonies Mark Start Of First New State College in 60 Years

ALLENDALE - Groundbreaking ceremonies were held at the site of the new Grand Valley State College near Allendale Tuesday, but most observers failed to see so much as a spoonful of dirt turned over.

Governor John B. Swainson turned the switch to set off the charge of explosives that was to break ground for initial construction of the college's two classroom units. The charge failed to go off.

Only after most of the several hundred spectators had left the college construction site did the blast occur, marking the start of construction of the first new state college in 60 years.

An estimated 300 persons, including several legislators and educators instrumental in initiating the Grand Valley State College project, were on hand for ceremonies at 10:30 a.m. at College Landing on 42nd Ave., just south of M-50.

Gov. Swainson commended the citizens whose efforts made the start of the new college a reality. He stressed the importance of developing Michigan's educational facilities.

Dr. James H. Zumberge, Grand Valley College President, outlined the basic liberal arts curriculum which can be expected for first year students when the college opens its doors in Sept. 1963.

Dr. Zumberge said the college has instituted a program of interviewing prospective faculty members, and on Sept. 1, will open its admissions office to process applications for its first freshman class. First year courses will include English composition, foreign language, science, history, moral philosophy, mathematics and a course in problems of American Society.

Following completion of his foundation program, a student will be free to select a major field of study in some specialty. Provision will be made for a program of study preparatory to further studies in law and medicine elsewhere.

Other remarks were made by Adrian N. Langius, Director, Building Division, Michigan Department of Administration, and L. William Seidman, Chairman, Grand Valley State College Board of Control.

The first two academic buildings are slated for completion in August 1963, before the enrollment of the first freshman class on Sept. 26, 1962.

A third building, the collegiate center, with funds donated by the Thomas Erler Seidman Foundation, will also be ready for use by the opening date. Construction on this building is slated to begin early in 1963.

Aggregate bid for architectural, mechanical and electrical work on the classroom units was \$1,528,443. De Fouw Electric Supply Co. of Holland had the low bid of \$172,340 for electrical work.

Tractor Tips, Holland Youth Fatally Hurt

A 12-year-old Holland boy was killed Saturday afternoon when the tractor he was driving tipped over backwards, falling on him.

Roger B. Howard, the son of Mr. and Mrs. William J. Howard, of 471 Rose Park Dr., was pronounced dead on arrival at Holland Hospital by Dr. Alvin Bonze-laar, medical examiner.

Ottawa County deputies said the youth was working with a farm tractor in the rear of his home. The tractor had a back scoop with which the boy was moving dirt. Apparently the scoop picked up too much dirt, causing the tractor to turn over backward, pinning the boy underneath.

According to the medical examiner, the Howard youth suffered severe head injuries in the accident.

Roger would have been a seventh grader at West Ottawa School this fall. He was a baptized member of the Rose Park Reformed Church where he attended choir, catechism and Christian Endeavor.

North American Finishes Season

The cruise ship, the S. S. North American, arrived in Holland last week and tied up at the West 16th St. dock, ending its 1962 cruising season.

Officials of the Chicago, Duluth & Georgian Bay Transit Company, owners of the ship, said this is probably the earliest the ship has docked in the past 50 years.

They said the small number of passengers this season is due to the weather which they described as "just not good tourist weather."

The other steamship with its berth in Holland, the S. S. South American, is scheduled to tie up at the 16th St. dock and end its season on Sept. 29.

Grand Haven, North Ottawa School Enrollment Tops Record

GRAND HAVEN — School enrollment has again zoomed upward to record totals in Grand Haven and North Ottawa County this year, as the opening date, Sept. 5, nears. The enlarged Grand Haven community district, which has annexed nine smaller districts, again shows a big enrollment — almost 5,000 youngsters.

The Grand Haven district reported the largest increase in the Tri-Cities and Fruitport area this year, in school population. The enrollment a year ago at the start of school in Grand Haven district was 4,338 and with the addition of the Robinson township district and the Rosy Mound district in Grand Haven township, recently annexed, the total on opening day will climb to 4,840.

Spring Lake's large district, which voted by a large margin last February to "go it alone" and is starting a high school program this year, also jumped. A total of 1,550 children will be greeted by teachers Sept. 5. This is an increase of 165.

Spring Lake will still send 179 students to 11th and 12th grades at the local high school this fall as the village system will have only one grade, grade 10, in its new high school program this year. Fruitport is also building its own high school but will send 85 juniors and seniors here in 1962-1963.

Fruitport school is not located in North Ottawa, but in Muskegon county, but the area has ties with Grand Haven and Spring Lake. This system is growing and has added 2300 children over last year. The total enrollment will be around 1700.

In all, there will be about 8,300 children in schools in the Tri-Cities and in the Grand Haven rural schools this year, including private and parochial units in Grand Haven and Spring Lake.

St. John's Lutheran day school in Grand Haven will be the first to open, Sept. 4, and Fruitport Community Schools will open Sept. 6. All other schools, including Grand Haven public, Spring Lake public, the two Grand Haven Christian Schools, and the two Catholic units, St. Mary's and St. Patrick's in Spring Lake and Grand Haven, will be open on Wednesday, Sept. 5.

Assistant Supt. Steve Mead of the Grand Haven district announced Thursday that there will be no pre-school workshop and conference this year for public school teachers.

Teachers will arrive in time for the annual teachers breakfast at

the High School Sept. 4. The special conference will be tried later this year, in October, Mead said.

The theme of this year's October conference will be "Special Services," and teachers will be acquainted with teaching facilities available in the area.

Schools Open On Sept. 5 In Zeeland

ZEELAND — Zeeland public schools will open their doors for students on Wednesday, Sept. 5, superintendent J. F. Schipper announced this week. The first day will be a half day session beginning at 8:30 a.m. Teacher staff meetings will begin at 9 a.m. on Tuesday.

Schipper says that he expects considerable change in the bus routes for this year because of the transfer of Van Raalte and Robinson school properties to the Zeeland district.

Other factors affecting bus routes are the closing of the Townline and Olive Center schools, with those students being sent to Lincoln and Roosevelt schools in Zeeland. These additional demands for bus transportation will be offset somewhat by the loss of about 12 Forest Grove students by annexation to Hudsonville.

Schipper also listed a number of improvements in buildings and grounds made this summer. They include arranging a new counseling room in the high school, painting 15 classrooms, replastering the girls' shower room, enlarging and clearing the southeast corner of the high school yard by acquisition of the Len Ver Hage property, and repairing the front of the high school building.

The principles of good advertising never change

Advertising is something you do when you cannot send a personal salesman.

And the principles of effective person-to-person selling haven't changed basically since the first man who built a better mouse trap extolled its virtues to his neighbors. Selling by means of advertising (which is really selling to the thousands rather than to one person at a time) still operates according to these same rules which have long been the basis of effective mass-selling.

Surprising as it may seem to those who think of advertising as "a Johnny come lately," these principles were known and were in use half a century ago . . . as you will see when you read this talk given before the Springfield Ad Men's Club on November 7, 1907.

Good advertising is a salesman talking to hundreds of customers at once.

The public is cautious, sometimes suspicious; this is why most advertisers find their task burdensome.

The problem of dealing with human nature is the most difficult of all problems. Silver tongues are needed in exploiting one's wares if golden results are to be expected.

To create a demand is the need of the hour with every business man.

Definite policies must be pursued and the persuasive touch in advertising discovered.

To find the psychological moment for the exploitation of new wares causes concern.

The day has passed when any old thing will do. One must be fertile in ideas.

The coining of new phrases is essential; to study is imperative; nonsense must be avoided and common sense must prevail; percentages must be calculated; conditions not overstated.

To back up religiously everything of his that appears in cold type is every advertiser's duty.

Extravagance in statement is the mother of suspicion.

Make the do-so of your advertisement just a little better than the say-so.

Pyrotechnical advertising loses its value with the dying out of the flare.

It is bad policy to get the best of a man. He'll get back at you some way—some day—dead sure.

The real object of advertising is to inform, not to deceive.

The philosophy of the grafter when he says:

*"Let us then be up and doing,
With a bluff for any man;
And if you can't do everybody,
Do as many as you can"*

must be eliminated.

The question of the How, the Why, the What and the When is a stern proposition to the advertiser.

What is needed in the advertising business is a repair shop for the renovation of old ideas.

To succeed one must possess the ability to transform doubt into certainty.

A good advertisement is the thing that makes a lot of people want to get there first.

Bargain counter people must still be reckoned with.

The cleverest ad-writer is he who can write a line that will make people think a column.

The best advertisement is one that makes a definite proposition.

The shorter the advertisement, the more genius is required to produce it.

Simplicity is essential.

The expert formerly wrote this way—"An exquisite and delightful apparel conception for juvenile wear." Now he puts it—"A pretty little coat for the baby."

The printed page cannot appeal directly to any of the senses except the eye, but the argument may be of such a nature that the reader's senses are appealed to indirectly through his imagination.

The nervous system which does not respond to sound or to any other of the sensible qualities is a defective nervous system. Advertisements are sometimes spoken of as the nervous system of the business world.

That advertisement of musical instruments which contains nothing to awaken images of sound is a defective advertisement.

That advertisement of foods which contains nothing to awaken images of taste is a defective advertisement.

The survival of the fittest seems to be a law of advertising as it is of everything else that develops. Traditionally, the practical business man scoffs at theory. If ever there was ground to expect sarcastic and pessimistic prophecies from the hard headed business man, it was when it was proposed to establish advertising on a theoretical basis deduced from psychology. Such adverse criticism has, however, been the exception.

The American business man is not afraid of theories. He wants them, and the more the better. The advertisement writer is really a psychologist, since he seeks to influence the human mind.

Human nature is a great factor in advertising success and he who writes advertisements without reference to it is apt

to find that he has reckoned without his host.

If we are to find and to express the psychological laws upon which the art of advertising is based, we shall have made a distinct advance, for we shall have added the science to the art of advertising.

The mere mention of psychological terms, habit, self, conception, discrimination, association, memory, imagination, perception, reason, emotion, instinct and will, should create a flood of new thought that should appeal to every thoughtful consumer of advertising space. The up-to-date business man should leave off groping in the dark and come out into the open.

Just how extensively an article will sell, depends upon just how good or bad the copy is—that is, how explicit or convincing it is.

Let me say a few words about good copy.

Good Copy

FIRST. There must be a definite motive or purpose. Be specific as to your central idea. A well defined idea to which the wording lends itself harmoniously and effectually and which convinces, while it attracts and charms.

SECOND. Your copy must be full of life. Action begets action. Good things happen when Energy gets chummy with Enterprise.

Good copy is the poetry of advertising. It is taking a plain fact and making it plainer and more impressive by the art of the language. It is a song which lures and educates and prompts to action.

THIRD. Take the position of the prospective buyer. Would you be influenced by your own advertisement? A wise plan after writing the ad, is to step out of your position into that of the position of the purchaser and see if you have made clear every point that would tend to influence you to buy the goods.

FOURTH. Vary your copy so as to reach different types of people. To make a successful bid for the patronage of the public, the whole social order should be studied and carefully considered.

To stoop to the use of second rate copy and to buy cheap designs to fill expensively paid-for space, will ultimately show in decreased profits leaving in the minds of the readers a question as to the quality of your goods.

FIFTH. Know all you can about the goods you advertise, their manufacture and uses. The man who is most conversant with the details of the manufacture and use of the article can best tell others about it. You must believe in the merits of your own goods.

SIXTH. Study the idea of leadership, of leading and influencing others.

It is growing more difficult to strike a new line of expression because advertising has grown to such enormous proportions and has drawn into its surface so many varied talents, that to hit upon something new can almost be considered a discovery.

SEVENTH. Read the classics for new ideas and improved forms for expression—Shakespeare, Emerson and the Prophets of the Old Testament. The writings of David in the Psalms indicate that he was a past grand master of expressive word weaving. He was especially effective in the direct command and in the harmonious reiteration of an idea. You would do well to note how he could start the interest and work towards the climax.

EIGHTH. Feature your advertisement to suit the times and seasons.

NINTH. Study your prospective buyers, first, with the idea of reaching a possible need; second, with the intention of supplying it in a superior manner.

TENTH. Always keep before you the question, "Will it bring results?" That should be both the first and the last question in judging good copy. You may have burned the night oil, written and re-edited and given to the sharp teeth of the type your masterpiece, and then left out the very necessary feature that makes for results.

Finally, your copy should be ready 24 hours before the enterprising newspaper men call for it.

Reflection frequently uncovers a multitude of errors.
