Will Focus on the Family

Financial Aid:
'Wait and See'
Attitude Urged

Heart Attack Claims 'Doc' Green
Foreign Studies Scholarship Is Tribute to Dr. Fried

A scholarship fund intended to help students broaden their international perspective through overseas study has been renamed in honor of Hope College history professor Dr. Paul G. Fried.

Dr. Fried was founder of the Hope College Vienna Summer School and until this year director of the College's international education program. He is now devoting full time to teaching; the scholarship fund was created in 1968 as the Vienna Fund by persons who had studied in the Vienna Summer School. Its purpose was to encourage cultural contacts by students going abroad under special emphasis on making it possible for students from Austria to study at Hope College.

To commemorate the 25th anniversary of the Vienna Summer School and in tribute to Dr. Fried for his contributions to Hope College, the fund has been designated the Paul G. Fried International Education Fund.

The purpose of the fund has been broadened to provide an overall international education experience, according to Hope College President Gordon J. Van Welen. Dr. Van Welen noted that former students have joined friends and colleagues of Dr. Fried in contributing to the endowment fund as a expression of their appreciation to Dr. Fried and his personal interest in the fund's distinguished leadership in international education.

Dr. Fried was born in Leipzig, Germany, and received his early education in Germany and Austria before entering Hope College as an undergraduate in 1940. The Second World War interrupted his studies and took him back to Europe as a United States soldier in the 35th Infantry Division and the Military Intelligence Service.

Following the war, he completed his B.A. at Hope and a master's degree in history at Harvard before returning to Germany as a translator for the Nuremberg Trials. After earning his doctorate in German history at the University of Erlangen, Dr. Fried spent another two years in Germany as a civilian employed by the United States Army Air Corps Historical Research Division before joining the Hope faculty in the fall of 1953. Three years later he organized the Hope Vienna Summer School.

After dividing his time between history and international education for the past 25 years, Dr. Fried returned to the history department on a full-time basis this fall.

In recent years he has also developed considerable interest in local history and is working on a biography of Dr. Gerrit Kollen, third president of Hope College. He serves as a member of the Hope College Archives Council and is an advisor to the local chapter of Phi Alpha Theta.

Dr. Fried is an active member of the College's chapter of Sigma Delta Pi, the National Italian Honor Society, and the German American Cultural Society.

Armand Nicolai, Letha Scanzoni and John Scanzoni

Symposium Will Focus on Family

(continued from page 1)

this following the president of the first two symposiums which grapplled with issues related to the Middle East conflict and the economy crisis. At the same time, Myers notes that the topic has immediate personal relevance which should attract many participants. Although some sociologists, including guest speaker John Scanzoni, have argued that the family is simply a state of change rather than crisis, Myers believes that this year's topic is appropriate for the critical issues format.

Research of material have been written on the changing family. The divorce rate has doubled in our lifetime. The so-called traditional family—one in which the wife stays home to care for the children while the father goes off to work—is now well under 25 percent of the total. Clearly, the changes in the family are dramatic enough and the issues related to that change are significant enough to warrant our attention and discussion.

by Marla Hoffman

Student Volunteers Become Carpenters, Gain Understanding

When most people head south during Christmas break, they do it for sunshine, warm weather and a chance to relax over the holidays.

This past Christmas, 10 Hope students travelled to the warmer southern climate, but a work project proved their incentive. Sponsored through the Chaplain's Office and funded by the "Christmas Tree Fund," Mike Bast, Evan Boothe, Gary DeWeerd, Dave Grovenwold, Shari Jilmian, Max Koolen, Robert DeKane, Scott Re-Noss, Matt Vanderlich and Freea Westerveld spent Dec. 20-Jan. 10 in Atlanta, Ga., participating in "Habitat for Humanity.

Habitat, as the student volunteers eagerly explain, is a non-denominational organization which attempts to share Christ's love by providing housing for underprivileged households. Funded by Millgard Fuller, its efforts take effect both here in the United States and far away in Zambia.

Fuller himself is a lawyer and businessman whose re-evaluation of his lifestyle has led him to reach out in concern for others, especially in efforts to improve their living conditions.

None of the volunteers was quite sure what to expect when they left Hope College. On arriving in America, they soon discovered that Habitat is working to change the face of poverty-level housing in a city where the contrast between rich and poor is almost overwhelming.

Where one area inclines include smaller homes, another area includes very large homes. Fuller's goal is to involve those who live in the houses in the works of renovation, and then help these people obtain ownership of their own homes.

Because Habitat is a non-profit organization which depends heavily on volunteer labor and donations, homes are built at extremely low cost. Part of the rebuilding of communities involves the purchase of the reconstructed homes by the community members themselves, under the promise that a greater sense of well-being is established through ownership than through renting. Homes are cared for, at far more than average rates; as ownership responsibilities are established, Habitat maintains.

"I've been given to think through many people, but I've been given to think that I've really been given to think through what I've given to others," Freea Westerveld said after her trip to America, and her sentiments reflect the feelings of the whole group. Shocked by the obvious dividing line between rich and poor, the volunteers were eager to discover that it is possible to do something about poverty rather than simply recognize that it exists.

For 10 days in January, "doing something" involved offering energy to help remove building material from the homes. The Hope volunteers joined other workers at sites where work was in progress. Office work was one option available to the volunteers, but the Habitat projects were preferred to participate in on-location tasks, including the demolition of one home, the reconstruction of another and the remodeling of a third building which will serve to house other Volunteer students in the future.

It helped deepen understanding of other difficulties, according to Evan Boothe. "What do you do? First you have to be aware of the problem. Then you have to evaluate what can be done, and you have to have the faith to carry through on that.

Work was the key factor in the trip to America, and the group was able to recognize the progress made by their efforts. Yet all agree that while the physical labor they offered could only make a dent in the overall problem, it taught them the value of Habitat, the learning that took place through this experience was all-important. As Shari Jilmian explains, "I just never realized how rich I was. I have central heating and running water. I just took everything for granted before I went down there."

Financial Aid: "Wait and See"

(continued from page 1)

although aid packages, the percentage of part-time scholarships and grants is going down and the overall student burden through loans and employment is on the rise.

"There is no question that we're entering an era of greater family sacrifice as it comes to financing a college education," he says. "Families are going to have to be more willing to accept loans as part of their financial aid package.

Next year, for example, the amount a student can receive through a Federal Guaranteed Student Loan will be subtracted from the student's aid figure, and thus will become part of the financial aid package. In the past, this loan program was not tied together but was considered a separate aid source.

As long as the Guaranteed Student Loan program is available—and it looks as if it will be for at least the next couple of years—I think that the dollars a student needs to attend Hope College will be available," Hembrough says.

Parents and currently enrolled students are reminded that in order to qualify for any form of financial aid, a Financial Aid Form must be initially filed. The filing deadline for currently enrolled Michigan students is May 15, 1982, for Michigan residents and above the dollars available through their financial aid package. The Guaranteed Student Loan program is not being cut in Reagan's proposed 1983 budget, although proposals are being discussed which could include higher origination fees and interest rates.
God Rest Him

More than most, Larry Green performed the work of his life in public—on tennis courts and football fields; in classrooms and training rooms; on college campuses and team buses—and more than most he liked it that way. He was an outgoing man, and his natural laugh often in the memory. Yet there is the sight that remains of him on the sidelines at a football game, standing alone and still through a whole series of plays, his hands thrust into his jacket pockets. He was a shape of stability and permanence among the changing shapes and faces and the motion of the moments.

Doc loved sports and those who play them, but he never let either one get out of perspective. He maintained a cheerful discrepancy toward those who took sport too seriously, and a healthy suspicion for those athletes with exalted notions of their own indispensability. Around the coffee table he was seldom silent, but when a fan would say doom over the loss of a star player I've seen him run away. He wouldn't explain that the game would go on, but the message was there. Everybody who remembers him will remember his lifelong connection with athletics, but those who remember only that part of him are missing the best. Doc loved people and laughter; he loved to tell stories and hear them. He had an uncanny eye for pompous and inflated ego, and the wit and the timing to deflate the ego and defile the pompous kindly and cheerfully.

Senior is Academic All-American In Football for Second Time

Hope College senior Mark Spencer has been afforded Academic All-America honors for the second year in a row by being named the college division's second-team quarterback.

The Academic All-America program is sponsored by the College Sports Information Directors of America (CoSIDA) and sanctioned by the NCAA. Players are nominated by coaches and sports information directors. Nominees are required to be regulars on their squad and maintain a minimum 3.0 cumulative grade point average (GPA) on a 4.0 scale.

Spencer had been voted first-team quarterback for the Great Lakes college division all-academic football squad and was among seven nominees for Academic All-America. The first-team quarterback is Mike Miller of Southwest Texas State University, whose team won the NCAA Division II national championship.

Spencer is an economics major and carries a 3.7 GPA. He has been named to the Dean's List every semester and last spring was voted to the Mortar Board national honor society. He serves on the campus athletic governance committee. He is the son of Dr. and Mrs. John R. Spencer and is a 1978 graduate of Traverse City High School.

Spencer led Hope to three NCAA championships during his career, including this year.

Do I want to go to college? What is it really like? Can I make the grade?

Get the answers at this Hope College on-campus program

Exploretion'82

Explore the possibilities of a college education through classroom experiences, extra-curricular activities, and free time. You will live in college housing on a college schedule and learn from college professors. Gain a greater knowledge of yourself and your abilities, you will be better prepared to make a decision about college in the future.

Exploretion '82, for high school students who have completed their sophomore or junior year, begins Sunday evening, August 1, and continues through Saturday, August 7.

Morning classes are offered in various academic areas, career planning, campus life, and college admissions. Free time allows for trips to Lake Michigan, theatre productions, Christian Fellowship, and use of Hope's new physical education center.

COST: Tuition, board, room for the week $125.

TRAVEL: Special arrangements being planned.

What's Happening at Hope?

The Arts

March
- Master Class: Mendelssohn String Quartet; Wethers Aud., 3:30 p.m.
- Visiting Professor Series presents Mendelssohn String Quartet; Dimnent Chapel, 8 p.m.
- Film: "Mousetrap"; DeWitt Cultural Center, 8 p.m.
- Senior Recital: Noelle Winters, organist; Dimnent Chapel, 8 p.m.
- Art Exhibit: "Visual Art Faculty," Dimnent Chapel, 8 p.m.
- Alumni Banquet, April 3-5
- Live Theatre: "The Fantasticks"; Hope College Student Theatre, 7:30 p.m.

April
- Dance Performance: Dance VIII; DeWitt Center, 8 p.m.
- Music Department Student Recital; Dimnent Chapel, 8 p.m.
- Recital: Bryan Uecker, piano; Dimnent Chapel, 8 p.m.
- Senior Recital; Nancy Fair, choir and chamber ensemble; Wethers Aud., 2 p.m.
- Faculty Choral Music Concert; Wethers Aud., 4 p.m.
- Hope College Gospel Concert Band with Armando Chidial, trumpet; The Hope College Chorus; Dimnent Chapel, 8 p.m.
- Music Department Student Recital; Wethers Aud., 7 p.m.

May
- Opera Scenes, Wethers Aud., 8 p.m.
- "Under Milk Wood"; DeWitt Center, 8 p.m.
- 2-12-15 Tulip Time Organ Recitals; Dimnent Chapel; Twenty minute programs given every half hour from 11 a.m. to 6 p.m.

Alumni Weekend
May 7-9

Reunion
- 0-Year Circle: Jan Togelius
- Class of 1932: Louis Damrau
- Class of 1937: Dorothy Tucker Suppes
- Class of 1942: Lorraine Timmer Bartsch
- Class of 1947: Edna Van Tatenhove Haworth
- Class of 1952: William Rowes
- Class of 1957: Norman Beery
- Class of 1962: Robertl Rustell Pons
- Class of 1967: Susan Rontvedt Neiders

Saturday, May 8
Alumni Banquet, Phelps Hall, 5:30 p.m.
Sunday, May 9
Baccalaureate, 11 a.m.
Commencement, 3 p.m.

1982-83 Calendar

Fall Semester
- August 25-26 Residency Halls Open, 4 a.m.
- September 6 (Labor Day) Fall Break
- October 11-13 Homecoming Weekend
- October 29-31 Parent's Weekend
- November 26-29 Thanksgiving Break
- December 10 New Registration for Spring Semester
- December 17-18 Last Day of Classes

Spring Semester
- January 9 Residence Halls Open
- January 10 Classes Begin
- January 11 Winter Recession
- February 18-22 Spring Break
- March 15-24 April 4 Critical Issues Symposium
- April 8-12 Spring Recession
- April 15-19 Spring Break
- May 2-6 May Day
- May 7-8 Alumni Weekend
- May 8-9 commencement
- June 9-12 Summer Session
- June 19-22 Goucher College Reunion

Chapel Choir
1982 Spring Tour
- March 19 Emmanuel Community Reformed Church; Lansing, Mich.
- March 20 Emmanuel Reformed Church; Woodstock, Ontario
- March 21 Tennis & Lunch (Dine Inn), Woodstock, Ontario; Brighton Reformed Church (Evening)
- March 22 Rochester, N.Y.
- March 23 First Reformed Church; Wyanneal, N.Y.
- March 25 First Reformed Church; Lockport, N.Y.
- March 26 First Reformed Church; Middletown, N.Y.
- March 27 Dutch Reformed Church; Oakland, N.J.
- April 1 Abbe Reformed Church; Coatby, N.Y.

Chemistry Department
Seminars
- Every Friday Afternoon
- If you would like to be put on the chemistry department's weekly mailing list, write to the Hope College Chemistry Department, DePere Hall, Hope College, Holland, MI 49423.

Critical Issues Symposium
March 3-4
Theme of the 3rd annual symposium will be Relationships in Transition: The Future of Marriage and the Family. See page one for details.

Curriculum Development for Gifted

Thursday, April 25
A colloquium for students held October 31, convened by Nancy Johnson, it will deal specifically with curriculum development for gifted children. Designed for teachers and administrators. For further information contact Prof. Nancy Miller (610)392-5111, ext. 3302.

Eastern Bus Trips
March 30 to April 3
Each year Hope sponsors bus trips for students from the East Coast who are interested in visiting the campus. The next trip is scheduled for March 30 to April 3. It will leave Albany, N.Y., and travel west through New York State and into Hope. For the cost of the trip will be $350 per person which includes transportation, housing and meals. For further information contact Admissions Representative John Weyers, (214)415-2908 or Dr. T. Razers, 231 Central Ave., Seward, Nubia, (518)335-7080.

Exploration '82
August 1-7
Exploration '82, for high school students who have completed their sophomore or junior year, is intended to help students explore the possibilities of a college education. There are classroom experiences, extra curricular activities and free time. Students will live in college housing, learn from college professors, and participate in college life. For further information contact Mary Kraai at the Admissions Office, (610)392-5111, ext. 1200.

Guest Lecturer
March 10-12
The political science department will sponsor the visit of Catherine May-Bedell, a member of the International Trade Commission and former member of Congress. Included in her campus presentations will be an address to Model United Nations for high school students. A schedule of her campus addresses may be obtained from Prof. Jack Holmer of the political science faculty, (610)392-5111, ext. 1048.

Junior Day
Friday, April 25
A special day geared toward the high school sophomore or junior that will bring together the college search experience. Parents are encouraged to attend, too. Contact Office of Admissions for further information, (610)392-5111, ext. 2200.

Model United Nations
Friday, March 12
The 10th annual Model United Nations will involve over 500 high school students from Michigan and Ohio. The UN is designed to give high school students the opportunity to take on the roles of professional diplomats with the goal of achieving a particular country's national objectives while at the same time fostering a desired international consensus.

Playbill
The theatre department will present four productions during the school year in the DeWitt Student and Cultural Center. The box office opens approximately two weeks before each show. For information and reservations call (610)392-1449.

Pre-Med Day
Tuesday, April 6
This morning seminar is designed to tell high school junior what is involved in a pre-medical career. Students and their high school counselors will observe a class typically taken by pre-medical students. Listen to our faculty describe preparation for and acceptance to medical schools, and talk with current Hope College pre-medical students. A $2.50 registration fee will include lunch for the Hope College campus. Students wishing to attend should have the recommendation of their school counselor. Contact the Office of Admissions, (610)392-5111, ext. 2200 or your high school guidance counselor for further information.

Spring Sports Schedules
The snow is still deep in Holland but thoughts of spring sports competition are on the minds of many people. Spring sports action includes track and tennis for women and men, baseball and softball. Lacrosse is a club sport. Copies of spring sports schedules may be obtained by writing the Office of Information Services, Hope College, Holland, MI 49423.

Vienna Summer School
Deadline for submitting applications for the 26th annual Hope College Vienna summer session is April 1. The program is open to students and may include students from all ages who have completed at least one year of college at an accredited institution. The program begins June 5 and consists of two three-week academic sessions concluding July 16. The program includes many cultural activities and weekend excursions as well as an optional study tour. Information may be obtained from Dr. Neil Schoen, Director of International Education, (610)392-5111, ext. 1717.

Visititation Days
March 5, April 16
Designed for prospective Hope College students, transfers, high school juniors or seniors who are interested in enrolling for the fall of 1982. Students and their parents are invited to spend a day on campus meeting with students, faculty and staff. Registration begins at 9 a.m. at Phelps Hall. Contact Office of Admissions for further information, (610)392-5111, ext. 2200.

Young Authors' Conference
Thursday, April 15
A conference for young children in grades K-6, share books they have written under the direction of their teacher. The conference is designed to encourage teachers to have children write, to motivate children to write and to demonstrate to children that others write and are interested in what they write. At the conference children participate in a variety of creative imaginative activities. For further information write to Mr. and Mrs. Richard Smith (610)392-5111, ext. 3030.
Dual Career Marriages
A Case Study

by James C. Piers

In recent years, dual-career marriages have become increasingly common in the United States. Among these are many young couples who find that the traditional model of husband as breadwinner and wife as homemaker is not what they want or need. A study was conducted to explore the lives of two couples—David and Martha—whose careers are equally important in their lives.

David and Martha are part of a growing number of dual-career couples who are successful in their respective fields and are committed to their marriage. The study shows that these couples often have a difficult time balancing their careers and personal lives, but they are committed to making it work. They have found ways to communicate effectively, make time for each other, and support each other's goals. The study also highlights the challenges that these couples face, such as the lack of flexible work schedules and the need to find child care. Nevertheless, the study concludes that dual-career marriages can be successful, as long as the couples are committed to making it work.
Faculty Colloquium Promotes Dialogue

"Even as a liberal arts college, faculty members too often fail to talk to each other about what presumably matters most to us, what we think about."

That opinion formed the impetus last spring for Hope's first Faculty Colloquium on Classic Texts, an off-campus, weekend seminar designed to promote faculty development and collegiality through intense focus on a particular text. Because of the success of that first experiment, a second colloquium was held in late January and faculty planners hope the event is on its way to becoming part of each semester's calendar of events.

A large part of the appeal of the colloquium, inspired by the University of Chicago's Midwest Faculty Seminars which have been attended by several Hope professors, is that it allows for prolonged discussion in an academic "Alphabetic soup" environment which brings together professors from a variety of fields of expertise. As one participant has noted, "I knew my colleagues socially and politically before this, but I never had a chance to discover how they use their minds."

This semester's colloquium participants read and discussed Sigmund Freud's Civilization and Its Discontents. The colloquium was held in the recent setting of Herman Miller, Inc.'s Metropolis Lodge on Lake Michigan, making it easier for participants to have a sense of getting away from one's familiar frame of reference and encountering other points of view. Several small group discussion sessions led by Prof. Wayne Boulton of the religion department and Joe MacDowell of the communication department, were complemented with a lecture by Randall Mason, president of the Center of Religion and Psychotherapy in Chicago.

Civilization and Its Discontents was chosen because it is a cumulative work in which Freud discusses several of his theories. It also seemed appropriate for Hope professors' attention because of its frequent observations on matters of religion. Floyd Johnson noted that at Hope, at least, Freud seems to be taken more seriously by literary critics, historians and theologians than by psychologists. An ancient classic, Plato's Republic, was the focus for last year's colloquium.

According to John Cox, chairman of the faculty ad hoc committee which has planned the two colloquiums, an area of inquiry is eliminated from the "classic text" designation, although those who originated the colloquia believe that "combination of human thought and literature" — as opposed to "temporarily popular works" — should be selected. Cox reports, "We hope to read (future colloquial) texts in the sciences, social sciences and the fine arts. "

"Classic texts have not appeared only in one or two fields of inquiry, and we hope to respond to the richness of human heritage in this colloquium."

The vitality of the colloquium seems to derive from the fact that they have been created, planned and carried out by faculty members, on their own initiative. Hope's chief academic officer, Provost David Marker, has pointed out that intellectual activity of this sort is something college leaders can only hope for if they try to achieve it by mandate: its goals are never achieved. The first colloquium was funded by a grant from the Danforth Foundation. This year funding came from Hope College's own faculty development fund.

"Plans are for next year Galilee or Beijing or Adam-Smith. The focus will change and maybe even the format will change, but future colloquia will continue to give ample evidence that at Hope College scholarship is indeed a community affair."

Van Raalte Sculpture Finalists are Named

Finalists in an outdoor sculpture building competition sponsored by Hope College have been announced.

The college plans to commission one or more sculptures to create a work for placement in the newly renovated Van Raalte Commons, a pedestrian mall recently constructed through the middle of the campus.

Proposals for the competition were received from 39 artists from Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio and Wisconsin.

Elson Foundation has announced that the artists will be invited to submit models of proposed sculpture, from which judges will choose from one to four artists to be awarded commissions.

Finalists include: Len Fordeyce of New Carlisle, Ohio; Tom Gilmore of Des Moines, Iowa; Raymond Lee Johnson of Northfield, Minn.; Stuart Luedman of St. Paul, Minn.; Edward McCullough of Carbondale, Ill.; Judith Ann Moses of River Falls, Wis.; Robert Parrish of Winona, Minn.; Ronald Pelton of Grand Rapids, Mich.; Gary Reaves of Cincinnati, Ohio; Stanley E. Sheler of St. Cloud, Minn.; and Bruce White of Springfield, Ill.

Judges for the competition were architect William Gilmore of Midland, Mich.; critic Corinne Robbins of New York City; and John M. Wilson, a member of the Hope College faculty who is an art historian. Sculptor Clement Meadmore of New York was unable to participate because of illness, but will judge the proposals of the finalists.

The finalists will submit proposals in the form of models which will become part of an exhibition prior to the selection of works to be commissioned.

Although the artists have a great deal of freedom in choosing both their medium and their style of expression, they are asked that their work "reflect the character of the site of Albertus C. Van Raalte and also the quality and Christian commitment of Hope College."

The committee hopes to have the winning sculpture installed by next fall to coincide with the opening of the College's new DePree Art Center.
Opus

Poetry is selected from the autumn, 1981, issue of Opus, the student arts magazine. Photography by Heather Molnar, a junior from Shaker Heights, Ohio, who attended the New York Arts Semester studying photography and painting.

GUITAR PRACTICE
As her guitar thurns in quiet harmony
with the drizzle licking the porch.
I can barely rescue her tune from the rain.
I shut my eyes
intent on scooping up the stray notes
that edge around the corner
and slip beneath the cracks of her closed door.
Fragmented symphonies
are composed in my ears
like whispers that sometimes explode into words.
The notes carry me
like the first autumn leaves
tossed into falling rainbows by the wind.
I get lost somewhere worlds beyond her simple song
plucked so carefully—with hopes that no one can hear.

Heather Uecker,
a junior from Grand Rapids, Mich.

FOOD FOR THOUGHT
Lying on a waffle
counting graham crackers
so I could sleep
I thought, How strange is life!
Awake, I combed berries from my hair,
brushed muffin crumbs off of me,
washed with milk,
and anointed myself with a cherry.
The orange was just rising
off a piece of toast
when I hopped into
my 5-speed 'Ham-on-Rye'
and drove down chocolate roads
over lemonade pools to school.
I learned nothing.
Then I went to the shore
to watch the wine splash
against the cookies.
A sausage was sailing across the edge
where pink cotton candy engulfed it.
The orange had set.
Black coffee and hot chocolate were in the sky.
No marshmallows would shine tonight,
not even the crescent banana hung in the night.
It was one of those Hungarian Goulash nights
when turnips, liver and spinach
roamed the streets.
It was late: half past peppermint,
when I got home, but safe
and fell
contentedly,
asleep,
on my waffle.

David A. Stegink,
a senior from Grand Haven, Mich.

STREET PEOPLE

VICTORIA
"A time to get, and a time to lose;
a time to keep, and a time to cast away." Eccl. 3:6
Boasting waves unbalance her diary
casting her feet uneven along the beach.
Trapped within a weekend sweater
arm against arm
she writhes, tangled
to grasp the first stone.
Separately
Chopin and tea beckon
from the firelit room.
Hurling stones into the frantic grey
she sees
amid the waves
the rock immovable.

Gwen Werner,
a junior from Ann Arbor, Mich.

LIBRARY
my art
teacher looked at the
fat crooked tree and strolling
valley I had painted,
and he said "abstract it" well
I thought not but anyway called
The tree out
it stepped over the frame by
the roots—grew fast, too,
climbed to the roof. I
asked the grass to be more contained,
and it flowed out in bristles
packed itself close like
velvet and the valley; well, he
dropped out of nowhere, I
thought I was going to die

All the tables and
books were at the
bottom, art and I crawled
out of them all that he said was
"very nice"

Wendy Hanson,
a junior from Harrisonburg, Va.
Home Schooling
Faculty Family Discovers Learning Without Boundaries

"The fatal pedagogical error is to throw answers, like stones, at the heads of those who have not yet asked the questions."

Paul Tillich
by Eileen Bevins

Home-schooling is a term which some people equate only with wilderness settings or prehistoric life. But in recent years, people have discovered that home-schooling is not only a viable alternative to traditional education but also a way to provide a more personalized and engaging learning experience. Here, we explore the experiences of one faculty family as they navigate the world of home-schooling without boundaries.

Karen Cox, an early education consultant with 15 years of teaching experience at several levels in various types of schools, and her husband, John, have found that home-schooling allows them to create a learning environment that is tailored to their children's needs.

"Our children learn at their own pace and in their own way," Karen explains. "We believe in the value of individualized education and the importance of connecting children with their own interests and passions."

The Cox family began their home-schooling journey after the children expressed a desire to learn about something outside of the typical classroom setting. Karen and John, both experienced educators, decided to explore home-schooling as a way to provide a more flexible and engaging learning environment for their children.

"We felt that the traditional system was not the best fit for our family," John says. "We wanted to create an environment where our children could learn at their own pace and in a way that was meaningful to them."

The Cox family has discovered that home-schooling allows them to create a learning environment that is tailored to their children's needs. They have found that home-schooling provides a way to connect children with their own interests and passions, allowing them to learn in a way that is meaningful to them.

"Our children are actively involved in all aspects of their education," Karen says. "They have the opportunity to explore their interests and passions, and we support them in their learning journey."

The Cox family believes that home-schooling provides a way to create a more personalized learning experience that is tailored to the needs of each child. They have found that home-schooling allows them to create an environment where children can learn at their own pace and in a way that is meaningful to them.

"We believe in the value of individualized education and the importance of connecting children with their own interests and passions," John says. "We want our children to learn in a way that is meaningful to them, and we believe that home-schooling provides a way to do that."

The Cox family has discovered that home-schooling provides a way to create a more personalized learning experience that is tailored to the needs of each child. They have found that home-schooling allows them to create an environment where children can learn at their own pace and in a way that is meaningful to them.

"We believe in the value of individualized education and the importance of connecting children with their own interests and passions," John says. "We want our children to learn in a way that is meaningful to them, and we believe that home-schooling provides a way to do that."

If football statistics, photographs, and feature articles have nothing else in common, they might just as well be tossed together in a file like columns from heaven, and all of them are part of a process whereby Hope College communicates the best of "what is" to its interested constituents.

This process—"what is" is best described from the perspective of those individuals responsible for News From Hope's publication and printing staff. The paper's philosophy is best defined by those involved in its production, by a practical philosophy of what the College intends or what the paper will print.

High on the north wall of an upstairs room in the Alumni House is a wooden letter "I," in a neat row. The matching "M" is an emblem of a familiar brown Lincoln log that began to be explained.

"Do you know what those stand for?" asked Robert DeYoung, vice president for Development and College Relations, pointing to the "I." "The first is identity-your marketplace; the second involves a購ire the people in a creative way; the third is interest them; the fourth is involve them; and if you do the first three properly, the fifth is they're going to inves.

Tightly bound up in the word "inves" is the word contribution, which suggests the possible criterion that News From Hope is a fund-raising vehicle, imaginatively wrapped.

"I indirectly thought of it in those terms," admitted DeYoung, "but we haven't used it as a fund raiser in order to accomplish the mission of the College we need the involvement of a lot of people. Out of that comes support, time, treasures, and resources. It's the way we share the ongoing light and mission of the College.

Although the "I" and "M" is not easy philosophy to pin down, Edie Tom Reinholt and DeYoung share simliar views concerning Hope College and its goals. Heavy-minded censorship by the administration does not exist; the relationship might better be described as a gentleman's agreement.

"I don't censor," explained DeYoung, "I don't even read the paper before it goes to press. There have been occasions when I wondered about an article; I expressed my concern and that was enough for me, it's been well taken."

Building B on Herman Miller Inc.'s main site in Zeeland, Mich, was once used for factory production. With its new content center, resource center, and lounge, it still has gigantic air ducts suspended from the ceiling like white submarines. The building continues to house a product of sorts: people who think and develop new ways of communicating Herman Miller's furniture line. Deb Hall, '80, a communications specialist for Herman Miller and the first student reporter for News From Hope, is adept at juggling food and questions during her time here.

"I'll be indebted to Tom [Renner] and Edie [Beyer, the editorial assistant]," said Hall. "They challenged me. They let me indulge in a lot of what I had to write. I could come up with my own approach on a topic they'd assign."

Students of the Information Services department have been a number of other students who have applied their skills to the newspaper. Why use students on the college newspapers use full-time reporters.

The impression was they wanted me to stay a student... I had my college life too. They wanted me to think like a student, to have a student's perspective. Issues will always come up that deal with the administration and the student body. It was a perspective that I gained by being isolated. I maintained my identity. I know, too, that Tom Renner was interested in giving students practical experience, a world that without the student having to go to New York or somewhere else to get it.

Because hindsight is valuable, the question "What if you were the editor?" seemed justified. I was relatively naive as a student regarding the purpose of organizational communications. I've learned a lot in a year and a half. Now I don't think I'd change anything that News From Hope does content-wise. There are other things related to design I might change as a result of my experience at Herman Miller."

Three brown medieval doors from the chaplain's office you'll find the Office of Information Services. The modernization of the building disrupts when you open the door and greet Renate Spakes, office secretary, poised in front of an IBM Display Writer. A small computerized word processor which somewhere soon will be sending stories and other information via telephone lines to the printer. Tucked away in a corner of the Information Services office is Elleen Beyer, '70, theHarold editorial assistant, conjuring stories over her typewriter.

To questions concerning editorial freedom and the newspaper she helps to produce, she thoughtfully responded.

"I don't think anyone pressures us. We try to be responsive to suggestions, but we make the final editorial decisions. We have a pretty thorough understanding of the goals of the administration and the image it seeks to promote. News From Hope is a public relations publication. Somehow, when you say that, you assume you've abandoned all standards of what is professional. I don't think that's being done in any way."

"When it comes to our story log, it's understood that we make the final decisions. Sometimes we need to re-emphasize this policy; we find most people understand us when they realize we only have so many pages to work with and that our budget won't allow for more."

The information, pictures, and stories that go into the story log are the products of: past, present, and future. From a bulging story file in the editorial assistant's office comes an assortment of ideas for the story log of each issue. Beyer gathers this information from helpful readers, sudden flashes of inspiration, the editor (who loves series stories) and other publications, most notably college newspapers and magazines.

She uses other college publications' story ideas, format design, etc. as springboards for Hope's newspaper.

Other sources for articles usually suggest themselves. What are the professors up to academically, artistically, and in their personal lives? What building is being up? What building is burning down? What's happening in sports? What's happening in alumni? How can the newspaper with the appetite of its readers for future events? These are simple questions out of which sometimes complicated articles are born.

News From Hope does the job it was originally designed to do, not only because its editorial staff is very passionate about Hope College, but because in Hall's words, the College is "doing good things that are known, which makes a Madison Avenue approach to public relations unnecessary.

The newspaper is not avant-garde; neither is it a hidebound, ultra-conservative mouthpiece of the administration. However you want to define Hope College, News From Hope seeks to portray those things which define Hope at its best—reverses Neewspaper's motto: "We don't break the mold. We fit it."
Nobel Prize Observer

Douglas Neckers’ 60th Ph.D., head of the Bowling Green State University chemistry department, was invited to attend the presentation of this year’s Nobel Prize in chemistry. Neckers has spent his career in polymer chemistry and has taught at Kalamazoo College for 50 years. The presentation was held in Stockholm, Sweden.

‘K’ College Prof Honored

Donald W. Van Liere ’39, Ph.D., has retired as professor of psychology at Kalamazoo College after 52 years on the faculty and has been granted emeritus status. Further accolades include the naming of the Kalamazoo College psychology laboratory in his honor. He has been involved in community psychology laboratory since 1963.

Job-Seeker Workshop Offered

Out of choice or necessity, more people than ever are considering career changes these days, reports Dale Austin, director of Hope’s Placement and Career Services. Many of these job-seekers went through college before the days of a Career Center and so it may seem like a high-risk adventure. Other more recent graduates might be looking for a different kind of career-guidance than that which they received in college—now they want something more relevant to their current situation as experienced professionals.

Faculty, Alum, Student in Show

Two Hope College art department faculty members—Ken Walz and Donald Van Liere—have been selected for the upcoming television show, “The American Sportsman.” Walz and Van Liere will be featured in a special segment of the show, which is scheduled to air on CBS.

Film Is Gold Medal Winner

Ken Walz ’66 won a gold medal at the recent International Film and Video Festival of New York for his work in a promotional video tape of the new art music project, “The American Sportsman.” Walz’s work was selected for the festival in recognition of his contributions to the field of rock music.

Chicago Area Alums To Meet April 1

A meeting of Chicago area alumni and friends has been scheduled for Thursday, April 1 in South Holland. The event is open to all alumni, parents and friends.

Town Toasts Latin Advocate

A teacher who always stressed that Latin was a live language, not a dead one, recently received an accolade when her community observed a day in her honor. Kathryn (“Kay”) Douma ’41 De Pue, who began her career as a high school Latin teacher in Grand Ledge, Mich. in 1947, was honored in early December by friends, former students, and other admirers gathered to observe “Kay De Pue Day,” a day of remembrance and tribute, and in the Grand Ledge mayor.

Harry Zefringer 88 is the chairman of the News Club in Kalamazoo, Mich.

letters

In the October issue of News from Hope College there is an article titled "Women in Hope," which was written by one of the women profiled.

I felt very honored to be chosen for this article. However, I was disturbed that in reporting "their feelings about choices they've made, their aspirations and what they were developed," the most important aspect of my life—my faith in Christ—was left out. The Hope article was written in its entirety from a profile that appeared in an article in the Holland newspaper, the Missoulian.

I believe that my faith is the most important aspect of my life, and that it should be emphasized in a profile such as this.

Sincerely,

Linnea "(Nora)" Koechel '64

Editors' Note: The profile in question was adapted from a longer profile magazine article. We edited the article to match the length and contents of the other six profiles in our "Women of Hope" feature.

backlog

100 years ago

1882—College enrollment stood at 45.
1882—Capitalists purchased 220 acres at the mouth of the Black River for the purpose of establishing a summer resort area.

30 years ago

March 1952—A curriculum reform reduced the number of credit hours required for graduation from 130 to 126 (the number required today).
Physical education, foreign language and history requirements were reduced. A general grade system was adopted.
March 1952—a sweeping revision of football rules, the most drastic since 1906, was passed by the American football league.

10 years ago

December 1972—A portrait tablet commemorating the life of Edward D. Dimnent, fifth president of Hope College, was unveiled in the presence of Dimnent Memorial Chapel.
Winter 1972—The contract curriculum was approved as an alternative to the standard core curriculum. This flexible alternative was designed to meet the needs of students who wanted more self-determination in their education and who could benefit from specialized learning even at an earlier point than the core curriculum allows.

advanced degrees

1. Sixteen years of travel experience with forty-seven successful tours
2. Christian fellowship; no advance in travel on Sunday
3. The escort and professional guide
4. Orientation before departure and reunion after return
5. Travel is at cost
6. No gimmicks or hidden costs
7. Fine dining and deluxe hotels
8. Most meals and all tips and services provided
9. Arrangements available for passage from youth, if so desired
10. Opportunity for further travel beyond the tour
11. Alumni, their relatives and friends, and all friends of Hope cordially invited.

WASHINGTON D.C. AND VIRGINIA
9 Days, April 23—May 1, approximately $740. By travel coach from Grand Rapids and other points to Washington, D.C., at Vernon, Williamsburg, Richmond, Monticello, Shenandoah Valley National Park, Skyline Drive, Blue Ridge Mountains.

HEART OF EUROPE
19 days, June 18—July 6, approximately $1,758. Amsterdam, Heidelberg, Munich, Salzburg, Vienna, Innsbruck, Lucerne, Interlaken, Geneva, Paris, Brussels. Two-night stays in five cities. Traveler may remain in Netherlands several days after tour at no extra cost.

SCANDINAVIA
16 days, July 2—17, approximately $1,958. Denmark, Sweden, and Norway, with two-night stays in Copenhagen, Stockholm, and Oslo. Five days by coach and boat through Fjord country.

AUSTRALIA-NEW ZEALAND
25 days, October 2—25, approximately $9,000 from Los Angeles. Travel from other places can be arranged. Extensive travel through New Zealand and Western Australia.

Information we received concerning the death of Leonard Sibley 66, was erroneous.
The Rev. Vermilyea 59 served as a master of ceremonies for the funeral service at St. Joseph's Church, Grand Haven, Mich.
Jeffrey L. VerBeek 81 at the University of Detroit (Mich.) Law School.
Campus Will Sprout Outdoor Sculptures

by Maria Hoffman

When the Pine Grove trades its white blanket for a green cape and flower buds spring up to line Holland's well-known Tulip Lane, an exhibition of large-scale sculptures will display their creators' abilities across the Hope College campus. "American Fritz," a collection of three-dimensional creations of well-known artists, will be introduced to the community in mid-April and will remain available to art enthusiasts throughout the tulip Music season.

"American Fritz" is a display of the work of eight artists whose works have been exhibited both across the United States and abroad. The opportunity to exhibit this collection comes to Hope as a gift from the Interface Corporation of Parsippany, N.J. In existence for only two seasons, the exhibition has been shown at only two other campuses. According to Jacob Nyehus, Hope's dean for the arts and humanities, the show is "a distinctive opportunity for the campus," and it is not often that a school such as Hope can afford to display a collection of such size and quality, making Interface's gift particularly appreciated.

Made of steel and aluminum, the works will display the various artists' experimentation with their medium. All the pieces will be built on a large scale; the heights are expected to range from 10 to 40 feet. Within the group, there are some similarities in the work of the artists; for instance, Mark di Suvero and Paul McCarthy both encourage viewer participation in their work; Linda Howard and Charles Ginnever concentrate on the aspects of perception and illusion. Fluid movement is an important concern for Kenneth Snelson and John Henry and Lyman Kipp. The artist sculpture of Hope and Jerry Peart both focus on the elements of form and color. Although all eight of these works will reflect the spring, the particular works in the collection are visible as the display moves between locations.

How should the viewer be of or the expert or novice in art criticism, react to these works of art? Spend time with the pieces. Be patient with them. This is the advice of Bill Mayer, the resident sculptor on Hope's art faculty. To those who might feel shy about observing a contemporary work of unfamiliar nature, Mayer urges, "Approach it like a human being that you don't know. Develop a rapport with it." As a statement of the need to open oneself to new experiences and perceptions, Mayer's advice reflects the posture of the College of Hope, which in recent years has concentrated on making art more accessible, an effort which will be even easier when the new DePree Art Center and Gallery opens next fall. This posture of openness has allowed Hope to continue to increase its offerings of the arts—to grow at a time when the classroom emphasis on the arts is reported to be on the decline nationwide.

Nursing Program Established

The B.S. in Nursing will be offered through the joint Hope-Calvin Nursing Program.

Cynthia Kielinen Hired as Program Chairperson

Dr. Cynthia E. Kielinen, a native of Massachusetts, was welcomed to Hope College and began her position as Chairperson of the Nursing Department early in June, 1981. Dr. Kielinen began her nursing career in a hospital diploma program. She received B.S. in Nursing and an M.S. in Medical-Surgical Nursing from Boston University in 1970. In a doctoral research project, Dr. Kielinen studied over 500 senior bachelor nurses. Her education background and previous experiences provide Hope with a well-qualified person to head the development and implementation of the nursing program.

Program Builds On Strong Science Foundation

Hope College has long been recognized as a prominent leader in the area of undergraduate science education, particularly in the fields of chemistry and biology. This established foundation will serve as an integral part of students' preparation for actual involvement in the nursing curriculum and clinical experience. The modern, well-equipped laboratories and extensive science library will serve as valuable resources during their years of study at Hope.

First Nursing Courses To Be Offered Next Fall

The nursing department is humming with excitement as preparations are made to offer professional nursing courses to the first class of nursing students next fall. Applications are presently being screened from students who are in their second year of college study. Although it is too early to say definitely, a limited number of openings may be available to students presently completing a 2-year pre-nursing program at other colleges and universities. Interested students can keep current on this situation by contacting either the Office of Admissions or Department of Nursing.

Clinical Work Follows Two Year Pre-Nursing Sequence

After two years of study in the areas of biology, chemistry, psychology, sociology, and liberal arts, students concentrate on nursing major courses. Nursing courses include theory and clinical experiences related to care of well individuals and families and people with illnesses being treated in hospitals and homes. Clinical learning experiences are provided with all age levels and in specialized areas such as maternity, pediatrics, medical-surgical, and psychiatric mental health settings.

Christian Perspective Vital To Program

The Nursing Program was established with the fundamental understanding that the human created by God is a unique, dynamic creation with biological, psychological, social and spiritual dimensions that constantly interact. Nursing affords an opportunity to serve people in need, and it is the belief of Hope College that these needs can most effectively be met by nurses educated in a setting where the Christian perspective is considered and practiced. Throughout the program students are challenged to integrate their faith with the "real life" situations of well and sick people of all ages and walks of life.

Community and College Resources Utilized

Students in the Hope-Calvin Department of Nursing use resources available at both Hope and Calvin Colleges. In addition, special relationships have been established with Butterworth Hospital and Holland Community Hospital. To assist these clinical education centers provide students access to all of their learning resources and enable the nursing program to benefit from the expertise of other professionals. In addition, community agencies and resources are used for student learning.

High School Seniors Urged To Apply Now

Students who take their pre-nursing courses at Hope College are given preference when filling Hope's allotment of spaces in the program. Therefore, current high school seniors interested in nursing are encouraged to investigate now the opportunities for beginning their college studies on Hope's campus to be assured first consideration when their pre-nursing courses are completed. Students applying for admission should present a strong college preparatory course of study including the following areas: English, science, mathematics, foreign language, and social studies.
