FRONT AND CENTER
The Jim and Martie Bultman Student Center stands ready to serve.

pages 12–13
The device itself is interesting. A new addition to the college’s chemical engineering laboratory experiments, the packed column separator allows students to conduct experiments measuring flow of liquids and gases. It’s the source, though, that’s the real story. It was developed and built by a team of students in Hope’s Senior Design engineering course, the results strong enough to warrant inclusion in the department’s curriculum. Students in the course regularly tackle projects for real-world clients (in this case, their own program), gaining invaluable experience in the process.
ON THE COVER

The Jim and Martie Bultman Student Center resides at the heart of campus, joining (and surrounded by) other landmarks ranging from the Pine Grove to Dimnent Memorial Chapel to the DeWitt Center. The image shows junior Roberto Escalante-Gonzalez of West Bloomfield, Michigan, visiting the new student home away from home, which opened earlier this month in anticipation of its true debut: the imminent arrival of the incoming Class of 2021.

Dear Friends,

During the summer of 1994, when I walked across the Pine Grove to assume the presidency of Western Theological Seminary, I could not have imagined that I would make another crossing to become the interim president of Hope College 23 years later. The campus has seen both continuity and change over the years, and through it all Hope has remained true to its long-standing character as a distinctive Christian liberal arts college.

Some of the changes on campus are obvious: more students and employees, beautiful modern buildings (including the brand-new Bultman Student Center), a vital Chapel program anchoring Hope’s religious life, and greater racial and ethnic diversity in our campus community. Other changes are not as visible, though just as critical: a myriad of faculty/student mentorship programs, new faith and learning initiatives, the Center for Leadership and the Boerigter Institute. These changes reflect and enhance the mission of Hope, as does the college’s long-standing commitment to high academic standards, faculty who are outstanding teachers and scholars, students who are active in research and writing, and a broad range of invitational co-curricular programs — all examples of Hope’s remarkable continuity.

I invite you to enjoy evidence of the enduring and the new in the coming pages. In this issue of News From Hope College, you will learn about innovative programs and spaces, interdisciplinary initiatives and inspiring alumni.

Of special note: On pages 10-11, you will find a feature article on the highlights of John and Kelly Knapp’s tenure at Hope. I join the students, faculty, staff and trustees in thanking them for their dedicated service to the college and in congratulating them upon John’s appointment as the president of Washington & Jefferson College.

It is an honor to serve Hope College during this exciting season of transition, a time of continuity and change. Betty and I are deeply grateful for your prayers and expressions of support.

Spera in Deo,

Rev. Dennis N. Voskuil, Ph.D.
Interim President and Professor
Enduring wisdom comes from many sources, and as the members of the graduating Class of 2017 prepared to cross the stage at Ray and Sue Smith Stadium during the college’s 152nd Commencement on Sunday, May 7, they were encouraged to remember a children’s Sunday school song.

And also to sing it.

“Now I know we’re all gussied up in our caps and gowns, and I know y’all are on the verge of becoming sophisticated college graduates. But I do not care,” said featured speaker Dr. Charles Green, professor of psychology and former director of the college’s Phelps Scholars Program. “We are going to sing ‘Deep and Wide’ right here at your commencement. That goes for the faculty, the families and everyone else.”

The resulting impromptu choir included approximately 730 seniors. The class consisted of students from throughout the United States and foreign nations around the world.

Green titled his address “A Fountain Flowing Deep and Wide,” from the song’s lyrics. He noted that as the graduates embrace the reality of life today — how to thrive in an age with so many differences in background, perspective and opinion — the song’s message provides a meaningful guide for people of faith.

“As we are all well aware, we live in a divided and divisive time. We’ve always had our differences, but in the U.S. today, and in many other countries, there is a polarization that cuts right through, leaving us fearful, angry, suspicious,” he said.

“Underneath, many of our most divisive arguments are a disagreement about which is better — deep or wide?” Green said. “Should we hunker down with the people who look and think like we do? Or should we embrace the diversity and internationalization of the age?”

“Fortunately, the answer to this question is right here in this song,” he said. “All we have to do is listen for the most important word. It’s not ‘deep.’ But it’s not ‘wide,’ either. It’s ‘and.’ There’s a fountain flowing deep ‘and’ wide. Not deep ‘or’ wide. Not deep ‘but’ wide. Certainly not deep ‘versus’ wide. A fountain flowing deep ‘and’ wide.”

“For people of faith, this fountain represents the depth and breadth of God’s love for us,” Green said. “God’s love is deep and wide because God is deep and wide. Scripture tells us we were created in the image of God, suggesting that we, too, were meant to be both deep and wide.”

Deep engagement with faith and wide engagement with others are not only compatible but complementary, reinforcing each other, Green said.

“When our roots are truly deep, we have the confidence to reach out, to bring alongside, to invite, support, ask, welcome, to meet new people and learn new things,” he said. At the same time, he said, going wide and new experiences “enable reflection and encourage commitment. New ideas offer a richer understanding of God and God’s creation. New people teach us to see difference and similarity, and we learn more about ourselves as we learn more about others.”

The Commencement ceremony was preceded by the college’s Baccalaureate services, held in Dimnent Memorial Chapel in the morning. The address, “Equipped to Serve,” was presented by Sandra Gaddy, who is chief executive officer of the Women’s Resource Center in Grand Rapids as well as a member of the college’s Board of Trustees and was concluding her final year as co-chair with her husband, Arlen, of Hope’s Parents’ Council.

Additional coverage of the day’s events, including video of Commencement, the full text of each address and a gallery of photos, is available online. hope.edu/commencement2017
SUMMER 2017

FIVE FACULTY APPOINTED TO ENDOWED PROFESSORSHIPS

Hope has appointed five current members of the faculty to long-standing endowed professorships at the college.

Dr. Steven Bouma-Prediger ’79 has been appointed to a six-year term as the Leonard and Marjorie Maas Professor of Theology; Dr. Ernest Cole has been appointed to a 10-year term as the John Dirk Werkman Associate Professor of English; Dr. Greg Murray has been appointed to a 10-year term as the T. Elliot Weier Professor of Plant Science; Dr. David Ryden has been appointed to a 10-year term as the Peter C. and Emajean Cook Professor of Political Science; and Dr. Joanne Stewart has been appointed to a 10-year term as the Elmer E. Hartgerink Professor of Chemistry.

CADY SHORT-THOMPSON APPOINTED PROVOST

Dr. Cady Short-Thompson, who was dean of Blue Ash College of the University of Cincinnati system since 2010, has become provost at Hope.

Selected through a nationwide search, she began in her new role at Hope on August 1. She has also been appointed a professor of communication at the college.

Short-Thompson’s leadership responsibilities as dean at Blue Ash College were comparable to that of both president and chief academic officer at an independent college. She also held appointments as a professor of communication and affiliate professor of political science.

HOPE IN PICTURES

Please visit the college online to enjoy extensive photo galleries organized by topic and chronicling a variety of events in the life of Hope. Shown above is an image from the graduation activities on Sunday, May 7. In addition to multiple images from Baccalaureate and Commencement, content available online includes the text of the Baccalaureate sermon and of the Commencement address, and video of the ceremonies.

ORIENTATION AND CONVOCATION TO OPEN SCHOOL YEAR

The college’s 156th academic year will begin formally with the traditional Opening Convocation on Sunday, Aug. 27, at 2 p.m. in the Richard and Helen DeVos Fieldhouse.

The public is invited. Admission is free.

The featured speaker will be Dr. Cady Short-Thompson, provost and professor of communication at Hope (see story at left).

Residence halls for new students will open on Friday, Aug. 25, at 10 a.m., with New Student Orientation beginning later that day and continuing through Monday, Aug. 28. Residence halls for returning students will open on Sunday, Aug. 27, at noon. Fall semester classes will begin on Tuesday, Aug. 29, at 8 a.m.

FIVE FACULTY APPOINTED TO ENDOWED PROFESSORSHIPS

Hope has appointed five current members of the faculty to long-standing endowed professorships at the college.

Dr. Steven Bouma-Prediger ’79 has been appointed to a six-year term as the Leonard and Marjorie Maas Professor of Theology; Dr. Ernest Cole has been appointed to a 10-year term as the John Dirk Werkman Associate Professor of English; Dr. Greg Murray has been appointed to a 10-year term as the T. Elliot Weier Professor of Plant Science; Dr. David Ryden has been appointed to a 10-year term as the Peter C. and Emajean Cook Professor of Political Science; and Dr. Joanne Stewart has been appointed to a 10-year term as the Elmer E. Hartgerink Professor of Chemistry.

FROM BLOGS.HOPE.EDU

It’s the second-leading commodity traded in the world after oil, with a worldwide consumption of 2.2 billion cups per day. And, the United States is its leading consumer at 400 million cups daily. Yet, few people are aware of the scientific, political, historical and cultural implications swirling inside their cup of morning joe.

This is not the case for Hope students who take Dr. Tom Bultman’s new class, The Science and Culture of Coffee.

Beyond its relatable premise, Dr. Tom Bultman ’78’s popular new course offers a holistic approach that shows how multiple disciplines together provide a rich basis for understanding and exploring questions. Please go online to learn more about a laboratory and classroom experience that one student described as “the definition of a liberal arts education.”

Stories of Hope is one of three dozen blogs on the college’s vibrant blog network, which shares accounts written by students, faculty and staff highlighting scholarship, off-campus study, individual academic and co-curricular programs, alumni activities and achievements — and more.

SESQUICENTENNIAL ANTHEM PUBLISHED

The anthem commissioned for the college’s sesquicentennial celebration has been published by the college’s Van Raalte Press and is now available through the Hope-Geneva Bookstore.

“I Will Lift Up Mine Eyes (Psalm 121)” was composed for Hope by highly respected choral conductor Robert Shafer through a commission on behalf of the occasion of Hope’s 150th by Thelma (Tommye) Leenhouts ’66 of Washington, D.C. In the words of the composer, “a setting of Psalm 121 for full soprano, alto, tenor and bass choir and organ, this powerful, rhythmic and moving piece is immediately accessible to all audiences. It is particularly suited for fine high school, college, community and church choirs.” The work had its West Michigan premiere at Hope in April 2016.

Copies of “I Will Lift Up Mine Eyes (Psalm 121)” are available for $2.50 and may be purchased online.

LINDA LE FEVER DYKSTRA RETIRES FROM MUSIC FACULTY

The spring issue of News from Hope College announced that seven professors were retiring, but after the issue went to press we learned that Linda LeFever Dykstra, an associate professor of music who joined the faculty in 1997, also planned to retire at the end of the school year.

A biographical sketch and feature story about her are available online, along with stories about the others: Dr. Christopher Barney, the T. Elliot Weier Professor of Biology; Dr. Thomas Ludwig, the John Dirk Werkman Professor of Psychology; Dr. Anthony Perovich, professor of philosophy; Dr. James Piers ’69, professor of sociology; Dr. Peter Schakel, the Peter C. and Emajean Cook Professor of English; Dr. Michael Seymour, professor of chemistry; and Vicki TenHaken ’73, professor of management and Ruch Director of the Baker Scholars program.

LINDSEY ROOT LUNA ’03 RECEIVES H.O.P.E. AWARD

Dr. Lindsey Root Luna ’03 of the psychology faculty was presented the 53rd “Hope Outstanding Professor Educator” (H.O.P.E.) Award by the graduating Class of 2017.

She garnered additional recognition later in the month, when she received the Regional Faculty Advisor Award for the Midwestern Region of Psi Chi — The International Honor Society in Psychology. She has been faculty advisor of Hope’s chapter of the society since 2014. An associate professor of psychology, she was named the recipient during the college’s Commencement ceremony, held at the Ray and Sue Smith Stadium on Sunday, May 7.

SCIENCE CAMPS CELEBRATE 20TH

They began in 1997 with one camp and 25-30 elementary-age participants. This June and July, the Summer Science Camps and Academies — named now in honor of program founder Tod Gugino ’85, who died in 2013 — spent their 20th-anniversary year hosting some 1,000 children in more than 50 week-long STEM, art and music camps. Led by Hope students, the camps featured themes ranging from “Tykes Lego” to “Movie Making” to “Experimental Design,” all to help excite the children about science and learning, reflecting the college’s historic role as a resource not only for its students but the community.

ALWAYS ONLINE

Want to enjoy News from Hope College when the print edition isn’t at hand, or to share an article with a friend most easily reached online? The publication can be found 24/7 at magazine.hope.edu.

Like the print edition, the website was extensively redesigned starting with the Winter 2016 issue. Also compatible with mobile devices, it features a sleek new look, bold use of photography and seamless user experience, as well as additional content that complements the material in the printed piece (and of course includes the “classnotes”). There’s also an archive featuring every issue since 2000.

NEW TRUSTEES NAMED

The Hope College Board of Trustees appointed two new members in addition to electing a new vice-chair during its May 2017 meeting.

Newly elected to serve four-year terms on the board are Dr. Stephen Boerigter of Los Alamos, New Mexico, and the Rev. Dr. Nathan Hart ’01 of Greenwich, Connecticut.

Timothy VandeBunte ’83 of Holland, Michigan, has been elected vice-chair, succeeding Mark Van Genderen ’90 of Cedarburg, Wisconsin. Karl Droppers ’82 of Holland is continuing to serve as chairperson, and Nancy Dirkse ’81 DeWitt of Cincinnati, Ohio, is continuing to serve as secretary.

Trustees re-elected to second four-year terms on the board are: the Rev. David M. Bast ’73 of Grand Rapids, Michigan; Dr. Gerald J. Pillay of Liverpool, England; Suzanne L. Shier of Chicago, Illinois; and Mark Van Genderen ’90.

Trustees concluding service on the board are: the Rev. Dr. William R. Boersma ’75 of Holland and James L. Jurries ’63 of Holland.

hope.edu/trustees2017
As noted by Interim President Dennis Voskuil on Page 5, John C. Knapp has left his position as president at Hope to lead Washington & Jefferson College in Washington, Pennsylvania.

Washington & Jefferson College announced Knapp’s appointment on Friday, April 21. Invited by Washington & Jefferson College to be considered for the presidency, he assumed his new role earlier this month. The search committee chair shared that Knapp emerged as the strongest, most qualified finalist among 150 individuals in a “very distinguished pool of candidates.”

Hope is conducting a national search for his successor while Voskuil serves as interim president (please see the sidebar at right).

Knapp became Hope’s 12th president on July 1, 2013, and also held appointments as a professor of religion and professor of management. In a message to the campus community in conjunction with the April 21 announcement, he noted, “This was not an easy decision, for Kelly and I cherish our relationships with each member of this very special community.”

“Leading Hope College is a tremendous privilege, and I am deeply grateful for your support, dedication and collaborative spirit over these last four years,” he continued.

Karl Droppers ’82, chair of the Board of Trustees, praised Knapp’s impact and service across his four years helming the college.

“I am thankful for the four years of service John has dedicated to Hope College. As president, he has worked hard to implement many positive initiatives and programs, and Hope is a stronger and more successful college as a result.”

Knapp and his wife, Kelly, also received appreciation during the college’s Commencement exercises on Sunday, May 7. As he began his address to the Class of 2017, speaker Dr. Chuck Green of the psychology faculty said, “John, we thank you and Kelly for your service to Hope, and for the way that you modeled for us how to be a Christ-centered community in a winsome, open and loving way. We will miss you both.”

Knapp led the development and implementation of Hope for the World: 2025, a 10-year strategic plan to enhance the college’s distinctiveness as a place of academic excellence, faith development, inclusiveness and global engagement. The college is also completing the first comprehensive campus master plan in more than 30 years.

Milestones during the recent 2016-17 school year included creation of the Boerigter Institute, which is a cross-functional and integrated program designed to ensure that every student is robustly prepared for career success and professional growth; and of the Mellon Grand Challenges Initiative to develop linked courses and research opportunities exploring large-scale, relevant themes. Knapp established the Presidential Colloquium lecture series in 2014 to bring noted speakers to campus to address issues
Interim President Dennis Voskuil an Experienced Leader

Interim President Rev. Dr. Dennis N. Voskuil brings to his new role extensive leadership and teaching experience at both Hope and Western Theological Seminary.

Voskuil was a member of Hope’s religion faculty from 1977 to 1994, and has been director of the college’s A.C. Van Raalte Institute since 2015. He was president of Western Theological Seminary from 1994 to 2008, and continued to teach as the Marvin and Jerene DeWitt Professor of Church History until 2014, when he became a senior research fellow with the Van Raalte Institute.

He received the Hope Outstanding Professor Educator Award in 1981, and delivered the college’s Baccalaureate sermon in 1980, Commencement address in 1985 and Opening Convocation address in 1993. He and his wife, Betty, jointly delivered the 2008 Baccalaureate sermon, when Hope presented them with honorary degrees in recognition of their service to the Reformed Church in America.

The college’s Board of Trustees approved his appointment on May 31 for up to two years. With Dr. John C. Knapp’s tenure as president concluding at the end of July, Voskuil started on July 1 to help provide a seamless leadership transition. He will serve while Hope conducts a national search for a successor to Knapp.

“Dennis’s love for Hope College is boundless,” said Karl Droppers ’82, chair of Hope’s Board of Trustees. “A servant-leader at heart, Dennis has a history of leading with candor, collaboration and compassion. He is especially enthusiastic about Hope’s commitment to academic excellence, global engagement and ecumenical invitation into the Christian faith. Dennis will be a thoughtful and attentive steward of Hope College.”

Knapp expressed support for the appointment as well, saying, “Dennis has been a great friend to Hope College and the Holland community. With his guidance, the college will continue to thrive and build momentum in every area.”
Designed as the students’ family room on campus, the lounge features comfortable seating, a fireplace and floor-to-ceiling windows that offer views of the Pine Grove and Van Raalte Commons.

Hallways and walkways are open and airy.

The building’s primary program space on the main floor is designed to be flexible so that it can host a variety of activities. Informal seating will make the space available for relaxing — and enjoying the south-facing windows — when it’s not otherwise in use.
Open work space on the main floor, which has already been hosting preparation for New Student Orientation, will support multiple campus groups simultaneously, encouraging interaction. The offices of Diversity and Inclusion and Student Life are adjacent, with Counseling and Psychological Services on the second floor.

The Harvey Prayer Chapel, not quite completed in this image, faces northeast toward the Pine Grove. Stained glass will fill the circular window. The wall at right is paneled with wood from campus trees felled by storms or age — all a part of students’ experience for decades, some older than the college itself.

The exterior reflects features of nearby campus landmarks while containing contemporary elements all its own. Note also the outdoor fireplace near the lower right.
How on Earth?

Challenging Borders for the Good of Hope in the World

By Eva Dean Folkert ’83

To look at the Earth from above, as a bird sees it or from an astronaut’s stratospheric view, is to see a gloriously blue-green-white sphere as one splendid whole. Rivers and mountains cross expanses unabated; oceans flow uninhibitedly from one shore to the next; clouds drift wherever they wish, whenever they wish. From on high, it can be imagined, the world appears the way God created it to be: a planet devoid of multinational borders and boundaries.
But, of course, it is not. Not for those down here on Earth. A close-up worldview is one with a plethora of arbitrary, human-made lines drawn in the sand to separate us from them, mine from theirs. This is the way of the world and has been for millennia, but undoubtedly the past few years have brought cartographic dividing lines into sharper focus due to years-long wars, a refugee crisis, evolving immigration policies, global economic inequalities and climate change. For today’s college students, all of these international issues make this messy, mapped-out world feel even more complicated than it already is.

So what, then, is to be done with them, those global separators of nationalities, races, ethnicities, religions and cultures? Border issues are many and complex. Where does one even start?

The answer was plain, though not entirely simple, for Dr. Dede Johnston, professor of communication and Hope’s Global Crossroads director. The best place to tackle any expansive and tangled matter is on a college campus, especially a liberal arts campus where holistic learning and collaborative teaching is paramount to a pressing world issue. But not just in one discipline; several would be needed. And not just in one place; many locations would be necessary. That is the only way for students and faculty to challenge borders, Johnston thought. Numerous academic disciplines all around campus had to converge and cross borders, too.

“[Displacement] is a critical issue that has tremendous implications for our foreign policy, immigration policy, economic policies and, perhaps most importantly for Hope, how we live out our faith by answering the question, ‘Who is our neighbor?’ Almost every academic discipline has something to contribute to our understanding of displaced-person challenges.”

So the interdisciplinary project, “Challenging Borders: Displaced Peoples,” was born on and for Hope’s campus during the 2016-17 academic year thanks to Johnston with the help of project co-coordinators, Dr. Berta Carrasco Miguel, assistant professor of Spanish, and Dr. Heidi Kraus, assistant professor of art history, as well as several other Hope faculty members with international faculty partners from liberal arts colleges in Pakistan, Egypt, Japan, Greece, France and Hong Kong.

Funded by a Global Liberal Arts/Great Lakes Colleges Association (GLCA) Global Challenge grant, “Challenging Borders: Displaced Peoples” was first engaged by nine Hope professors in art, English, Spanish, First-Year Seminar, Senior Seminar, science and communication classrooms in the fall of 2016. It was then delivered campus-wide in the spring of 2017 via an interactive, audio-visual diaspora. A broader audience could walk to various locations around campus to scan QR codes found on the thematic Challenging Borders poster. The codes instantaneously sent videos, story maps or infographics to users’ smartphones to display impressive faculty/student collaborations, a delivery method packed with interdisciplinary sensory and factual uploading on a global scale.

“I believe that this generation of students will be engaging a world with more displaced persons than we have experienced in recent history,” Johnston explains. “Displacement has numerous causes, including disease, war, economic deprivation and climate change. This is a critical issue that has tremendous implications for our foreign policy, immigration policy, economic policies and, perhaps most importantly for Hope, how we live out our faith by answering the question, ‘Who is our neighbor?’ Almost every academic discipline has something to contribute to our understanding of the displaced-person challenges. The study of food, water, environment, health, arts, literature, history, sociology, psychology, communication, politics, religion and ethics are all connected to how we address the global increase in displaced persons.”

The diaspora idea was Johnston’s. She wanted Hope residents and visitors to experience the inconvenience of moving from one campus site to another and another, about 3,000 steps worth of movement meant to conjure feelings of displacement, albeit minor and temporary comparatively speaking. As participants traipse to every poster on campus, crossing streets, opening doors, entering rooms and searching hallways to challenge borders, Johnston’s intent becomes clear: peripatetic life stories are best learned on foot.

So it is then on the Challenging Borders route, participants feel safely encompassed inside Hope’s finely groomed green areas and well-kept buildings, an uneasy juxtaposition given the images and stories of marginalization to be encountered. As one of the nine faculty-student collaborative project pops up on a smartphone to depict the emotional stories of those who have been displaced in this beautiful but fractured world, a much-needed unrest settles in and with it comes the most needed emotion: empathy.

For Dr. Jayson Dibble, associate professor of communication, that was one of the best lessons of all. Sure, the students in his Communication 360 class — “Persuasion” — learned his extensive lessons on persuasive theories and concepts directed at counterbalancing negative rhetoric about the refugee crisis, but they also acquired the know-how to apply those theories to a real-life issue immediately, a major goal Dibble was bound and determined to achieve. And while he acknowledged that not all agreed on the refugee issue politically, each student did reach concurrence empathically.

“This project was an opportunity for students to use what they were learning in the classroom now to address something that is important now,” Dibble recalls. “They were not just sitting on the sidelines waiting to graduate and waiting to do something about an issue. I wanted them to know they have skills and ideas and energy right now to use. That’s what I was hoping for. But what I also think they got out of (the class and project) was caring. They started to care and realize the world is big and difficult and different and in need of help if even from a classroom on persuasion.”

When senior James Fixx took Dr. Joanne Stewart’s class called “Abrupt Climate Change,” he, too, encountered empathy but also a way of knowing how to talk to others about his own feelings on refugees, especially those who have been displaced due to rising sea levels or glacial melting or extreme drought. Stewart created her class — part of Hope’s general education mathematics and
“The days of us living in our disciplinary silos are over,” says Dr. Heidi Kraus, assistant professor of art history and co-coordinator of the project. “This project is a great example of disciplines converging. We have people from chemistry, from art, from English, from psychology, from communication all talking together. We are breaking down borders even between our own disciplines with this project.”

From scientific fact exploration, Challenging Borders moves to fictional stories investigation, all in its quest to stretch students and viewers to consider how they approach the truth of this matter. In English 454, or “Advanced Creative Writing: Fiction,” Dr. Susanna Childress challenged her students to read the works of Haitian-American author and immigrant Edwidge Danticat and Pakistani writer Saaed Ur-Rehman to discover that “real” stories reside in fiction while “official” stories come from mainstream, partisan voices which purport to tell non-fiction narratives. That distinction between real and official, first espoused by writer Junot Díaz, makes a world of difference to those who are living and learning it. Childress wanted her students and Challenging Borders participants to know that, too.

Each story in the project is indeed a human story — real and official. On this marbled Earth where borders continue to divide, perhaps the best way toward human unity is moving the boundaries of empathetic understanding. It’s the most Challenging Borders hopes for… and the least walk toward.

“Challenging Borders: Displaced Peoples” literally and figuratively crossed borders campus-wide. To view the nine faculty/student collaborative works from across Hope’s academic divisions comprising the project, please visit hopechallengingborders.com.
Awakening

A DEEPER FAITH

By Greg Chandler

Sixteen-year-old Sydney Mycroft expresses her Christian faith through playing the drums with a praise team at her home church in Orlando, Florida.

But Sydney learned far more than how to improve her musical skills during the recent Awakening summer institute at Hope College. She gained a deeper understanding of her faith and developed skills for leading worship.

At one point, Sydney led a group of her fellow teens during a 15-minute worship time that included music, Scripture and prayer. Jordan Dennen ’15, one of the interns for the program and a group leader, marveled at Sydney’s leadership skills.

“She’s leading worship from the drum set. Who does that?” exclaimed Dennen, of Joliet, Illinois, who also taught dance during the weeklong institute that took place in mid-June. “She’s back there, having fun. She is leading worship from the drum set because that’s what she does. That’s her gift.”

Sydney was one of 40 teens who participated in Awakening, which just finished its second year. The program gives high school students an opportunity to deepen their faith and understanding of Christian theology, with the goal of helping them prepare to take on leadership roles within the church. Sydney says the experience expanded her vision of how people can express themselves in worship to God, pointing in particular to watching Dennen and a group of students performing liturgical dance.

“Seeing Jordan and her girls dancing was phenomenal. I’d never seen anything like that,” Sydney said. “We lift our hands, and swing and sway back and forth in service, and we raise our voices, but I’d never seen anyone get up and just dance and worship God in that way.”

Sydney said she was so inspired by watching Dennen and her students that she encouraged a friend of hers who was also part of Awakening, who had recently quit a school dance team, to use her gifts in worship at their church.
Awakening is funded by a four-year, $500,000 grant through the Lilly Endowment Inc.'s High School Youth Theology Institutes initiative, an effort to identify and encourage future church leaders. The program combines opportunities to learn greater skills in the various arts — music, dance, visual arts — with the study of Scripture, both in personal and small-group settings, with the idea of giving students a vision of how they can serve others, according to James DeBoer, director of Awakening and an adjunct associate professor of music at Hope.

“What these students are finding out is church is more than a worship service,” DeBoer said. “Church is about community: having a relationship with God above all, and developing relationships with all of creation that is created in the image of God, no matter who we are, what our color is, what our race is, or what our gender is.”

DeBoer says Awakening is one of the few programs of its type in the U.S. that seeks to train high school students to deepen their faith and develop their skills as worship leaders. He also says the institute fits perfectly with Hope's mission for helping students find their purpose in life.

“It fits hand in glove with what Hope’s mission is all about: students undergoing faith formation by finding a pathway for their purpose, goals and passions for life,” he said.

Jessica Cronau '17, a program intern who graduated in May from Hope with a double major in political science and Christian theology history, says given the trend of young people leaving the church, a program such as Awakening is critical to developing the next generation of church leaders.

“The world needs this, because in our Western culture we’ve lost touch with the importance of what the arts do — for culture, for community — and it’s so important to church life,” said Cronau, of Columbus, Ohio, who will attend Princeton Theological Seminary this fall. “To see kids engaged with God, emptying themselves out, letting God come in and fill them through a medium such as the arts, music, dance and worship — it allows for God to enter their lives in ways that wouldn’t happen otherwise.”

Cronau, who led one of the small groups, was impressed with the spiritual growth she witnessed from the teen with whom she worked.

“We would often read Scripture, spent time in silence, time in prayer and meditation, we would journal, ‘then we’d come back together as a group and talk about what we discovered,’” she said. “Every day there was a different lesson or a different theme we were addressing — mind, soul, heart, strength. We would talk about what God was speaking to us in that time of silence, that time of solitude. We would talk about what’s going on in our
hearts, what was going on in our stories. The kids were so open, we created really incredible communities.”

Students who generally did not know each other when they arrived on campus on a Sunday formed close bonds by the time Awakening ended on a Friday. It also caused some participants to look at themselves and their relationship to God.

“It’s changed me and my opinion on so many different subjects,” said Micah Huisman, a 14-year-old from Hudsonville, Michigan. “It’s touched my soul and my heart in a way I never experienced before.”

Other highlights from the week included an opportunity for the students to visit several area churches and experience different types of worship settings, from a traditional liturgical base to more contemporary styles. On Tuesday of the week, some of the participants and interns led the opening worship at the General Synod of the Reformed Church in America at Hope.

“It was only 15 minutes, but that doesn’t matter,” said Justin Wolters, a 14-year-old from Holland, Michigan, who was part of the General Synod worship team. “It was so cool. It was really the first time I led worship like that.”

Justin, who has an interest in preaching, had a chance to study during the week with Dr. Timothy Brown ’73, president of Western Theological Seminary, longtime RCA pastor and former dean of the chapel at Hope. Brown was one of 18 staff members who taught various disciplines during Awakening.

“Students receive world-class instruction in worship, and the community they develop within their small group and with the group at large is quite amazing. They feel like a family,” DeBoer said.

DeBoer hopes that Awakening will continue after the Lilly grant expires in 2019, but making that happen will require additional funding.

“Our goal is that it lives in perpetuity, and we are able to find funding to support Awakening so it will continue to grow and develop this next generation of worship leaders,” he said.

More about Awakening, including a video highlighting the program, is available at hope.edu/awakening.

Awakening gives high school students an opportunity to deepen their faith and understanding of Christian theology, with the goal of helping them prepare to take on leadership roles within the church.
In Dr. Kenneth Brown's analytical chemistry laboratory, details are amenable obsessions. Precise measurements, exact reaction times, specific compound properties, meticulous journal notes — it all requires a special law and order of the chemical kind.

While the terms bantered about in Schaap Science Center lab 2116A would make any layperson's head spin with their particular minutiae (try these: redox mediation, organo-metallic complexes, monomers for oxidative electropolymerization feasibility for 3,4 ethylenedioxythiophene (EDOT), Fe(II) and Ru(II)-tris(5-amino-1,10 phenanthroline) and metal(II)-tetraaminophthalocyanine), Brown's rules of research have big-picture implications, too. They are not unlike the canons he learned in his mother's kitchen and go something like this (paraphrased a bit):

1. Always put things back where you found them.
2. Always clean up your mess.
3. Always take good notes if you change the recipe.
4. Always be careful.
5. Always work hard.
6. Always love on chemistry and each other.

That last rule — to love your work and the people in it — is more implied than written, and it is the rest of this detailed story.

Go back to 2004–05, and Brown is five years into his Hope career, having come to the college right after receiving his doctorate from Oklahoma State University. He excelled through six years of grad school on his strong intellect and the GI bill. A former sergeant in the U.S. Army Reserve, Brown is a man given to affability but not pretension; orderliness but not compulsion; discipline but not impatience. Each attribute makes him an attractive magnet to Hope chemistry students who appreciate his creativity and enthusiasm. Get Brown going about those redox mediators and his voice takes on a gleeful lilt as his hands move about complementing his every vocal inflection, exposing his penchant for using two more body parts to help his mouth do the talking.

Jill Pinter Berryman, Travis Ruch and Kathy Ewing Davis — all 2005 Hope graduates and all now with Ph.D.s in chemistry — were three such students who gravitated to Brown’s way of thinking and working (and talking) back then. For two summers and two academic years, the threesome conducted research in Brown's lab in the field of electrochemistry. They all had been students in his class on “Analytical Chemistry,” too. After spending so much time together, “we were a pretty close-knit group,” confides Davis who is now an associate professor of chemistry at Manchester University.

So close that when the students noticed something was gravely amiss with Brown's health in the spring of 2005, the three undergraduates had the considerate audacity to step in and ask their professor why. It would be an extravagant display of courageous care for a faculty member by students, a role reversal of the magnanimous and unusual kind.

The autumn before, Brown was turning his research focus toward the use of organo-metallic compounds in bio-sensing devices such as glucose detection meters most often used by those with diabetes. As God and providence would have it, at that same time Brown began to notice changes in his body as well. His vision was blurring, he was constantly thirsty, he had high urine output, and he was losing weight though not even trying. He kept diving deeper into diabetes research literature. Was he being psychosomatic, or did he really need medical attention? “I was fortunate that at that time I was reading those research papers on diabetes,” admits Brown, who is single. “As I’m reading them, I’m thinking, ‘I have to get myself to a doctor.’”

When he did, his first blood sugar reading was over 500, more than three times above normal glucose range. He was immediately put on insulin and other medications but it took several weeks to regulate his glucose, and the struggle left him drained. Still, he worked. As severe as his diagnosis was, he took no time off from Hope. Brown researched, taught, advised and mentored. And he told no one of his newly detected disease.
But Berryman, Davis and Ruch caught the details of change in their professor, by now a friend as much as a mentor. Brown’s sweaters were becoming baggy and his pants were looser. His teaching style had changed, too. It was erratic; sometimes he’d be full of his usual energy and sometimes it took all that he had to get through the day. Everything about Brown — his mannerisms, energy level and personality — was altered. Like his clothes, none of his normal characteristics seemed to fit. He was not himself, and his students were determined to find out why.

“So one day I was walking down the hall and they cornered me — all three of them — right outside my office door,” Brown recalls. “They said, ‘Okay, Dr. Brown, we want to know what’s going on. We notice something is not right with you.’”

When faced with the order, the former military man had no option but to comply. Brown had been ambushed and now was surrounded, and the three students were not going to let him get away without an answer. The chemistry professor who was thinking about researching compounds to benefit the diabetic community admitted to his own recent diagnosis.

Now that the mystery had been addressed, the students offered assistance. “They said, ‘If you need anything from us, we’re here for you,’” says Brown. And they meant it, for the day after their confrontation the three came back bearing a gift for their weary prof. In its unwrapping, Brown uncovered a cookbook for individuals with diabetes.

“They said to me, ‘Dr. Brown, look through this cookbook and pick out a couple recipes. We are going to come to your home, take over your kitchen, and cook for you. You must do this. You have no choice,’” recalls Brown. “So I chose some recipes and they cooked for me twice that semester. . . For them to take that interest in me told me that they appreciated me as their mentor, but more than that they cared about me as a person. It spoke volumes to me that they would go to that extent.”

While one ultimatum delivered from students to a faculty member is rare, two are certainly unheard of. But Berryman, Davis and Ruch had no doubt then that repaying kindness with kindness was as important a lesson learned in Brown’s research lab as discovering the next new characterization of chemically modified electrodes (see Rule #6 again).

“To fully understand that situation, you have to know a couple of things about Ken,” says Ruch, now a pharma consultant for BioTech in Westfield, New Jersey. “First, he’s incredibly kind and generous with his time. Second, he has high expectations of his students and mentees. So when he was diagnosed with diabetes, we wanted to offer him support and kindness too and let him know that we expected him to attack the problem with the same vigor that a physical chemistry student attacks molecular orbital theory.”

Berryman, now the manager for user relations at the National Superconducting Cyclotron Laboratory at Michigan State University, concurs. She has witnessed the cutthroat nature of high-level, competitive research at larger institutions and knows there is a difference back at Hope. “I think of Dr. Brown’s soft-spoken nature, his patience in the lab with his students, his infinite kindness, and know that, yes, there were indeed other ways to be an academic,” she says.

For as often as Hope is called a caring, Christian community, it is such encounters that turn anecdotal evidence into fact. And though this story may be 12 years old, a testament to its currency is the effects Brown has on his students and colleagues still to this day. “Dr. Brown is extremely well loved amongst students and deeply respected by his colleagues,” confirms senior Isiaha Kyles who has conducted research in Dr. Brown’s lab for the past two years. “I’m at UC-Irvine this summer where I’ve happened to meet a couple of chemistry grads from Hope and they all ask me about Dr. Brown and how he’s doing. He truly does touch the lives of each of his students.”

“My research would not be made possible without the support of my research students,” Brown concludes. “And the biggest influences on my life during my time at Hope have been my mom (Helen Brown) and best friend (Becky Pearson). They all have inspired me.”
When the students noticed something was gravely amiss with Brown’s health in the spring of 2005, the three undergraduates had the considerate audacity to step in and ask their professor why.

So you see, not much has changed about Brown since the Great Role Reversal of 2005, well, except the management of his diabetes. He’s doing fine now, stabilizing his weight mostly through diet and the execution of more than 100 pushups daily, dropping to pump out at least 10 every hour even in his office. He and his research students continue to find ways to make glucose test strips more efficient (multi-use and less blood sample needed) and cheaper (paper instead of plastic). And Brown is still warm, wise and humble. From his small chemic details to his big-hearted kindnesses, Rule #6 long lives.
SOMETHING IN THE WATER

By Josh Bishop
Two of Michigan’s best-known breweries — New Holland and Founders — are celebrating their 20th anniversaries this year, but that isn’t all they have in common. They both brew high-quality, unique beer. They’re both known, at least in part, for their bourbon barrel-aged stouts (Dragon’s Milk and KBS, respectively). And they were both founded by Hope College alumni.

Turns out there are more than a handful of craft breweries owned by Hope College alumni. Our latest count? Seven of them.* There must be something in Hope’s water — and it isn’t malted barley, yeast and hops.

First to open and closest to campus was New Holland Brewing Company. Founded in 1997 by Brett VanderKamp ’94 and Jason Spaulding ’94, the brewery has grown from its modest beginnings by the soccer field on Fairbanks to a regional powerhouse. Hope alumnus David White ’98, New Holland’s first employee, is now a partner in the company and vice president of retail operations.

“We had been talking about starting a brewery since sophomore or junior year at Hope,” VanderKamp said. Back then, “Holland was a beer desert. People didn’t have any idea what we were doing.”

“The Midwest has always been behind,” said Mike Stevens ’91, who cofounded Founders Brewing Company with Dave Engbers ’93 in nearby Grand Rapids, also in 1997. When they started, “nobody cared about craft beer,” Stevens said.

Even today, after decades of growth and with more than 5,000 craft breweries in the United States, craft beer is still a small share of the total American beer market. In 2016, craft beer sales totaled 22 percent by dollars and only 12 percent by volume. Twenty years ago, those numbers were far smaller.

“There was an allure to the fact that it wasn’t very popular,” Engbers said. “We were trying to push this boulder up a hill.” Founders limped along for more than a decade before making a profit, and the company flirted with bankruptcy more than once, sticking with it only because there was no way out.

Things didn’t start to change until the mid-2000s. “The light switch just came on with consumers,” said Stevens. “Oh-eight’s when the world woke up and decided craft beer was cool.”

Now, 20 years after New Holland and Founders poured their first cold ones, West Michigan is front-and-center in the national craft beer scene. Grand Rapids was voted Beer City U.S.A. (2012 and 2013) and earned both Best Beer Town (2014) and Best Beer Scene (2016) in USA Today Reader’s Choice polls.

New Holland and Founders did a remarkable job of clearing the way for other Hope alumni to enter the brewing scene. Following hard on their success is a host of breweries: Saugatuck Brewing Co. in 2005, Brewery Vivant in 2010, Osgood in 2013, Beaver Brewing Co. in 2015 and Bière de Mac in 2016.

“Founders and New Holland went for it before it was trendy. Everyone else is in their wake,” said Mindy Chamberlain ’01 Denning, co-owner with her husband, Ron, of Osgood Brewing in Grandville, Michigan. They opened their brewery in no small part because of their love for Grandville. “We have a personal connection to the community,” she said.

This community focus is a common refrain for many brewers.

“The great thing about craft brewing is its impact on the community,” said George Ranville ’78, president of Bière de Mac Brew Works in Mackinaw City. Opening in late 2016, Bière de Mac is already having a local influence. “When you drink our

* Did we miss one? Let us know, and we’ll update our records!
Jason Spaulding is similarly proud of making a difference. Spaulding founded Brewery Vivant with his wife, Kris, in 2010, five years after he left New Holland. “My wife and I partnered on this together so it was really a co-dream,” he said. “We continue to focus on being better stewards of our neighborhood and giving better things to our employees.”

Brewery Vivant is the first LEED-certified brewery in the country and the first brewery in Michigan certified as a B Corporation, which measures positive business practices. It specializes in brewing Southern Belgian-style saisons or farmhouse beers, which are based on the types of beer Spaulding drank while touring French-speaking Belgium.

The Belgian tour wasn’t Spaulding’s first time experiencing Europe’s positive beer culture. A Hope trip with VanderKamp “was really influential, just seeing how proud people were of beer, the money stays in the community,” Ranville said.

If a distinctly European approach to beer culture influenced several of Hope’s alumni-owned establishments, a distinctly American approach to beer-making is starting to have an impact on European breweries in return.

“‘They’re actually importing American hops to make IPAs and traditionally that never would have happened,’ Spaulding said.

David Beaver ’98 is bringing the craft scene back to Europe in the most literal sense. In 2015, he opened Beaver Brewing Company in Vienna, Austria, to provide American-style ales and food. “We focus on craft beer styles, fresh and cold and at a good price,” Beaver said. “You might say ‘nontraditional,’ but they’re all traditional beer varieties that just haven’t been made here in Europe for a while.”

Founders is bringing its beer to an international market, too. In 2014, 125-year-old, seventh-generation Spanish brewery Mahou San Miguel bought a 30 percent share of the company — in part to help with international distribution (Founders beer is currently sold in 26 countries) but primarily because of Mahou San Miguel’s knowledge base and skill set.

In a less formal sense, partnerships among breweries are common. The craft industry has a reputation for being less competitive than is typically expected among industries fighting for the same market share. It’s understandable when you consider that craft brewers aren’t exactly fighting each other for market share, they’re still fighting Anheuser-Busch and MillerCoors.

“We’ll certainly help any brewery that wants help or needs something, and they with us,” said Ric Gillette ’76, president and CEO of Saugatuck Brewing Company in Saugatuck, Michigan.

“There’s an overall friendly community of breweries and
brewers because someone else’s success doesn’t mean another person’s failure. If somebody does well, everyone does well,” Denning said.

Still, there’s a sense that things are starting to change.

“There’s starting to be some tension between breweries just because there are so many now,” Spaulding said.

It’s not an easy industry, but many of Hope’s alumni brewers credit an unexpected element for their success: a broad knowledge base and their experiences at a small liberal arts college.

“Liberal arts education opens you up to everything,” said Gillette, who was one of the first investors when Saugatuck Brewing Company opened in 2005. In 2009, he took over management. “I invested in the company and ended up running it,” he said.

“The liberal arts background certainly gave me an advantage,” said New Holland’s VanderKamp.

Mike Stevens identifies Hope’s size as another factor. “It really allows you to become a leader and it breeds leadership,” he said. “It builds confidence at a very critical point in your life.”

“Hope College in general, for whatever reason, has a really good entrepreneurial mindset,” Spaulding said. “It just so happens that it also coincided with this rise of craft beer. That’s probably the practical reason why there are so many breweries owned by Hope alumni.”

That, and the determination, grit and character of the school’s students and graduates.

“Hope College is a difficult college,” said George Ranville at Bière de Mac. “You have to work hard. We successfully get through Hope and translate that diligence to whatever we’re doing.”

Osgood’s Mindy Denning sees it the same way. “When I was at Hope, my character and my resilience were strengthened. I became tougher,” she said. Part of it was her experience as a moraler in the Pull: “You can’t give up. You don’t quit. There would be every opportunity to say, ‘This is way too hard and it’s not worth it, let’s throw in the towel,’ but that’s just not an option.”

“Hope College in general, for whatever reason, has a really good entrepreneurial mindset,” Spaulding said. “It just so happens that it also coincided with this rise of craft beer. That’s probably the practical reason why there are so many breweries owned by Hope alumni.”
INTO AFRICA
The destinations themselves are memorable, but it’s the focus and sense of family that make the Alumni Travel Program magical. Always led or co-led by a faculty member with expertise in the region, the tours are not simply sight-seeing expeditions but educational opportunities with a global emphasis, reflecting the college’s ongoing commitment not only to international engagement but life-long learning. And, every participant — whether alum, spouse or friend of the college — shares a connection to Hope that creates a bond of fellowship from the start.

This year’s trip was a 14-day adventure on the northern safari circuit of Tanzania that featured flora, fauna and engagement with the region’s people. It was led by Dr. Eldon Greij, a professor emeritus of biology and respected ornithologist who previously led a Hope May Term to the area, and Dr. Tim Laman ’83, a field biologist and award-winning wildlife photographer who had conducted research with Dr. Greij during his student days and has since been a regular contributor to *National Geographic* as well as a research associate at Harvard in the Ornithology Department. Considering the setting, amazing photos were probably a given, but everyone’s experience behind the lens was enhanced by Tim’s generously shared expertise.
The photos on this and the previous spread are not all of the images that we have to share. For more by Tim Laman ’83 (pictured at upper left) as well as a gallery of favorites from the tour’s participants, please visit the college online. The website also includes reflections on the trip and a feature about Tim by staff member Lynne Powe ’86.

By Alan Babbitt

Hope College welcomed two more national champions to the fold this spring as track & field runner Erin Herrmann and golfer Josh Gibson both claimed NCAA Division III titles in their respective events.

Herrmann, a senior from Wheaton, Illinois, won the 3,000-meter steeplechase on May 27 in Geneva, Ohio, with a school-record time of 10 minutes, 21.08 seconds that was the ninth-fastest time in Division III women's history. She joined Hope's Nora Kuiper, the 100-meter national champ in 2009.

Gibson, a sophomore from Grandville, Michigan, became Hope’s first national champion in golf by winning a one-hole playoff on May 20 in Howie-in-the-Hills, Florida. He recorded a par-four on the playoff hole and finished 73 holes and four days of play at 1-under par. Hope finished a program-best sixth place as a team at nationals, capping an outstanding year for long-time coach Bob Ebels, who retired this summer after guiding the team for 26 seasons.

A successful end for the 2016-17 school year saw Hope Athletics finish 19th in the national Learfield Sports Directors’ Cup standings for Division III — the college’s second-highest finish ever. Hope also finished runner-up in the MIAA Commissioner’s Cup after winning seven MIAA team championships.

For highlights in athletics from across the 2016-17 school year, including all of the college’s sports, please visit Hope online at hope.edu/1617athletics
So, who was the Medium at Endor, and why might that matter?

Those familiar with the Star Wars films might be forgiven for guessing she’s a bit player from the forest moon inhabited by the Ewoks, but she’s actually a figure from the Bible — one that Dr. Lynn Winkels ’81 Japinga of the religion faculty is hoping to rescue from obscurity and misunderstanding.

A new book by Japinga explores the stories of more than 40 women featured in the Old Testament, from those well-known like Eve and Ruth, to others not even named, like the medium. Preaching the Women of the Old Testament, published earlier this year by Westminster John Knox Press of Louisville, Kentucky, is designed as a resource for pastors who want to know more about the many women of the Old Testament and how better to incorporate them into their sermons, but is also accessible to the layperson seeking new insight into individuals who Japinga notes haven’t always been fully or fairly considered.

Some of the stories, like the familiar tale of Ruth and her devotion to her mother-in-law Naomi in the Book of Ruth, are uplifting. Others, like Jephthath’s sacrifice of his daughter in Judges 11, aren’t.

“The preacher who chooses to explore these texts faces some significant challenges,” said Japinga, a professor of religion at Hope who is also an ordained minister in the Reformed Church of America and a specialist in the history of American religion and feminist theology.

“First, people know very little about women in the Old Testament, and what they think they know is often wrong. The preacher often needs to deconstruct what people think they know about the text, particularly the stories about Eve, Bathsheba, Delilah and Jezebel,” she said. “Second, preachers and commentators throughout history and down to today have read their own assumptions (and, often, their own prejudices) into the text.”

Each of the women receives a chapter, which begins by sharing where in the Bible her story is found and whether or not it’s included in the lectionary that provides a guide for readings to use in preaching. Japinga then presents a synopsis of the story, reflecting also on previous commentary about it, and concludes by suggesting possible sermon themes.

Some of the stories, like the familiar tale of Ruth and her devotion to her mother-in-law, Naomi, in the Book of Ruth, are uplifting. Others, like Jephthath’s sacrifice of his daughter in Judges 11, aren’t.

“The biblical stories function as a mirror to say something true about human experience, both in the ancient world and in the 21st century,” Japinga said. “They can be horrifying and depressing. People dominate, hurt and abuse each other, both then and now. The stories also show people being courageous and graceful and resisting evil.”

Japinga outlines the story of the Medium of Endor — named simply for the village in which she lived in Lower Galilee in ancient Israel — as an example of the latter. As depicted in 1 Samuel 28, the medium was capable of summoning spirits, and brought the deceased prophet Samuel at the request of Israel’s King Saul, who sought advice for a battle with the Philistines the next day. God had stopped communicating with Saul, and Samuel’s angry spirit confirmed that Saul had fallen from God’s favor and would die in the fight. Saul was distraught and hadn’t eaten all day, and the woman, seeing that he was terrified, insisted that he rest while she fixed a meal for him and his servants.

The story isn’t in the lectionary, and commentators, Japinga said, have frequently dismissed the medium “as either sinful or inconsequential” — or even suggested that her power came from demons or Satan.

The biblical text, Japinga said, doesn’t criticize the medium at all. Instead, she said, the woman modeled compassion and might be interpreted as a source of grace, even when God seems absent.

“Saul received genuine compassion and hospitality and communion from an unlikely source,” Japinga said. “The woman saw his exhaustion and confusion and offered understanding, sympathy and food. She chose to be gracious and caring, not because she was commanded to do so, but because she saw Saul’s pain and responded to it. God is mostly absent from the story, even though Saul desperately sought God’s advice and approval. But perhaps God was present in this ‘last supper’ between the two of them.”

Ordering information is available through the college’s Hope-Geneva Bookstore, 800.946.4673 or bookstore@hope.edu.
STRIKE!

Just as the new Jim and Martie Bultman Student Center has been designed to serve the needs and interests of today’s students, so, too, was the DeWitt Student and Cultural Center built to serve the needs and interests of the students of 1971, and thus DeWitt resounded with the distinctive clatter of 10 pins courtesy of a bowling alley. There were even tournaments, but enthusiasm for the activity eventually faded and the lanes, located on the building’s ground level, were removed and the space repurposed in the early 1980s.
50s
Barry Whitsitt ’54 of Oxford, Georgia, and his wife, Maryann celebrated their 65th wedding anniversary.

60s
Sue Utzinger ’67 Buchan of Muskegon, Michigan, reports that she is a retired educator, grandmother and clinical social worker with a private practice in North Muskegon, Michigan. She does some volunteer work at summer camp and stays active watching her grandchildren’s sporting events. She is enjoying West Michigan and planning some landscape painting and fishing.

Wesley Granberg-Michaelson ’67 of Santa Fe, New Mexico, had From Times Square to Timbuktu: The Post Christian West Meets the Non-Western Church published. He is also a member of the Global Christian Forum Steering Committee which met in Havana, Cuba, in March 2017.

John Killmaster ’67 of Boise, Idaho, and Shelley Sinquefield were married and he gained two step-children. He is publishing a book on his career as an artist and university professor. He was honored with an Albert Nelon Marquis Who’s Who Lifetime Achievement Award.

Judy Tanis ’67 Parr of Holland, Michigan, has been elected to a one-year term as president of the Hope Academy of Senior Professionals (HASP). The organization, which promotes lifelong learning, was founded at Hope in 1988 by Dr. John Hollenbach, professor emeritus of English. Since then, it has grown from 38 to 750 members.

Laurie Taylor ’67 Rossi of Fairview, New Mexico, will be conducting the Performance Santa Fe Symphony in Santa Fe, New Mexico, on December 24 and 31 at the Lensic Theatre. On Tuesday, July 4, she conducted the Santa Fe Concert Band on the Plaza.

Lois Dykema ’67 Sharp of Saint Mary’s, Ohio, reports that she and her husband, George, have four children, eight grandchildren, 11 great-grandchildren and three great-great-grandchildren and feel very blessed.

Peppy Albers ’69 Michel of San Pedro, California, reports that she is humbled by the realization of grace in her life and those of her clients, which supersedes all difficulties and so inspires us. She is a “trauma therapist” (PTSD in private practice in Palos Verdes, California. Her newly published book Art Psychotherapy Experiential Workbook for the Professional was featured in the May-June issue of Psychology Today magazine.

70s
Dorothy Breen ’72 of Carrabassett Valley, Maine, is an associate professor emerita from the University of Maine and is a licensed psychologist in private practice.

Nancy Cooper ’72 of Clifton, New Jersey, reports that she continues to be very active in the Reformed Church presently serving as elder delegate to classis as well as serving on two classis committees. In June, she attended the General Synod. She continues to serve as treasurer of her church, which she has done for more than 25 years, teaches an adult Sunday school class, chairs a women’s ministries group, and plays in the hand bell choir and sings in the senior choir. In her “spare time” she reads, cross stitches and gardens (her late husband used to love to garden, so she hasn’t had to garden in 30-plus years).

Johanna Willems ’72 George of New Era, Michigan, has retired from Shelby Public Schools and spends seven months a year in The Villages, Florida.

Rick Hine ’72 and his wife, Linda, report that they are blissfully retired in Coronado, California. They are just as busy in retirement as they were during their work and family years. Their motto is simple: “Every day is a great day, some days are better.”

Laurel Dekker ’72 VanHaitsma Kempkers reports that after her husband’s passing, she married Gord Kempkers and moved from Ludington, to Hamilton, Michigan. Combined they have 14 grandchildren, with number 15 due in August.
Classnotes

Dawn Van Ark ’71 has retired after 46 years at Hope College, where she was library acquisitions specialist. She was honored with a reception at the Van Wylen Library on Thursday, July 20.

William Strader ’74 presented at the Michigan Association for the Education of Young Children conference in Grand Rapids, Michigan, on Thursday-Saturday, April 20-22.

Sue Poppink ’75 of Portage, Michigan, has received the Teaching Excellence Award from the College of Education and Human Development at Western Michigan University. She has been a professor of educational leadership at WMU for the past 16 years.

Mike Carpenter ’76 retired in April 2017 after 35 years with American Blue Ribbon Holdings (Village Inn and Bakers Square restaurants) and reports that he looks forward to traveling and relaxing in their new home in Marysville, Washington.

Barbara Wrigley ’76 reports that after retiring in 2012 and the death of her wife in 2014, she moved from Berkeley, California to Durham, North Carolina. On Monday, April 24, she completed the competency development program for coach certification at the Gestalt International Study Center in Wellfleet, Massachusetts, and has launched a business, Heart’s Harvest. Barbara serves a nation-wide group of clients as a life transitions coach, providing guidance for those undergoing major transitions such as retirement, moving, changing jobs, divorce or the loss of a loved one.

Philip De Jong ’77 of Charlottesville, Virginia, has been appointed president of Uppermost Press LLC with offices in Charlottesville, Virginia, and Addis Ababa, Ethiopia. Uppermost Press publishes inflight magazines including Selamata, the inflight magazine of Ethiopian Airlines. He was the former president and co-founder of Journey Group Inc. in Charlottesville.

Leslie Pett ’77 Johnson is currently working for ACSI Europe as an educational consultant, coming alongside new and growing Christian schools in Europe, especially the Czech/Slovakia/Poland region. In talking about what it means to be a teacher who is a Christian (how one’s faith makes a difference), she has traveled as far as China and spoke in Albania in April.

Thomas Johnson ’77 of Prague, Czech Republic, represented the World Evangelical Alliance and the 600 million members of its churches in relation to the Vatican. This includes interacting with multiple departments of the Vatican. In February he began representing evangelicals in a multi-year series of Vatican-led consultations with about 40 scholars, diplomats and religious leaders (including several non-Christian leaders) to try to find new solutions to the complex set of problems surrounding what they see as the highest levels ever of religiously motivated violence, terrorism and religious persecution. In addition to top Catholic officials and scholars, it includes representatives from the UN, the Nobel Committee, the Archbishop of Canterbury, and top NGOs specialized in this set of topics. The first edition of his book, Human Rights: A Christian Primer, was published in 2008 by the World Evangelical Alliance. The second edition was published in 2016, jointly on behalf of the WEA and a Vatican-based think tank; it is now distributed by both Evangelical and Roman Catholic institutions.

Lynn Raffety ’77 Kennedy is an employee of the City of Virginia Beach Public Libraries. She is on the management team of the Tidewater Community College Joint-Use Library, a partnership serving both students and the community. She reports that she and her husband, Kevin Kennedy ’80, spend time with their children in California, Virginia, and Washington, D.C., and actively participate in the life of their Episcopal Church. In the past few years, they have traveled to Israel, Istanbul, Italy and Budapest.

Brenda Heath ’77 Vander Meulen of Holland, Michigan, is part of the Center for Leadership at Hope, teaching The Trusted Advisor and coaching CFL student consultants. She is a member of the board of directors for Good Samaritan Ministries in Holland, working to end poverty and homelessness in the community, all while still having her own consulting practice.

Sylvia Haug ’77 Verdonk of South Haven, Michigan, retired from teaching high school mathematics for Coloma Schools in Coloma, Michigan, in 2010 after 32 years. She has since taught math classes for Lake Michigan College and has taken on duties as director of religious education at St. Basil Catholic Church in South Haven, Michigan.

Bob Niedt ’78 of Fairfax, Virginia, is an online editor at Kiplinger Washington Editors, the renowned Washington, D.C., based publisher of print and online business forecasts and personal finance advice, including the monthly magazine Kiplinger’s Personal Finance, on newsstands nationwide. Bob lives in Northern Virginia with his wife, Linda. He reports that they explore the historic sites of D.C. and Virginia, and may occasionally stop at a Virginia winery or two.

80s

Kathryn Lawrence ’82 of San Jose, California, reports enjoying the scenery and weather of Northern California while tackling the challenges of a continuously growing business.

Karen Heikema ’82 Terpstra of El Cajon, California, works for the Public Library Foundation that supports 36 public libraries raising funds for many outstanding programs. This foundation raised funds to build the nine-story Central Library in downtown San Diego, California, as well as 11 new branch libraries since its inception 13 years ago. She reports that her passion for non-profit accounting started while she attended Hope working as a student for advancement and alumni relations.

John Fanthorpe ’83 of Zeeland, Michigan, is celebrating the 25th anniversary of the John Fanthorpe Farm Bureau Insurance Agency located in Hudsonville, Michigan. He also serves as an ambassador for the Hudsonville Area.

38 News From Hope College
Chamber of Commerce. John recently relocated his personal residence to Zeeland, Michigan, where he is taking on the challenges of his 113-year-old home. He joined the Second Reformed Church where he enjoys the sermons of Hope alumnus Rev. Karsten Rumohr-Voskuil ’96.

Mike Spitters ’84 reports that he is experiencing the joys and challenges of planting a new Disciples of Christ church in the fastest growing city in America, Frisco, Texas. The church is called “Expedition Church,” and embodies a community-centered approach to doing ministry. His article, “Do What You Love to Grow A Church,” was featured in the latest issue of New Results. He has three children at Texas Christian University, two of whom will be graduating this year. He is active in Theatre Frisco and is currently in the musical Evita.

Betsy Buurma ’87 Berkey of Fenton, Michigan, reports that she is still singing after all these years. She has been directing her church choir for four years. Her highlight last fall was singing with the alumni Hope Chapel Choir in the new music hall.

Robin Beckett ’87 VanderHart of Caledonia, Michigan, received her CMA (certified management accountant) certification in December 2016. She is currently working as director of accounting for Emergency Care Specialists (a medical practice of physicians and physician assistants that staff emergency rooms throughout western and northern Michigan) and Medical Management Specialists (a medical billing company).

Christopher Habben ’88 of Shawnee, Kansas, began a two-year term on Jan. 1, 2017, as president of the American Association for Marriage and Family Therapy. AAMFT is the professional association for the field of marriage and family therapy, and represents the professional interests of more than 50,000 marriage and family therapists throughout the United States, Canada and abroad. He also spoke at a TEDx event in Overland Park, Kansas, on Thursday, March 2, presenting “Navigating Relational Systems.”

Amy Moeckel ’96 Peterson of St. Joseph, Michigan, is a school counselor at Upton Middle School and St. Joseph High School, both of which she and her husband attended, as do/will their two children.

Gail Messing ’96 Schramek of Lake Orion, Michigan, is an orthopedic nurse practitioner at St. Joseph Mercy Oakland. She and her husband have a son, Robert, who just finished first grade.

Ben Krombeen ’97 of Grand Rapids, Michigan, joined Baruch Senior Ministries as the vice president of finance in March. Baruch is based in Grand Rapids, Michigan, and is a faith-based non-profit organization providing senior living services across Michigan.

Becky Hollebeck ’98 Dykhuis of Grandville, Michigan, is the coordinator of connection and engagement at Trinity Reformed Church in Grand Rapids, Michigan. She and her husband, Brian Dykhuis ’98, live in Grandville, Michigan, with their four children.

Matthew Kuiper ’98 of South Bend, Indiana, has been awarded the University of Notre Dame’s 2017 Shaheen Graduate Award, given annually to the university’s outstanding Ph.D. graduate in the humanities. He was recently appointed assistant professor of Islamic Studies.

GIVING BEYOND

Blaine ’86 and Kathy Newhouse have found through giving, they receive. Support of the Hope Fund, their family scholarships and including Hope College in their estate plan is part of modeling a God-honoring standard of living for their children, a model that Kathy’s parents started when she was young.

Through the inspiration of their parents and by creating a scholarship fund, the Newhouses have a positive impact on students’ ability to attend Hope.

By planning a gift to support Hope’s future, you can join Blaine and Kathy in helping the college carry forward its mission of educating students for lives of leadership and service.

For more information contact:
John A. Ruiter, J.D.
Director of Gift Planning
616.395.7779
ruiter@hope.edu
hope.edu/plannedgiving
at Missouri State University. His book, *Da’wa and Other Religions: Indian Muslims and the Modern Resurgence of Global Islamic Activism*, will be published by Routledge this fall.

Kara McGillicuddy ’98 and Steve Landstrom were married on July 19, 2014. They also announce the birth of Millie Rose on April 1, 2017.

Jessica Owens ’98 and Sean Hennessey were married on April 22, 2017, in Baltimore, Maryland, where they now reside.

Darcy Smith ’99 Carmichael and Chad Carmichael announce the birth of Bella on Feb. 1, 2017. She is their 12th child.

Mike Farmer ’99 of Raleigh, North Carolina, was promoted to senior vice president, human resources at BMC Stock Holdings.

00s

Nathan Hart ’01 successfully defended his doctoral thesis at Gordon-Conwell Theological Seminary in Boston, Massachusetts.

Jim Boerkoel ’05, assistant professor of computer science at Harvey Mudd College, was awarded a Faculty Early Career Development (CAREER) grant by The National Science Foundation (NSF) for his project “CAREER: Robust and Reliable Multiagent Scheduling Under Uncertainty.” The CAREER grant will fund five years of new research that builds on previous work. He specializes in human-robot interaction, artificial intelligence and interaction design. Please visit cs.hmc.edu/HEAT/ for more about his award and work and see the class notes above for more on Jim and his wife, Liz Otton ’06 Boerkoel.

Erin Wysocki ’02 Kostun and Michael Kostun announce the birth of Andrew Michael on March 2, 2017. He joins big sister Claire, who they report is over-the-moon in love.

Charlene Kan ’03 and Eric Yeh were married on Sept. 3, 2016, in Cleveland, Ohio.

Bryant Loomis ’03 received the 2016 NASA Robert H. Goddard Exceptional Achievement for Science Award for innovative improvements, advancements and science applications of time-variable gravity mascon solutions from Gravity Recovery and Climate Experiment (GRACE) data.

Cynthia Bachhuber ’04 accepted a position as North American history librarian at the Wisconsin Historical Society

Jake Taber ’04 and Kelly Kraft ’04 Taber announce the birth of Sloane Cora on March 8, 2017. She joins Tessa and Colby.

He was presented with the 2017 American Association of Oral and Maxillofacial Surgeons Dental Student award for outstanding performance in undergraduate oral and maxillofacial surgery. He has accepted an oral surgery fellowship at the University of Missouri Kansas City to continue his studies.

Rebecca Danforth ’12 received her Ph.D. in chemistry on the ultrafast photochemistry of aqueous iron (III) complexes from Montana State University in May 2017.

Michael Dirksen ’12 received a Master of Arts degree in international peace and conflict resolution from American University in Washington, D.C. He also received a Master of Arts degree in political science from the University of Illinois at Chicago and is a Ph.D. candidate at the University of Illinois at Chicago, studying political parties and the politics of water in the Middle East.

Dean Hazle ’12 of Brookline, Massachusetts, is the permitting compliance officer for Keolis Commuter Services, the operator of the commuter railroad in Boston.

Eric Spytma ’12 and Julie Powers ’12 were
Hope graduates have once again fared well in the prestigious Graduate Research Fellowship Program of the National Science Foundation (NSF), with four receiving awards this year.

David Lunderberg ’17, Lisa McLellan ’15, Monica Ohnsorg ’16 and Julia Slopsema ’15 all received fellowships this year. McLellan had received honorable mention in both 2015 and 2016, and Ohnsorg had received honorable mention last year.

Hope students or graduates have received fellowships or honorable mention through the program every year for more than 20 years, and this is the 10th year in a row that multiple graduating seniors or recent alumni have been recognized. The NSF awarded 2,000 of the fellowships nationwide this year, and recognized another 1,753 applicants with honorable mention. There were more than 13,000 applicants.

The awards are for students pursuing a research-based master’s or doctoral degree in science or engineering. The fellowships are for up to three years, and pay a $34,000 annual stipend and a $12,000 cost-of-education allowance to the graduate institution.

Lunderberg will be pursuing graduate study in physical chemistry at the University of California, Berkeley. McLellan is pursuing graduate study in microbial biology at Washington University in St. Louis. Ohnsorg is pursuing graduate study in macromolecular chemistry, supramolecular chemistry and nanochemistry at the University of Minnesota-Twin Cities. Slopsema is pursuing graduate study in biomedical engineering at the University of Minnesota-Twin Cities.

See hope.edu/nsf2017 for more information.

Sarah Nammack ’14 graduated from Duke University’s School of Nursing with a degree as an adult-gerontology nurse practitioner with cardiology specialty in May 2017.منتخب حل إجابات الأسئلة من الطلاب

Steven Skawski ’14 and Molly Greenfield ’15 were married on June 24, 2017, in Holland, Michigan.

Amber Prins ’15 and John Dood ’17 were married on July 29, 2017 in Holland, Michigan. They are moving to Tampa, where Amber will be attending graduate school.

THE WAY OF TEA

Hope shared a unique opportunity to observe the Japanese Tea Ceremony on June 8 during a return visit by Ikuko Okada of Kawasaki, Japan, who attended the college in 1975-76 and during May Terms in 2006 and this spring. She has been trained and licensed in the centuries-long tradition by the Urasenke International Association of Tea, which seeks to build worldwide understanding and appreciation of the ceremony so that “the Way of Tea’s” spirit — symbolized by the ideals of harmony, respect, purity and tranquility — can help bring true peace to all.
WELCOME!
Prospective students and their families are invited to visit Hope and experience first-hand the college’s friendly community and distinctive holistic approach to preparing students for lives of leadership and service.
